Efficiency and Uplift Samuel Haber, 1964 **F. W. Taylor** John Cunningham Wood, Michael C. Wood, 2002 Following the volumes on Henri Fayol this next mini set in the series focuses on F W Taylor the initiator of scientific management Taylor set out to transform what had previously been a crude art form into a firm body of knowledge The New Progressive Era Peter Levine, 2000-01-12 A century ago Americans launched a period of civic renewal and political reform Today amid deep dissatisfaction with our major institutions there are signs that a new movement may revive the spirit of the original Progressive Era Peter Levine draws inspiration from the great Progressive leader Robert M La Follette Sr and his circle which included John Dewey Jane Addams and Louis Brandeis He discusses the shortcomings of this group as well as their successes but he argues that their ideal of a fair and deliberative democracy is right for our time Combining their philosophy and experience with the best contemporary proposals Levine advocates campaign finance reform an entirely different approach to regulation new styles of journalism and civic education and fundamental changes in the tax system Combining philosophical arguments historical background empirical data and concrete proposals The New Progressive Era offers today's most comprehensive plan for civic renewal and political reform **Progress** Leo Marx, Bruce Mazlish, 2025-10-01 Progress perhaps the fundamental secular belief of modern Western society has come under heavy fire recently because after three centuries advances in science and technology seem increasingly to bring problems in their wake alienation environmental degradation the threat of nuclear destruction The idea of progress is brought into question by postmodern critique attacking the notion of science as truth Yet no other meaningful organization of humankind's sense of time looms on the horizon This volume seeks to reassess the meaning and prospects of the idea of progress Looking toward the millennium the volume seeks to evaluate the idea's worth both in theory is it intellectually viable and defensible today and practice even if theoretically defensible is the idea undermined in actual life Approaching these questions from the perspectives of science anthropology economics religion political philosophy feminism medicine environmental studies and the Third World the contributors all distinguished scholars provide a unique and critical balance Ultimately the contributors find that progress is both a fact and an illusion it does occur in certain areas but it does not sweep all before it as its Enlightenment votaries thought it would This foundational idea permeates discourse in the natural and social sciences as well as the humanities and will engage historians students of the history of science and technology sociologists political scientists philosophers literary scholars and art critics as well as those interested in civilization in general Contributors include Jill Ker Conway Zhiyuan Cui Leon Eisenberg Robert Heilbroner Gerald Holton Leo Marx Bruce Mazlish Ali A Mazrui Alan Ryan John M Staudenmaier George W Stocking Jr and Richard White A discerning reconsideration of the idea of progress in a variety of carefully defined theoretical and empirical historical contexts David Hollinger University of California Berkeley Leo Marx is Professor of American Cultural History Emeritus Massachusetts Institute of Technology Bruce Mazlish is Professor of History Massachusetts Institute of Technology

Not So Fast Doug Hill, 2016-10-15 There's a well known story about an older fish who swims by two younger fish and asks "How's the water?" The younger fish are puzzled and ask "What's water?" They ask many of us today might ask a similar question "What's technology?" Technology defines the world we live in yet we're so immersed in it so encompassed by it that we mostly take it for granted. Seldom if ever do we stop to ask what technology is. Failing to ask that question we fail to perceive all the ways it might be shaping us. Usually when we hear the word technology we automatically think of digital devices and their myriad applications. As revolutionary as smartphones, online shopping and social networks may seem, however they fit into long standing, deeply entrenched patterns of technological thought as well as practice. Generations of skeptics have questioned how well served we are by those patterns of thought and practice even as generations of enthusiasts have promised that the latest innovations will deliver us soon to Paradise. We're not there yet but the cyber utopians of Silicon Valley keep telling us it's right around the corner. What is technology and how is it shaping us? In search of answers to those crucial questions *Not So Fast* draws on the insights of dozens of scholars and artists who have thought deeply about the meanings of machines. The book explores such dynamics as technological drift, technological momentum, technological disequilibrium and technological autonomy to help us understand the interconnected, interwoven and interdependent phenomena of our technological world. In the course of that exploration Doug Hill poses penetrating questions of his own among them: Do we have as much control over our machines as we think? And who can we rely on to guide the technological forces that will determine the future of the planet?

