The books did not have a formal title in ancient times. Although Simplicius called them *Diatribai*, other writers gave them titles such as *Dialexis* and *Homiliai*. The modern name comes from the titles given in the earliest medieval manuscript, Arrian's *Diatribai of Epictetus*. The Greek word *Diatribai* literally means informal talks. As to the date, it is generally agreed that the Discourses were composed sometime in the years around 108 AD. Epictetus himself refers to the coins of Trajan, which shows he was teaching during that reign. Arrian was suffect consul in around 130, and since forty-two was the standard age for that position, he would have been at the right age of around twenty in 108. Furthermore, the commissioner of the free cities to whom Discourse iii 7 is addressed is thought to be the same man. Pliny the Younger addresses his Letter viii 24a, a letter which has been dated to around 108.

Stoic Foundations Chuck Chakrapani, 2017-07-17 *Stoic Foundations* is the plain English version of Discourses Book 1 by the eminent Stoic philosopher Epictetus. It reveals around 10 themes which are also repeated in other places throughout the Discourses. These are: Concern yourself with only what is in your power; Be content to let things happen as they do; Your thinking, not the externals, drives your behavior; Do not place value on external things; Don't give in to your anger or animal instincts; You can handle anything; always act your best; Learn to think properly and logically; Practice, not knowledge, results in progress; Only you can make you happy. Dr. Chuck Chakrapani has been a long-term but embarrassingly inconsistent practitioner of Stoicism. He is the president of Leger Analytics and a Distinguished Visiting Professor at Ryerson University.

Discourses (Books 1 and 2) Epictetus, 2012-03-09 The ne plus ultra of Stoicism. Discourses outline clear-cut principles of right conduct and true thinking, offering secular thinkers a mode of reasoning that dismisses the strictures of absolutism and emotionalism in exchange for a more peaceful and productive life. The Discourses report wide-ranging discussions between Epictetus and his students. *Epictetus, Vol 1* Epictetus, 1961 Epictetus: Discourses, 1998 About Epictetus. Little is known for certain about Epictetus' life. He was born in the second half of the first century AD, probably in Asia Minor; he was a slave for some of his life; he studied philosophy in Rome and worked at the imperial court at the end of the century; he subsequently lived in Epirus, the northwestern part of Greece. About this work. The Discourses are a key source for ancient Stoicism, one of the richest and most influential schools of thought in Western philosophy. They not only represent the Stoicism of Epictetus' own time but also reflect the teachings of such early Stoics as Zeno and Chrysippus, whose writings are largely lost. The first of the four books of the Discourses is philosophically the richest; it focuses primarily on ethics and moral psychology but also touches on issues of logic, epistemology, science, and rhetoric. Other notable schools of ancient thought, including Epicureanism, the Sceptics, and the Cynics, are discussed. About this edition. Robert Dobbin presents a new translation into clear modern English of this important work, together with the first commentary on the work since the eighteenth century. Each of the thirty discourses that make up Book 1 is introduced and summarized, then the arguments

are examined in detail. The general introduction gives background information about Epictetus' life, the intellectual context of the work, the style of the discourses, and the history of the text. A bibliography surveys the literature. The volume serves as a guide to Epictetus' thought as a whole. About CLAP: This series is designed to encourage philosophers and students of philosophy to explore the fertile terrain of later ancient philosophy. The texts will range in date from the first century BC to the fifth century AD and they will cover all the parts and all the schools of philosophy. Each volume contains a substantial introduction, an English translation, and a critical commentary on the philosophical claims and arguments of the text. The translations aim primarily at accuracy and fidelity but also at readability; they are accompanied by notes on textual problems that affect the philosophical interpretation. No knowledge of Greek or Latin is assumed. Systems of Ethics and Value Theory Ph. S. D. Sahakian, 1963-01-01. In the extensive study *Systems of Ethics and Value Theory*, author William S. Sahakian deconstructs these two complex philosophical systems for a scholarly audience. He covers topics from self-realizationism to free will to dignity with careful analysis and reasoning. His astute contributions to the fields of ethics and value theory provide excellent introductions and open up readers' minds to the complex philosophical concepts and arguments.

Epictetus, I, Discourses, Books 1-2 Epictetus, 1925 **Going Against the Flow** Alan M. Laibelman, 2004. Most contemporary efforts in philosophy treat metaphysics and ethics as isolated arenas of thought. Critical analytical exploration of a multitude of ethical theories emanating from historically diverse philosophical and theological traditions demonstrates that a consistent and comprehensive ethic depends upon a solid metaphysical foundation. Building upon a metaphysical scheme first explicated in *The Other Perennial Philosophy: A Metaphysical Dialectic*, Alan M. Laibelman elaborates on a syncretistic ethical system incorporating elements from many cross-cultural sources and also develops an extensive theory of consciousness inclusive of both transcendental and existential components. **Journal of Moral Theology, Volume 8, Issue 2** David M.
