Cataloge systematique des ouvrages Commission of the European Communities Bibliothèque centrale scientifique et Nuclear Spectroscopy and Reactions 40-D Joseph Cerny, 2012-12-02 Nuclear Spectroscopy and Reactions Part D covers information regarding the development of nuclear spectroscopy and its reactions while emphasizing in beam spectroscopy This part covers the general theoretical concepts of nuclear investigations This book provides in depth analysis of several concepts of nuclear spectroscopy such as models of heavy and light nuclei approaches in resonance reactions inelastic scattering charge exchange and one and two nucleon transfer reactions. This series is written to primarily benefit graduate students who are engaged in research that concerns nuclear spectroscopy Catalogo Sistematico Dei Libri Euratom. Bibliothèque centrale, 1960 Nuclear Structure (In 2 Volumes) Aage Niels Bohr, Ben R Mottelson, 1998-01-22 The field has expanded in so many directions in connection with the increase in accessible energy angular momentum and nuclear species and the new phenomena which have been revealed have stimulated conceptual developments concerning the significant degrees of freedom and their interplay in nuclear dynamics it would be impossible for us to provide an assessment of this vastly expanded subject with anything like the degree of comprehensiveness aimed at in the original text At the same time this text continues to describe the basis for the understanding of nuclear structures as we see it today foreword from the new prefaceAfter many years this classic two volume treatise is now available again in an unabridged reprint These volumes present the basic features of nuclear structure in terms of an integration of collective and independent particle aspects and remain a foundation for current efforts in the field Central to the book s value is an approach that recognizes the many connections between concepts of nuclear physics and those of other many body systems and that deals boldly with the interplay between theory and experiment Aside from the main text which provides a systematic exposition of the subject there are sections labeled Illustrative Examples which present detailed analyses of experimental results and the manner in which they illuminate the concepts developed in the text Many useful appendices on general theoretical tools are also included covering topics such as angular momentum algebra symmetry problems statistical High-energy Nuclear Optics of Polarized description of level densities and theory of nuclear reactions and decays <u>Particles</u> Vladimir G. Baryshevsky, 2012 The various phenomena caused by refraction and diffraction of polarized elementary particles in matter have opened up a new research area in the particle physics nuclear optics of polarized particles Effects similar to the well known optical phenomena such as birefringence and Faraday effects exist also in particle physics though the particle wavelength is much less than the distance between atoms of matter Current knowledge of the quasi optical effects which exist for all particles in any wavelength range and energies from low to extremely high will enable us to investigate different properties of interacting particles nuclei in a new aspect This pioneering book will provide detailed accounts of quasi optical phenomena in the particle polarization and will interest physicists and professionals in experimental

Part A ,1961-01-01 Nuclear Physics Part A Model-Based Reasoning in Science and countries Technology Lorenzo Magnani, 2013-08-31 This book contains contributions presented during the international conference on Model Based Reasoning MBR 012 held on June 21 23 in Sestri Levante Italy Interdisciplinary researchers discuss in this volume how scientific cognition and other kinds of cognition make use of models abduction and explanatory reasoning in order to produce important or creative changes in theories and concepts Some of the contributions analyzed the problem of model based reasoning in technology and stressed the issues of scientific and technological innovation. The book is divided in three main parts models mental models representations abduction problem solving and practical reasoning historical epistemological and technological issues The volume is based on the papers that were presented at the international
