**Changing American Psychiatry** Melvin Sabshin, 2009-02-20 Psychiatrists psychoanalysts other mental health workers behavioral scientists and university medical and neuroscience professionals will benefit from this articulate insider's view of post World War II psychiatry in Changing American Psychiatry A Personal Perspective by Melvin Sabshin M D Dr Sabshin served as Medical Director of the American Psychiatric Association APA for 23 years from 1974 to 1997 during a period of perhaps the greatest change in psychiatry since the World War II produced a dramatic modification of practice The author describes in detail two extraordinary periods of change the first stimulated by laudatory efforts to understand the high rate of psychiatric casualties among World War II veterans and to provide treatment for them Psychiatry grew quickly during the postwar years considerably influenced by the immigration of many Central European psychoanalysts Gradually however psychiatry began to weaken its ties to medicine and lost much of its public respect By the 1970s postwar optimism had been replaced by widespread concern that psychiatric practice was being dominated by unsubstantiated formulations rather than reliable evidence Psychiatry was dramatically impacted by enormous pressure for therapeutic accountability exerted by a managed care reimbursement system The profession recognized the need for a new direction and resolved to change In the foreword to the book current APA Medical Director James H Scully Jr M D notes that Dr Sabshin has woven a personal journey of the history of the intellectual conflicts and changes in the field of psychiatry in the post war era culminating in the remedicalization of psychiatry and the development of the DSM III Dr Sabshin encourages psychiatric professionals to change the field so it can employ an empirically based bio psycho social model that has the potential to revitalize the next phase of American psychiatry He details how the potential for the future of

psychiatry can be enhanced by today's practicing professionals stressing the Need to incorporate the rapid developments of neuroscience into a professional practice that is increasingly integrated with empirically demonstrated psychological and social influences upon mental illness Importance on continued research that is fed back into practice and keeps the professional evidence based Need of psychoanalysis to make its beliefs explicit formulating hypotheses that can be tested scientifically in order to be employed reliably in evidence based practice This well crafted historical account describes how the profession has become a more respected and accountable part of medicine and how its scientific credentials have risen as a result Dr Sabshin concludes that the use of psychological understanding and psychotherapies must play a major role combined with psychopharmacology in the treatment of psychiatric patients
