Brown, 2014-05-12 The *Effective Teaching of Biology* aims

to identify the special dimensions of the subject how it contributes to the curriculum as a whole and why the teaching of biology differs from the teaching of other subjects Current legal and safety requirements are provided together with practical teaching ideas and sources of information The book also covers contemporary issues which are the subject of extensive debate such as the changing patterns of assessment of pupils the use of living organisms in school and the nature of learning difficulties which pupils experience      Secondary School Teaching and Educational Psychology David Galloway, Anne Edwards, 2014-01-21 A companion volume to Primary School Teaching and Educational Psychology this book concerns itself with the day to day business of teaching in a secondary school Throughout the book four themes reoccur that teachers can best understand the development of children by observing their learning and their relationships within school that assessment and evaluation are integral to effective teaching that effective teaching and learning depend on both teacher and child being able to monitor own progress and to find solutions to problems that occur and finally that there must be explicit recognition of the common ground between educational psychology and other disciplines such as sociology philosophy and the history of education      **The Assessment of Special Educational Needs** David M Galloway, Derrick Armstrong, Sally Tomlinson, 2013-12-19 The debate about special needs provision has increased dramatically over the last 15 years however despite the widespread concern over both learning and behavioural difficulties there have been few attempts to analyse in detail the process of assessment by which children are being identified as having special educational needs Drawing upon research carried out by the authors this book fills that gap by examining the process in detail It considers the assessment process itself and how it affects and is affected by other areas of school policy in some cases causing tension and conflict such as parental participation the use and allocation of resources and multi professional decision making A feature of the book is its analysis of the impact of the National Curriculum and the local management of schools LMS provision for special needs      **Effective Teaching of Modern Languages** Colin Wringe, 2014-02-25 This book outlines the aims listed in the National Criteria for Modern Languages which appears in all GCSE language syllabuses It examines the changes these have brought about in course and lesson planning and content and the teaching of the various language skills Detailed descriptions of teaching techniques are provided and each chapter contains a further reading list to help both established and trainee teachers review and develop their classroom practice      *Contemporary Debates in Education* Ron Brooks, 2014-09-25 Did the Thatcher years and their aftermath constitute a revolution or a restoration in education Do they represent a departure from or a reinforcement of tradition Contemporary Debates in Education is a thought provoking volume which reviews the reforms of the eighties and early nineties then follow this with an examination of the long standing issues in education over the last century in order to relate current reforms and changes to their broader historical background so that those with a general or professional interest in education can better understand the process in which they are involved      A Guide to Teaching Practice Louis Cohen, Lawrence Manion, Keith Morrison, 2006-09-07 The fifth

edition of this classic textbook will ensure that it remains one of the most useful and widely read texts for students embarking upon teacher training

*Listening to Spoken English* Gillian Brown, 2017-09-19 For those who are familiar with the first edition it will be convenient to have some indication of where the main changes lie Chapter one has been largely rewritten to give an outline of current approaches to a model of comprehension of spoken language Chapter two has a new initial section but otherwise remains as it was Chapter three incorporates a new section on pause and how this interacts with rhythm and rather more on the function of stress Chapter four has an extended initial section but otherwise remains largely as it was Chapter five on intonation contains several sections which have been rewritten to varying extents Chapter six of the first edition has disappeared in 1977 very little work had been published on fillers and it seemed worthwhile incorporating a chapter that sat rather oddly with the phonetic phonological interests of the rest of the book Not that there is a great industry of descriptions of the forms and functions of these and similar phenomena there seems no reason to retain this early but admittedly primitive account The chapter on paralinguistic vocal features now chapter six has some rewriting in the early part but considerable rewriting in the last sections The final chapter on teaching listening comprehension has grown greatly in length It still incorporates some material from the original chapter but most of it is completely rewritten
