BOOK JACKET Corpus of Reliefs of the New Kingdom from the Memphite Necropolis and Lower Egypt Geoffrey Thorndike Martin, 2023-03-17 One of the remarkable anomalies of Egyptian History is that the source material for the study of one of the country's principal settlements sites and one of the greatest cities of antiquity Memphis is comparatively scarce The Memphite cemeteries however have yielded up masses of material particularly for the Archaic Period and the Old Kingdom In the New Kingdom with which we are concerned in this volume Memphis was a city of immense administrative and cultural importance as well as being the seat of the royal court and there seems little reason to doubt that many of the great officials and courtiers of the Eighteenth Nineteenth and to some extent the Twentieth Dynasties were buried in Saqqara the Memphite necropolis

Proportion and Style in Ancient Egyptian Art Gay Robins,2010-07-05 This study of ancient Egyptian art reveals the evolution of aesthetic approaches to proportion and style through the ages The painted and relief cut walls of ancient Egyptian tombs and temples record an amazing continuity of customs and beliefs over nearly 3 000 years Even the artistic style of the scenes seems unchanging but this appearance is deceptive In this work Gay Robins offers convincing evidence based on a study of Egyptian usage of grid systems and proportions that innovation and stylistic variation played a significant role in ancient Egyptian art Robins thoroughly explores the squared grid systems used by the ancient artists to proportion standing sitting and kneeling human figures This investigation yields the first chronological account of proportional variations in male and female figures from the Early Dynastic to the Ptolemaic periods Robins discusses the proportional changes underlying the revolutionary style instituted during the Amarna Period She also considers how the grid system influenced the overall composition of scenes Numerous line drawings with superimposed grids illustrate the text
