**Parents as Educators** Keith J. Topping, 2025-08-05 Modern practice in the 1980s was to involve parents increasingly in the education of their children and was supported by legislation Particularly when children had special needs parents required structured training and support to ensure they affectively sustained their vital role as educators at home Many large scale programmes to provide this had been developed throughout the world at the time for example Home Start Portage Home Visiting Projects and Paired Reading Projects However not all of these had been thoroughly evaluated and the existing literature was scattered and difficult to access Some projects demonstrated spectacular results and high cost effectiveness while others proved more disappointing Originally published in 1986 this book critically analyses over 600 international English language research reports on the effectiveness of parent training programmes In addition a detailed guide to the practicalities of planning projects is provided together with a comprehensive directory of useful resource materials After an introductory overview the evidence on the effects on child progress of parental involvement in school activities is reviewed as is research on the impact of schemes of regular structured communication between home and school Programmes designed to train parents to accelerate the development of their children at home are considered in the subsequent chapters starting with ordinary children Much of the book reviews projects targeted on children with some sort of special educational need from children whose special needs stem from a widespread difficulty such as poverty or second language learning systematically through to children whose needs stem from rarer and more severe issues Each chapter has its own summary for ease of reader use while an overall summary chapter points out best buys and directions for future developments This volume will be of major interest to teachers psychologists social workers community health personnel community educationalists researchers many others working with parents and children and to some parents themselves This book is a re issue originally published in 1986 The language used is a reflection of its era and no offence is meant by the Publishers to any reader by this re publication

**Becoming Good Parents** Mufid James Hannush, 2012-02-01 Becoming Good Parents goes beyond a psychological understanding of parenting

to include a deeper explication of the philosophical moral and existential spiritual dimensions of parenting It counters the contemporary notion that parents can be satisfied with simply being good enough in their parenting practices which encourages a sense of complacency Through everyday examples illustrative use of Harper Lee s moral novel To Kill a Mockingbird and a reinterpretation of the theoretical viewpoints of psychologists Erik Erikson Heinz Kohut and Rollo May along with philosophers Iris Murdoch and Michael Gelven the author argues that the struggle toward perfection goodness is a natural human impulse Parenting provides an optimal context for the practice of character refinement which can potentially contribute to the psychological and spiritual growth of both parents and children Ultimately the book demonstrates that by becoming good parents we become good persons

*Responsible Parents and Parental Responsibility* Rebecca Probert,Stephen Gilmore,Jonathan Herring,2009-05-06 This book examines the idea of parental responsibility in English law and what is expected of a responsible parent The scope of parental responsibility a key concept in family law is undefined and often ambiguous Yet to date more attention has been paid to how individuals acquire parental responsibility than to the question of the rights powers duties and responsibilities they have once they obtain it This book redresses the balance by providing the first sustained examination of the different elements of parental responsibility bringing together leading scholars to comment on specific aspects of its operation The book begins by exploring the conceptual underpinnings of parental responsibility in the context of parents and children s rights The analysis highlights the inherent constraints and limitations of parental responsibility and how its scope has deliberately been curtailed in certain contexts The book then considers what parental responsibility allows and requires in specific areas for example naming a child education religious upbringing medical treatment corporal punishment dealing with any contracts entered into or property owned by the child representing the child in legal proceedings consenting to a child s marriage or civil partnership and the law s response to the death of a child In the final section the idea of the responsible parent is considered in the contexts of child support contact tort and criminal law This title is included in Bloomsbury Professional s Family Law online service

