Regionalism Contested Henrik Halkier, 2016-12-05 As we move further into the 21st century the prominence of regions can no longer be taken for granted A certain skepticism has developed with regard to the feasibility of marginal regions achieving self sustained growth and states have maintained their role as regulators of economic and social activities Thus the notion of the region and its significance is currently much debated and contested Illustrated with a wide range of European case studies this volume brings together the main strands of these contestations as economic political and social actors attempt to institutionalise their vision of their region as the dominant form of territorial governance It questions both the external delimitation and the internal constitution of regions and critically analyses the societal processes circumscribing ways in which regions are created maintained and undermined The volume provides a wide range of analytical perspectives to enable an understanding of the current mosaic of regionalism in Europe

Transnational Financial Associations and the

Governance of Global Finance Heather McKeen-Edwards, Tony Porter, 2013-02-11 The role of business in global governance is now widely recognized but exploration of its role in global financial governance has been more haphazard than systematic This book provides the first comprehensive analysis of the role of transnational financial associations TFAs in the organization of global finance This book develops three theoretical themes of assemblage functionality and power as enrolment These themes challenge approaches that treat financial power as emanating from a single location or force Whilst existing approaches tend to treat TFAs as irrelevant or as merely transmitting power originating elsewhere this book argues that power must be created by painstakingly assembling actors networks and objects that are often quite autonomous and working at cross purposes to one another a process in which TFAs play a central role The book explores these themes in chapters examining the roles of TFAs in interacting with public authorities constructing global financial markets and creating financial communities The authors additionally analyse the roles of TFAs in the European Union in the Global South and in promoting goals other than profitability including Islamic finance microfinancing savings banks and cooperatives Making a distinctive contribution to our understanding of global finance and global governance Transnational Financial Associations and the Governance of Global Finance is an important book for students and scholars of international political economy finance global governance and international relations

The Effectiveness of European Union Environmental Policy W. Grant, D. Matthews, P. Newell, 2000-10-25 Several hundred directives on environmental policy have

been produced by the European Union What impact has the output of the legislative factory had After considering how decisions on environmental policy in the EU are made and the balance of power between business and environmental interests this book draws on the specialist expertise of the authors to look in depth at the areas of global warming water pollution and air pollution Legislative Lobbying in Context Jan Beyers, Caelesta Braun, Heike Klüver, 2017-10-02 The lack of previous research into political interest groups and taking into account policy specific and institutional context characteristics is largely due to research designs that have been primarily focused on a small number of policy debates with the result that contextual characteristics were largely held constant This book brings together articles from different modules that are part of a larger European Collaborative Research Project INTEREURO carried out by research teams in nine different countries under the auspices of the European Science Foundation The main goal of the book is to analyse strategies framing and influence processes for a set of 125 legislative proposals submitted by the European Commission in an effort to better understand the involvement of interest organizations in the decision making process of the EU Contributors draw on sophisticated and innovative policy driven samples of interest group mobilization allowing them to account systematically for how policy specific and institutional context factors shape mobilization lobbying strategies and influence of interest groups on public policy debates in the EU In this way the book makes an important contribution to the study of interest groups in the EU and represents the breadth of positions taken in the current literature This book was originally published as a special issue of the Journal of European Public Policy **Character is Destiny** Pehr

Gyllenhammar, 2020-05-15 Character is Destiny provides a rare and unique glimpse into Pehr Gyllenhammar's professional triumphs and failures and his successful efforts to shape industry in Europe most notably with his creation of the European Roundtable of Industrialists which revitalized Europe's infrastructure through projects like the France England Channel Tunnel Character is Destiny also provides a window into his friendships with some of the great luminaries of the world It is equal parts history politics and Gyllenhammar's own personal philosophy the foundational elements of his life have always been humanism a fierce commitment to integrity and truth and a deeply rooted respect and admiration for the working class The author of six previous books published in Sweden for the first time Gyllenhammar has chosen to create an original English language book in concert with an American editor/writer The resulting work is directly relevant to the English language reader and Character is Destiny offers his own wisdom as to what people must do if they hope to see a future in which global business and democracy will survive Good CEO Bad CEO Mastering the Art of Effective CEO Management & Transforming CEO Bad Habits into Good Practices Author Researched, Edited, Compiled.