Habits of the Heart Robert Neelly Bellah, 1985 Based on conversations with hundreds of Americans, this volume reveals the self-understanding of Americans as a people and as a nation.

The Culture of Feedback Daniel Belgrad, 2019-08-30 When we want advice from others we often casually speak of getting some feedback. But how many of us give a thought to what this phrase means? The idea of feedback actually dates to World War II when the term was developed to describe the dynamics of self-regulating systems which correct their actions by feeding their effects back into themselves. By the early 1970s feedback had become the governing trope for a counterculture that was reoriented and reinvigorated by ecological thinking. *The Culture of Feedback* digs deep into a dazzling variety of left-of-center experiences and attitudes from this misunderstood period, bringing us a new look at the wild side of the 1970s. Belgrad shows us how ideas from systems theory were taken up by the counterculture and the environmental movement, eventually influencing a wide range of beliefs and behaviors particularly related to the question of what is and is not intelligence. He tells the story of a generation of Americans who were struck by a newfound interest in and respect for plants, animals, indigenous populations and the very sounds around them, threading his tapestry with cogent insights on environmentalism, feminism, systems theory and psychedelics. *The Culture of Feedback* repaints the familiar image of the 70s as a time of Me Generation malaise to reveal an era of revolutionary and hopeful social currents driven by desires to radically improve and feed back into the systems that had come before.

actors bureaucrats and members of Congress Thus argues Johnson the New Deal was not a decisive break with the past but rather a superstructure built on a foundation that emerged during the Gilded Age and the Progressive Era Her evidence draws on an analysis of 131 national programs enacted between 1877 and 1930 a statistical analysis of these programs and detailed case studies of three of them the Federal Highway Act of 1916 the Food and Drug Act of 1906 and the Sheppard Towner Act of 1921 As this book shows federalism has played a vital but often underappreciated role in shaping the modern American state Politics of Development H.V. Nelles,2005-07-20 The Carleton Library Series returns this classic in political economy and Canadian historical writing to print with a new introduction by Robert Young The Politics of Development reveals the full extent of state involvement in the exploitation of natural resources in the province of Ontario and the reciprocal impact resource development has had in shaping politics in the province H V Nelles offers a revised staples interpretation exposing the resource politics at the heart of central Canadian economic development He explains the business history of the forestry and mining industries from the mid nineteenth through the mid twentieth century stressing the importance of public policy in their development He offers a definitive interpretation of the emergence development and political dynamics of public ownership within the hydro electric sector Considered one of the seminal works on Canadian political economy The Politics of Development still has important things to say about public policy and will be of interest to historians political scientists economists and those interested in environmental history **Enterprise and American Law, 1836-1937** Herbert Hovenkamp,2009-06-01 In this integration of law and economic ideas Herbert Hovenkamp charts the evolution of the legal framework that regulated American business enterprise from the time of Andrew Jackson through the first New Deal He reveals the interdependent relationship between economic theory and law that existed in these decades of headlong growth and examines how this relationship shaped both the modern business corporation and substantive due process Classical economic theory the cluster of ideas about free markets became the guiding model for the structure and function of both private and public law Hovenkamp explores the relationship of classical economic ideas to law in six broad areas related to enterprise in the nineteenth and early twentieth centuries He traces the development of the early business corporation and maps the rise of regulated industry from the first charterbased utilities to the railroads He argues that free market political economy provided the intellectual background for constitutional theory and helped define the limits of state and federal regulation of business behavior The book also illustrates the unique American perspective on political economy reflected in the famous doctrine of substantive due process Finally Hovenkamp demonstrates the influence of economic theory on labor law and gives us a reexamination of the antitrust movement the most explicit intersection of law and economics before the New Deal Legal economic and intellectual historians and political scientists will welcome these trenchant insights on an influential period in American constitutional and corporate history Red Scare Regin Schmidt,2000 The anticommunist crusade of the Federal Bureau of Investigation did not start with the Cold War Based on
