Edward H Bennett Architect And City Planner 1874 1954:

Edward H. Bennett, Architect and City Planner, 1874-1954 Joan E. Draper, Edward Herbert Bennett, Art Institute of Chicago, 1982 *Edward H. Bennett : Architect and City Planner, 1874-1954* Edward H. Bennett, 1982 *Edward H. Bennett, Architect and City Planner, 1874-1954* Edward Herbert Bennett, 1982 *Planning the Twentieth-century American City* Mary Corbin Sies, Christopher Silver, 1996 Arguing that planning in practice is far more complicated than historians usually depict the authors examine closely the everyday social political economic ideological bureaucratic and environmental contexts in which planning has occurred In so doing they redefine the nature of planning practice expanding the range of actors and actions that we understand to have shaped urban development **Pioneers of American Landscape Design** Charles A. Birnbaum, Lisa E. Crowder, 1993 **Architecture and Planning of Graham, Anderson, Probst and White, 1912-1936** Sally A. Kitt Chappell, 1992-06-15 Fascinated by change architectural historians of the modernist generation generally filled their studies with accounts of new developments and innovations In her book Sally A Kitt Chappell focuses instead on the subtler but more pervasive change that took place in the mainstream of American architecture in the period Graham Anderson Probst and White one of the leading American firms of the turn of the century transformed traditional canons and made creative adaptations of standard forms to solve some of the largest architectural problems of their times in railroad stations civic monuments banks offices and department stores Chappell s study shows how this firm exemplified the changing urban hierarchy of the American city in the early twentieth century Their work emerges here as both an index and a reflection of the changing urban values of the twentieth century Interpreting buildings as cultural artifacts as well as architectural monuments Chappell illuminates broader aspects of American history such as the role of public private collaboration in city making the image of women reflected in the specially created feminine world of the department store the emergence of the idea of an urban group in the heyday of soaringly individual skyscrapers and the new importance of electricity in the social order It is Chappell s contention that what people cherish and preserve says more about them than what they discard in favor of the new Working from this premise she considers the values conserved by architects under the pressures of ever changing demands Her work enlarges the scope of inquiry to include ordinary buildings as well as major monuments thus offering a view of American architecture of the period at once more intimate and more substantial than any seen until now Richly illustrated with photographs and plans this volume also includes handsome details of such first rate works as the Thirtieth Street Station in Philadelphia the Cleveland Terminal Group and the Wrigley Building in Chicago *The Birth of City Planning in the United States, 1840-1917* Jon A. Peterson, 2003-09-10 Publisher Description **Chicago's North Michigan Avenue** John W. Stamper, 1991-08-27 Since its opening in the 1920s Chicago s North Michigan Avenue has been one of the city s most prestigious commercial corridors lined by some of its most architecturally distinctive business residential and hotel buildings Planned by Daniel Burnham in 1909 the avenue became

the principal connecting link between downtown and the wealthy residential Gold Coast north of the Loop. Some thirty buildings were constructed along its path in the ten year period before the Depression, an urban expansion comparable in significance to that of Pennsylvania and Park Avenues. John W. Stamper traces the complex development of North Michigan Avenue from the 1880s to the 1920s building boom that solidified its character and economic base, describing the initiation of the planning process by private interests to its execution aided by the city's powerful condemnation and taxation proceedings. He focuses on individual buildings constructed on the avenue including the Renaissance and Gothic inspired Wrigley Building, Tribune Tower and Drake Hotel and places them within the context of factors governing their construction: property ownership, financing, zoning laws, design theory and advertising. Stamper compares this stylistically diverse mixture of low and high rise structures with earlier rejected planning proposals, all of which had prescribed a uniformly designed European like avenue of continuous cornice heights, consistent facade widths and complementary stylistic features. He analyzes the drastically different character the avenue took by 1930 with high rise towers reaching thirty stories and beyond in terms of the clash among economic, political and architectural interests. His argument that the discrepancies between the rejected plans and reality illustrate the developers' choice of economic return on their investment over aesthetic community is extended through to the present avenue and the virtual disregard of the urban qualities proposed at its inception. Generously illustrated with an epilogue condensing the avenue's history between the end of World War II and the present, this is an exhaustive account of an important topic in the history of modern architecture and city planning. **American**

Colonisation and the City Beautiful Ian Morley, 2019-10-30 Winner of the 2020 IPHS Koos Bosma Prize. *American Colonisation and the City Beautiful* explores the history of city planning and the evolution of the built environment in the Philippines between 1916 and 1935. In so doing, it highlights the activities of the Bureau of Public Works Division of Architecture as part of Philippine national development and decolonisation. Morley provides new archival materials which deliver significant insight into the dynamics associated with both governance and city planning during the American colonial era in the Philippines, with links between prominent American university educators and Filipino architecture students. The book discusses the two cities of Tayabas and Iloilo which highlight the significant role in the urban design of places beyond the typical historiographical focus of Manila and Baguio. These examples will aid in further understanding the appearance and meaning of Philippine cities during an important era in the nation's history. Including numerous black and white images, this book is essential for academics, researchers and students of city and urban planning, the history and development of Southeast Asia and those interested in colonial relations. *Encyclopedia of Twentieth Century Architecture* R. Stephen Sennott, 2004. The Chicago Tribune Tower Competition Katherine

Solomonson,2003-11-15 In 1922 the Chicago Tribune sponsored an international competition to design its new corporate headquarters Both a serious design contest and a brilliant publicity stunt the competition received worldwide attention for the hundreds of submissions from the sublime to the ridiculous it garnered In this lavishly illustrated book Katherine Solomonson tells the fascinating story of the competition the diverse architectural designs it attracted and its lasting impact She shows how the Tribune used the competition to position itself as a civic institution whose new headquarters would serve as a defining public monument for Chicago For architects planners and others the competition sparked influential debates over the design and social functions of skyscrapers It also played a crucial role in the development of advertising consumer culture and a new national identity in the turbulent years after World War I

The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design Jon Lang,2020-11-09

The Routledge Companion to Twentieth and Early Twenty First Century Urban Design is a fully illustrated descriptive and explanatory history of the development of urban design ideas and paradigms of the past 150 years The ideas and projects hypothetical and built range in scale from the city to the urban block level The focus is on where the generic ideas originated the projects that were designed following their precepts the functions they address and or afford and what we can learn from them The morphology of a city its built environment evolves unselfconsciously as private and governmental investors self consciously erect buildings and infrastructure in a pragmatic piecemeal manner to meet their own ends Philosophers novelists architects and social scientists have produced myriad ideas about the nature of the built environment that they consider to be superior to those forms resulting from a laissez faire attitude to urban development Rationalist theorists dream of ideal futures based on assumptions about what is good empiricists draw inspirations from what they perceive to be working well in existing situations Both groups have presented their advocacies in manifestoes and often in the form of generic solutions or illustrative designs This book traces the history of these ideas and will become a standard reference for scholars and students interested in the history of urban spaces including architects planners urban historians urban geographers and urban morphologists
