Ephemeral Portable Architecture:

Ephemeral/portable Architecture Robert Kronenburg,1998 *Ephemeral/portable Architecture* Maggie Toy,1998

Portable Architecture Robert Kronenburg,2008-05-16 This book discusses the forerunners present context and technology of portable architecture It documents numerous international examples organized by areas of application and offers a broad array of suggestions for practical design *Architecture, City, Environment* Koen Steemers,Simos Yannas,2000 PLEA is a network of individuals sharing expertise in the arts sciences planning and design of the built environment It serves as an international interdisciplinary forum to promote discourse on environmental quality in architecture and planning This 17th PLEA international conference addresses sustainable design with respect to architecture city and environment at the turn of the millennium The central aim of the conference is to explore the interrelationships and integration of architecture city and environment The Proceedings will be of interest to all those involved in bioclimatic design and the application of natural and innovative techniques to architecture and planning The conference is organised by the Martin Centre for Architectural and Urban Studies University of Cambridge and the Cambridge Programme for Industry University of Cambridge *Ethics and the Practice of Architecture* Barry Wasserman,Patrick J. Sullivan,Gregory Palermo,2000-03-07 From theory to practice a unique well rounded guide to ethics for today's architect How does an architect assist a community in evaluating alternative designs Resolve a dispute with a contractor Take into account a project's impact on the natural environment When it comes to questions like these making decisions about what ought to be done or what is the best or right solution requires more than sound technical knowledge and strong design talent It demands a solid understanding of the ethical issues that lie at the heart of architectural practice *Ethics and the Practice of Architecture* offers a complete broad based introduction to this crucial subject First it examines basic ethical theories and their application to architecture and discusses different ways of identifying ethical content in architecture Bridging the gap between theory and practice the second part of the book surveys different professional settings and building project processes that frequently hold ethical concerns and charts the ethical mandates that arise from them In the final section of the book thirty case studies explore a wide range of ethical dilemmas encountered in architectural practice with useful guidance on how to work through them effectively Arranged by topics that span the key phases of a project from pre design through post occupancy evaluation these case studies allow a detailed look at ethical concerns in real life situations where multiple issues are often at stake Providing a practical framework for the exploration of ethical issues in architecture today *Ethics and the Practice of Architecture* is an excellent resource for present and future architects in all areas of the field **Transportable**

Architecture in Motion Robert Kronenburg, 2013-08-15 The idea that architecture can be portable is one that grabs the imagination of both designers and the people who use it perhaps because it so often forecasts a dynamic and creative solution to the complex problems of our contemporary mobile society while at the same time dealing with issues of practicality economy and sustainability *Architecture in Motion* examines the development of portable transportable demountable and temporary architecture from prehistory to the present day From familiar vernacular models such as the tent mobile home and houseboat to ambitious developments in military and construction engineering all aspects of portable building are considered Building on his earlier

works *Portable Architecture and Houses in Motion* Robert Kronenburg compares traditional forms of building current commercial products and the work of innovative designers and examines key contemporary portable buildings to reveal surprising exciting and imaginative examples He explores the philosophical and technological issues raised by these experimental and futuristic prototypes By understanding the nature of transitory architecture a new ecologically aware design strategy can be developed to prioritise buildings that tread lightly on the earth and still convey the sense of identity and community necessary for an established responsible society This book provides a unique insight into this pivotal field of design *exlibris* Giovanni Corbellini, 2022-05-18 Architects write a lot especially now when conceptual aspects have become central in the advanced reflections and narrative forms increasingly intersect the quest of design practices for an ultimate legitimization In the growing mass of the publishing offer these keywords try to highlight recurrent issues tracking synthetic paths of orientation between different critical positions with particular attention to what happens in the neighbouring fields of the arts and sciences *Festival Architecture* Sarah Bonnemaïson, Christine Macy, 2007-12-06 With contributions from provocative art and architectural historians this book is a unique exposition of the temporary architecture erected for festivals and the role it has played in developing Western architectural and urban theory *Festival Architecture* is arranged in historical periods from Antiquity to the modern era and divided between analyses of specific festivals set in relation to contemporary architecture and urban design ideas and theories Illustrated with a wealth of unusual and rarely seen images from the European festival tradition this is a fascinating outline of the history of festival architecture ideal for postgraduate architecture and urban design students **Sustainable Mediterranean Construction. Sustainable Environment in the Mediterranean Region: from Housing to Urban and Land Scale Construction** Paola De Joanna, Dora Francese, 2012 **More Mobile** Jennifer Siegal, 2008-09-19 The allure of mobile portable architecture is worldwide and centuries old From the desert tents of the Bedouin to the silvery capsules of the Airstream trailer mobile architecture has inspired designers with its singular characteristics of lightness transience and practicality In *More Mobile* the follow up to her groundbreaking 2002 book *Mobile* Jennifer Siegal explores the ever growing range of possibilities of portable demountable structures From serious Refuge Wear to the playful Bar Rectum and the practical Kunsthallen *More Mobile* explores the working methods and finished work of the most exciting contemporary designers and presents today's most dynamic active mobile structures in beautiful color images detailed drawings and thoughtful text Contributors include Studio Orta Dr Wapenaar Andrea Zittel Andrew Maynard Andreas Vogler Horden Cherry Lee Architects N55 Atelier Bow Wow Mark Fisher Studio MMW LOT EK and the Office of Mobile Design A foreword by Jude Stewart discusses life on the move while an introduction by William J Mitchell considers the house as a robot in which to live *Dwell*, 2002-12 At *Dwell* we're staging a minor revolution We think that it's possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is

