Barstad,2013-11-11 Although underwater archaeology has assumed its rightful place as an important subdiscipline in the field the published literature has not kept pace with the rapid increase in the number of both prehistoric and historic underwater sites The editors have assembled an internationally distinguished roster of contributors to fill this gap In addition to both geographical and topical approaches the chapters also focus on technology law public and private institutional roles and goals and the research and development of future technologies and public programs *International Handbook of Historical Archaeology* Teresita Majewski,David Gaimster,2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not

only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today

Williams, Roberto Junco, 2021-07-26 This is the first book devoted to the topic of Manila galleon shipwrecks in North America previous research on Manila galleons either has focused on the economics of the Manila galleon trade or has been limited to reports of the galleon wreck sites in the western Pacific salvaged for their cargoes All three North American shipwrecks are protected under the historic preservation laws of the United States or Mexico and each shipwreck site has been investigated by professional archaeologists seeking to answer research questions posed in peer reviewed research designs The majority of Manila galleon wrecks are found in the western Pacific and were salvaged by treasure hunters rather than recovered by archaeologists The three North American shipwrecks represent the most protected Manila galleon archaeological sites so their potential for future archaeological research is higher than for many of the extant shipwrecks of the western Pacific
