Oral Epics from Africa John William Johnson, Thomas Albert Hale, Thomas A. Hale, Stephen Paterson Belcher, 1997-04-22 It seems incredible that heretofore there has not been an introductory anthology of African epics presented in English Western literary culture has long emphasized the heritage of such well known epics as the Iliad the Odyssey and Aeneid But it is only recently that scholars have turned their attention toward capturing the rich oral tradition that is still alive in Africa The twenty five excerpts in this volume have been selected and introduced so as to offer English speaking readers a broad sample of the extensive epic traditions in Africa The general introduction and the background on each epic will enable readers to understand the context of each epic and will also provide leads for further inquiry

Honour in African History John Iliffe, 2005 This is the first published account of the role played by ideas of honour in African history from the fourteenth century to the present day It argues that appreciation of these ideas is essential to an understanding of past and present African behaviour Before European conquest many African men cultivated heroic honour others admired the civic virtues of the patriarchal householder and women honoured one another for industry endurance and devotion to their families These values both conflicted and blended with Islamic and Christian teachings Colonial conquest fragmented heroic cultures but inherited ideas of honour found new expression in regimental loyalty respectability professionalism working class masculinity the changing gender relationships of the colonial order and the nationalist movements which overthrew that order Today the same inherited notions obstruct democracy inspire resistance to tyranny and motivate the defence of dignity in the face of AIDS

Rhetoric in the Rest of the West Shane Borrowman,Marcia Kmetz,Robert L. Lively,2010-04-16 While the study of the history of rhetoric has expanded to include an ever growing range of rhetorical traditions lesser known figures and under and un studied texts it has continued to exist in the hermetically sealed binary of West and Rest Rhetorical scholars have begun uncovering the many marginalized rhetorical traditions silenced by the homogenous nature of our histories themselves reading and writing new histories of the rhetorical tradition through frames from gender to geography Despite these substantial challenges to the traditionally received history of rhetoric many voices are still silenced and many spaces are still excluded voices speaking within the spaces of the less than monolithic West itself This silencing and excluding continues perhaps because of assumptions that no texts exist from these marginalized voices or that substantial rhetorical activity was not conducted in

these marginalized spaces regardless of already extant evidence of rhetorical activity as diverse as rural civic ethos in Classical Greece and Etruscan influences on Roman rhetoric or long standing passive knowledge of scholarly activity in Medieval Andalusia and Ireland Rhetoric in the Rest of the West attempts to expand the conversation in those gaps in the history of rhetoric by examining the traditions that lost the cultural competition and have been shrouded in the shadow of the rhetorical tradition
