Enzymes Dependent on Pyridoxal Phosphate and Other Carbonyl Compounds as Cofactors T. Fukui, 2013-10-22 This volume is a summary of the proceedings of the 8th International Symposium on Vitamin B6 and Carbonyl Catalysis held in Osaka Japan 15-19 October 1990. The development of molecular biology and x-ray crystallography techniques have contributed greatly to the knowledge and understanding of PLP-dependent enzymes. The structural, mechanistic and functional aspects of the PLP-dependent enzymes have been studied for over 40 years by many active researchers. Recent evidence indicates that the coenzyme is substituted by the pyruvoyl group which is a reactive carbonyl in some amino acid decarboxylases and the presence of pyrroloquinoline quinone (PQQ), another carbonyl coenzyme, in other enzymes. The contents of this volume attest to the exciting progress in elucidating the structure, mechanism of action and the function of enzymes dependent on coenzymes containing the carbonyl group.

Polyamine Drug Discovery Patrick M. Woster, Robert Anthony Casero, 2012 This is the first comprehensive description of the discovery and therapeutic potential of polyamine drugs.

Biochemistry of Vitamin B6 and PQQ G. Marino, G. Sannia, F. Bossa, 2012-12-06 The International Meeting on Vitamin B6 and Carbonyl Catalysis took place on Capri, Italy, from 22nd to 27th May 1994 and was organized in conjunction with the 3rd Symposium on PQQ and Quinoproteins. It was an extraordinary occasion for scientists from all over the world to meet and discuss new developments in these overlapping fields. Several sessions were dedicated to the molecular aspects of Vitamin B6 and Quinone-dependent enzymes as well as to the cellular, biomedical and nutritional aspects. The congress was inaugurated by Paolo Fasella in his capacity as General Director of Science Research and Development of the Commission of the European Communities with an overview on International Scientific Collaboration. The scientific sessions started with a talk on the History of Vitamin B6 given by David Metzler who at the very last minute presented Esmond Snell's paper adding some personal remarks. Unfortunately, both Esmond Snell and Alton Meister had to unexpectedly cancel the trip to Capri. These proceedings contain the papers presented as oral contributions and a few selected poster presentations. The limited number of pages meant we could not publish many interesting poster presentations including those selected for the three lively and exciting evening poster discussion sessions called by the organizers.

Carbohydrate Bioengineering S.B. Petersen, B. Svensson, S. Pedersen, 1995-12-08 The Carbohydrate Bioengineering Meeting held in Elsinore, Denmark, April 23-26, 1995, gathered 230 scientists mostly from Europe with interest in carbohydrate analysis and structure, carbohydrates in medicine and glycopathology, structure, function, application and protein engineering of carbohydrate-active enzymes, oligo and polysaccharides of industrial interest and production of carbohydrate-containing new materials. The first chapters address glycoconjugates as modulatory and recognition molecules, structure determination using NMR and mass spectrometry and microdialysis chip, enzyme-based sensors, active site mutations coupled with crystal structures and synthetic substrate analogue interactions as well as new three-dimensional structures and binding domains.

1990 and Capri Italy 1996 For the first time in the history of these symposia the international meeting was held in the United States from October 31 through November 5 1999 in Santa Fe New Mexico The scientific program focus shifted significantly beyond the original emphasis on catalysis to aspects such as cellular and genetic regulation of events involving proteins that require pyridoxal phosphate or quinoproteins The growing awareness of the involvement of these proteins in biotechnology processes and fundamental physiological events as well as their implication in diseases was also represented with emphasis on the molecular basis of these events The meeting was symposium S278 sponsored by the International Union of Biochemistry and Molecular Biology IUBMB