*Parental Responsibility, Young Children and Healthcare Law* Jo Bridgeman,2007-04-19 This book provides a comprehensive examination of the legal regulation of the provision of healthcare to young children in England and Wales A critical analysis is given on the law governing the provision of healthcare to young and dependent children identifying an understanding of the child as vulnerable and in need of protection including from his or her own parents The argument is made for a conceptual framework of relational responsibilities which would ensure that consideration is given to the needs of the child as an individual to the experiences of parents gained as they care for their child and that the wider context such as

attitudes towards disability public health issues or the support and resources available is examined This book makes an important contribution to understanding the law regulating the provision of healthcare to young and dependent children and to the development of a discourse of responsibility      *Raising a Responsible Child*: Elizabeth Ellis,1996-01-01 It has often been said Give a man a fish and he has food for a day Teach him to fish and he can provide for himself over a lifetime Raising a Responsible Child explains the phenomenon of the overindulgent parent who helps and protects too much and the underdeveloped child who never really learns to stand on his or her own feet Today many parents are especially prone to shower their children with love and attention and attempt to minimize stress by doing for them In the scurry of modern life parents often can't resist giving in to children's demands or solving their problems just to keep the peace While this is basically a loving approach it does not teach children how to be responsible and independent Parents learn the hard way that their overindulgence does more harm than good their children will only come to them with more demands and act helpless in the face of new problems If you find yourself entrenched in this pattern you can change by using a system of consistent straight forward and logical rules every day You can teach your children to take responsibility for their actions and earn their privileges and you will find perhaps to your surprise that they are willing and ready to do so Some of the issues this book will help you to deal with are The whiny and overly demanding preschooler The small child who throws tantrums in public to get his way The older child who is inconsiderate of family members The teenager who is constantly late for school The young adult who can't get her life together and mooches off her parents indefinitely Many parents discover that the tried and true methods detailed here not only help their children handle emotions in a more mature and constructive manner but also result in higher self esteem and a happier outlook on life      The Parenting Skills Treatment Planner, with DSM-5 Updates David J. Berghuis,Sarah Edison Knapp,2015-07-31 This timesaving resource features Treatment plan components for 31 behaviorally based presenting problems Over 1 000 prewritten treatment goals objectives and interventions A step by step guide to writing treatment plans that meet the requirements of most insurance companies and third party payors The Parenting Skills Treatment Planner provides all the elements necessary to quickly and easily develop formal treatment plans that satisfy the demands of HMOs managed care companies third party payors and state and federal review agencies A critical tool for mental health professionals addressing today's complex family structures and the increased pressures on children and adolescents from school peers and the general culture Saves you hours of time consuming paperwork yet offers the freedom to develop customized treatment plans for parents and other caregivers Organized around 31 main presenting problems with a focus on giving parents the skills they need to effectively help their children navigate contemporary issues such as the trauma associated with divorce school pressures and sexual abuse Over 1 000 well crafted clear statements describe the behavioral manifestations of each relational problem long term goals short term objectives and clinically tested treatment options Easy to use reference format helps locate treatment plan components by behavioral problem Includes a sample

Bornstein, 2005-02-16 Despite the fact that most people become parents and everyone who has ever lived has had parents parenting remains a mystifying subject about which almost everyone has opinions but about which few people agree Striking permutations on the theme of parenting are emerging single parenthood blended families lesbian and gay parents and teen versus fifties first time moms and dads Divided into four volumes the Handbook of Parenting is concerned with different types of parents basic characteristics of parenting forces that shape parenting problems faced by parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny volume 1 concerns how children influence parenting Volume 2 relates parenting to its biological roots and sets parenting in its ecological framework Volume 3 distinguishes among the cast of characters responsible for parenting and is revealing of the psychological make ups and social interests of those individuals Volume 4 describes problems of parenting as well as the promotion of positive parenting practices Written to be read and absorbed in a single sitting each chapter addresses a different but central topic in parenting and is rooted in current thinking and theory as well as classic and modern research on that topic All chapters follow a standard organization including an introduction to the chapter as a whole

followed by historical considerations of the topic a discussion of central issues and theory a review of classic and modern research forecasts of future directions for theory and research and a conclusion In addition to considering their own convictions and research the chapter contributors present and broadly interpret all major points of view and central lines of inquiry
