The Adolescent Alone Jeffrey Blustein, Carol Levine, Nancy Dubler, 1999-07-13 A growing number of adolescents do not have a supportive and trusting relationship with an adult in a birth foster adoptive or chosen family Through a variety of circumstances they are literally or functionally alone Yet like all adolescents they need routine and sometimes specialized health care This book is a collection of essays case studies and guidelines that describe the demography philosophical medical legal and developmental framework in which these youth and health care staff confront medical decision making The authors address questions of consent confidentiality access to care and the right to refuse or demand care Throughout the emphasis is on the real world experience of adolescents as they struggle to overcome the challenges of being alone Professionals who work with these adolescents cannot replace their absent or disinterested families but can fulfill the critical role of trusted adult advisor      **Animal Research and Ethical Conflict** Mary T. Phillips, Jeri A. Sechzer, 2012-12-06 This volume grew out of a project to conduct a survey of the scientific literature of the United States for items addressing the ethical and humane issues of animal experimentation The original purpose of the survey was to provide background information for the development of a set of guide lines for the use of animals in research then in preparation by The New York Academy of Sciences Ad Hoc Committee on Animal Research We soon realized however that the survey constituted a valuable resource in its own right In this book we present the results of the literature survey along with relevant information about its legislative and historical context We hope that this material will be helpful to biomedical researchers grappling with animal welfare problems as well as to social scientists interested in tracing the evolution of the 20th century phase of the animal research controversy The time span covered by the survey was selected to match the 20 year period between the passage of the first federal Animal Welfare Act in 1966 and the most recent legislation regulating animal research which took

effect during 1986 Our analysis examines this transitional period through the pages of the scientific literature During these 2 decades animal research in the United States was transformed Activist animal protection organizations catapulted troublesome ethical questions to national prominence throwing the scientific community into turmoil

consent This book is distinctive insofar as it employs the ethics of care as a hermeneutic to interpret ATM The analysis examines the ethics of care movement in Western bioethics to explore its relational approach to informed consent Additionally this is the first known study that discusses healthcare ethics committees in ATM *Intuition in Medicine* Hillel D. Braude, 2012-05-22 Intuition is central to discussions about the nature of scientific and philosophical reasoning and what it means to be human In this bold and timely book Hillel D Braude marshals his dual training as a physician and philosopher to examine the place of intuition in medicine Rather than defining and using a single concept of intuition philosophical practical or neuroscientific Braude here examines intuition as it occurs at different levels and in different contexts of clinical reasoning He argues that not only does intuition provide the bridge between medical reasoning and moral reasoning but that it also links the epistemological ontological and ethical foundations of clinical decision making In presenting his case Braude takes readers on a journey through Aristotle's Ethics highlighting the significance of practical reasoning in relation to theoretical reasoning and the potential bridge between them then through current debates between regulators and clinicians on evidence based medicine and finally applies the philosophical perspectives of Reichenbach Popper and Peirce to analyze the intuitive support for clinical equipoise a key concept in research ethics Through his phenomenological study of intuition Braude aims to demonstrate that ethical responsibility for the other lies at the heart of clinical judgment Braude's original approach advances medical ethics by using philosophical rigor and history to analyze the tacit underpinnings of clinical reasoning and to introduce clear conceptual distinctions that simultaneously affirm and exacerbate the tension between ethical theory and practice His study will be welcomed not only by philosophers but also by clinicians eager to justify how they use moral intuitions and anyone interested in medical decision making *Biomedical Ethics and Jewish Law* Fred Rosner, 2001 In addition a number of the earlier chapters have been thoroughly revised in light of current developments The book is an addition to the library of anyone who is concerned about the interaction between modern medicine and Jewish law in the twenty first century **BOOK JACKET** **Why Religion and Spirituality Matter for Public Health** Doug Oman, 2018-05-08 This volume reviews the exploding religion spirituality R S and health literature from a population health perspective It emphasizes the distinctive Public Health concern for promoting health and preventing disease in societies nations and communities as well as individuals Part I offers a rigorous review of mainstream biomedical and social scientific theory and evidence on R S health relations Addressing key gaps in previous literature it reviews evidence from a population health viewpoint surveying pertinent findings and theories from the perspective of Public Health subfields that range from Environmental Health Sciences to Public Health Nutrition to Health Policy Management and Public Health Education In Part II practitioners describe in detail how attending to R S factors enhances the work of clinicians and community health practitioners R S provides an additional set of concepts and tools to address opportunities and challenges ranging from behavior and institutional change to education policy and advocacy Part III empowers educators analyzing pedagogical needs
