Marine Mammals: the Evolving Human Factor Giuseppe Notarbartolo di Sciara, Bernd Würsig, 2022-06-08 The seventh volume in the series Ethology and Behavioral Ecology of Marine Mammals describes aspects of the often complex relationship between humans and marine mammals From a primeval condition of occasional predators during the last century humans have become a major factor negatively affecting the status of most marine mammals through over hunting habitat encroachment and environmental degradation This has led to the extirpation of many marine mammal populations and even to the extinction of species However in parallel to this destructive drive since antiquity humanity has been influenced by a strong fascination for marine mammals which contributes today to an increased human appreciation of the natural world admixed with widespread concern for its degrading condition The special status occupied by marine mammals in human imagination and affection stands in stark contrast with the current predicament of many populations still threatened by the doings of Homo sapiens a condition emblematic of the relationship of humanity with nature and key to understanding where humanity is heading

Guide to Marine Life Marty Snyderman, Clay Wiseman, 1996 A layman's guide to identifying and understanding the marine life while scuba diving

Ethology and Behavioral Ecology of Odontocetes Bernd Würsig, 2019-08-02 This book concentrates on the marine mammalian group of Odontocetes the toothed whales dolphins and porpoises In 23 chapters a total of 40 authors describe general patterns of ethological concepts of odontocetes in their natural environments with a strong bent towards behavioral ecology Examples are given of particularly well studied species and species groups for which enough data exist especially from the past 15 years The aim is to give a modern flavor of present knowledge of ethology and behavior of generally large brained behaviorally flexible mammals that have evolved quite separately from social mammals on land As well the plight of populations and species due to humans is described in multiple chapters with the goal that an understanding of behavior can help to solve or alleviate at least some human made problems

Physiology of Marine Mammals Michael Castellini, Jo-Ann Mellish, 2023-07-05 Suppose you were designing a marine mammal What would they need to live in the ocean How would you keep them warm What design features would allow them to dive for very long periods to extreme depths Do they need water to drink How would they minimize the cost of swimming and how would they

find their prey in the deep and dark These questions and more are examined in detail throughout Marine Mammal Physiology which explores how marine mammals live in the sea from a physiological point of view This undergraduate textbook considers the essential aspects of what makes a marine mammal different from terrestrial mammals beyond just their environment It focuses on the physiological and biochemical traits that have allowed this group of mammals to effectively exploit the marine environment that is so hostile to humans The content of this book is organised around common student questions taking the undergraduate s point of view as the starting point Each chapter provides a set of PowerPoint slides for instructors to use in teaching and students to use as study guides New Study Questions and Critical Thinking Points conclude each chapter which are each motivated by a Driving Question such as How do mammals stay warm in a cold ocean or How do mammals survive the crushing pressures of the deep sea Full colour images and comprehensive accessible content make this the definitive textbook for marine mammal physiology *The Living Sea* Robert Burton, Carole Devaney, Tony Long, 1976

The Marine World Frances Dipper, 2021-06-08 The Marine World is a book for everyone with an interest in the ocean from the marine biologist or student wanting expert knowledge of a particular group to the naturalist or diver exploring the seashore and beyond With colour illustrations line drawings more than 1 500 colour photographs and with clear accessible text this book encompasses all those organisms that live in on and around the ocean bringing together in a single text everything from the minuscule to the immense It includes sections on all but the most obscure marine groups covering invertebrate phyla from sponges to sea squirts as well as plants fungi bacteria fish reptiles mammals and birds It incorporates information on identification distribution structure biology ecology classification and conservation of each group addressing the questions of what where and how Today global warming overfishing ocean acidification and pollution are just a few of the ever increasing number of threats and challenges faced by ocean life Without knowledge of the animals plants and other organisms that live in the marine world we cannot hope to support or implement successful conservation and management measures nor truly appreciate the incredible wealth and variety of marine life The Marine World is the product of a lifetime spent by Frances Dipper happily observing and studying marine organisms the world over It has been brought to colourful life by a myriad of enthusiastic underwater photographers and by Marc Dando the renowned natural history illustrator
