Epas Pesticide Fact Sheet Database:

EPA'S Pesticide Fact Sheet Database Lawrence H. Keith, Mary Walker, 1992-04-30 EPA's Pesticide Fact Sheet Database presents a comprehensive source of information on several hundred pesticides and pesticide formulations. Pesticides are quickly and easily located using keywords that describe criteria under which the pesticides can be found. On line help screens facilitate your access of key features in the database. Reports automatically print to paper or disk files on command putting critical information at your fingertips within seconds. The database is available on 3.5 and 5.25 diskettes and can be used on IBM or IBM compatible equipment. DOS 2.0 or higher, 640k internal memory, RAM and a hard drive with 5MB of available disk space are required to run the program. Twelve critical technical areas are covered in addition to the address and telephone number of an EPA contact for every chemical. These technical areas include the following: Chemical Descriptors which include chemical name, CAS Number, synonyms and trade names, year of registration and U.S. and foreign producers; Use Patterns and Formulations which include application sites, methods and rates of application; Chemical Characteristics which includes molecular weight and formula, m.p., b.p., solubility, vapor pressure and stability; Acute Toxicological Data which includes LD 50 data for oral, dermal and inhalation routes of exposure, skin and eye irritation and sensitization; Chronic Toxicological Data including oncogenicity, teratogenicity, mutagenicity and reproductive effects; Physiological and Biochemical Characteristics which includes mechanism of pesticide action, metabolism and foliar absorption; Environmental Characteristics which includes hydrolysis, photodegradation, aerobic and anaerobic metabolism, mobility, volatility and bioaccumulation; Ecological Characteristics including avian, fish, freshwater invertebrate toxicology and honey bee acute contact toxicology; Tolerance Assessments for Agricultural Crops including corn, wheat and nuts; Regulatory Position and Rational Summaries; Required Labeling Regulations and Restrictions; and Major Data Gap Summaries. EPA's Pesticide Fact Sheet Database will be invaluable to environmental consultants, agriculture specialists, toxicologists, industrial hygienists, pesticide worker unions, lawyers and regulators, entomologists, ecologists and pesticide chemists.

EPA's Pesticide Fact Sheet Database Mary M. Walker, 1992 **Pesticide Profiles** Michael A. Kamrin, 1997-03-12 *Pesticide Profiles: Toxicity, Environmental Impact and Fate* is like three books in one: it is a profile containing specific information about 137 pesticides, a primer of environmental toxicology and an extensive trade name index. Profiles of each pesticide contain regulatory information, toxicity assessments, environmental fate data, physical properties and acceptable exposure limit values. What these values and data mean in terms of human toxicity is clearly interpreted as well. The book also describes the meaning of carcinogenicity and how it is assessed in non-technical terms the non-expert can understand. Readers with a technical background are provided with the data to make their own judgments. In addition to information about specific pesticides, there are sections on general classes of pesticides such as organophosphates. This information allows readers to make inferences about any pesticide in a class even if a profile is not provided. *Pesticide Profiles: Toxicity, Environmental Impact and*

Fate goes beyond the usual listings of toxicity values or environmental half lives to offer a broad understanding to readers of various backgrounds and interests

With a food safety focus a scientific literature review was conducted to characterize the current understanding about the effects of pesticide residues on the human gut microbiome and potential implications on human health and non communicable diseases NCDs

The main aspects analysed are 1 effects of individual or combined pesticides on the composition diversity and function of gut microbiome using in vivo or in vitro models 2 health implications resulting from the pesticide microbiome interactions and underlying mechanisms 3 establishment of causality and 4 influence of the gut microbiome on the metabolism and bioavailability of pesticides

The research was also scoped to identify current gaps limitations and needs for the eventual consideration of microbiome related data in chemical risk assessment

With this work ESF contributes to the FAO global programme on the impact of food systems on NCDs and obesity by understanding the potential health implications of gut microbiome pesticide interactions

The outcomes will provide information which can be used to improve nutritional strategies and food safety policies

Gulf War and Health Volume 2 is the second in a series of congressionally mandated studies by the Institute of Medicine that provides a comprehensive assessment of the available scientific literature on potential health effects of exposure to certain biological chemical and environmental agents associated with the Gulf War

In this second study the committee evaluated the published peer reviewed literature on exposure to insecticides and solvents thought to have been present during the 1990 1991 war

Because little information exists on actual exposure levels a critical factor when assessing health effects the committee could

not draw specific conclusions about the health problems of Gulf War veterans However the study found some evidence although usually limited to link specific long term health outcomes with exposure to certain insecticides and solvents The next phase of the series will examine the literature on potential health effects associated with exposure to selected environmental pollutants and particulates such as oil well fires and jet fuels