an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines

Type & Typography Phil Baines, Andrew Haslam, 2005 Providing an essential grounding for both students and professionals this text takes readers through every aspect of typography from the history of language and writing systems to the invention of moveable type and the evolution of the digital systems of today *The Routledge Companion for Architecture Design and Practice* Mitra Kanaani, Dak Kopec, 2015-11-06 The Routledge Companion for Architecture Design and Practice provides an overview of established and emerging trends in architecture practice Contributions of the latest research from international experts examine external forces applied to the practice and discipline of architecture Each chapter contains up to date and relevant information about select aspects of architecture and the changes this information will have on the future of the profession The Companion contains thirty five chapters divided into seven parts Theoretical Stances Technology Sustainability Behaviorism Urbanism Professional Practice and Society Topics include Evidence Based Design Performativity Designing for Net Zero Energy The Substance of Light in Design Social Equity and Ethics for Sustainable Architecture Universal Design Design Psychology Architecture Branding and the Politics of Identity The Role of BIM in Green Architecture Public Health and the Design Process Affordable Housing Disaster Preparation and Mitigation Diversity and many more Each chapter follows the running theme of examining external forces applied to the practice and discipline of architecture in order to uncover the evolving theoretical tenets of what constitutes today's architectural profession and the tools that will be required of the future architect This book considers architecture's interdisciplinary nature and addresses its current and evolving perspectives related to social economic environmental technological and globalization trends These challenges are central to the future direction of architecture and as such this Companion will serve as an invaluable reference for undergraduate and postgraduate students existing practitioners and future architects

Mechanisms of Exchange, 2013-04-15 Featuring eight innovative studies by prominent scholars of medieval art and architecture this special issue of *Medieval Encounters* examines the specific means by which art and architectural forms techniques and ideas were transmitted throughout the medieval world ca 1000 1500 While focusing on the Mediterranean region the collection also includes essays that expand this geographic zone into a cultural and artistic one by demonstrating contact with near and distant neighbors thereby allowing an expanded understanding of the interconnectedness of the medieval world The studies are united by a focus on the specific mechanisms that enabled artistic and architectural interaction as well as the individuals who facilitated these transmissions Authors also consider the effects and collaboration of portable and monumental arts in the creation of intercultural artistic traditions Contributors are Justine Andrews Maria Georgopoulou Ludovico Geymonat Heather E Grossman Eva Hoffman Melanie Michailidis Renata Holod Scott Redford and Alicia Walker Young Blood Neil Spiller, 2001-04-18 Established architects will be stunned by the design dexterity and creativity contained in *Young Blood* which brings together the speculative architectural projects of the very best young

architects worldwide Guest edited by the cutting edge architect and passionate architectural educator Neil Spiller it features graduates of the premier architecture schools the Bartlett and the Architectural Association in London Sci arc and UCLA in Los Angeles Columbia in New York and RMIT in Australia Imaginative innovative and accomplished in their technical skills this generation of young blood exude a unique 21st century freshness and confidence It is a confidence that those currently at the top of their profession also share in their likely successors This is illustrated by the enthusiastic and supportive words from renowned architects that accompany each young designer s work
