### Conclusions and Prospects

The history of Chinese civilization extends back for 5000 years. Throughout this history, Chinese ancestors, with respect for nature and affection for plants, cultivated and bred new varieties of plants. Known as the 'mother of gardens' in the world, Chinese ancestors have introduced new varieties of roses, world-famous flowers, which are sometimes also named the queen of the flower kingdom. Their brilliant technique and knowledge of breeding new plant varieties can be seen from the following evidence. Seven thousand years ago, coloured pottery on which five-petalled flowers were painted was fashioned. Two thousand years ago, the Chinese Emperor Hanwudi

had roses planted at the palace. More than 1000 years ago, there were roses that were bushy, big-flowered, double and recurrent-blooming. Over 200 years ago, Chinese roses were brought to Europe and began their important new phase of development.

At present, the traditional techniques of cultivating rugosa roses have been improved. There have been more than 50 varieties, and many of them have short

**Evolution in Action** Matthias Glaubrecht, 2010-07-24 Radiations or Evolution in Action We have just celebrated the Darwin Year with the double anniversary of his 200th birthday and 150th year of his masterpiece On the Origin of Species by means of Natural Selection In this work Darwin established the factual evidence of biological evolution that species change over time and that new organisms arise by the splitting of ancestral forms into two or more descendant species However above all Darwin provided the mechanisms by arguing convincingly that it is by natural selection as well as by sexual selection as he later added that organisms adapt to their environment The many discoveries since then have essentially confirmed and strengthened Darwin's central theses with latest evidence for example from molecular genetics revealing the evolutionary relationships of all life forms through one shared history of descent from a common ancestor We have also come a long way to progressively understand more on how new species actually originate i.e. on speciation which remained Darwin's mystery of mysteries as noted in one of his earliest transmutation notebooks Since speciation is the underlying mechanism for radiations it is the ultimate causation for the biological diversity of life that surrounds us
