in the social sciences such as human animal relations nationalism place branding event impacts event experience and inclusion and exclusion The book is a contribution to two fields In relation to human animal studies it focuses on how the Icelandic horse breed is marketed and celebrated through top tier competition whereas from an events management perspective it considers the role of the event in community building the practical and theoretical aspects of running a sustainable equestrian event and the issues that arise in multispecies event contexts The new equine economy in the 21st century C. relationship between sport tourism and events. It assesses sports events through the lens of both sports participants and spectators based on three primary themes: impacts, experiences, and identities. The first section of the book contributes to the future development of knowledge by analyzing the impact of sport events and their legacies from economic, environmental, social, sporting, political, and cultural perspectives. An understanding of the impacts and potential legacies of sports events is fundamental to their future development. In the second section of the book, the focus moves from impact and legacy issues towards exploring consumer behaviour and participant experiences at a diverse selection of International Sports Events. The emphasis within this section is grounded within the tourism dimension of sports events. Section three of the book highlights the dominant role of identity at a diverse selection of sports events and demonstrates how that identity is displayed whilst either watching or participating in sport and leisure. The book provides an international analysis drawing on emerging empirical research conducted across a diverse range of sport and leisure activities and contrasting locations. Linked to the three underlying themes of the book, a future research agenda for International Sports Events is provided, which is centred on four key pillars: impact, identity, internationalization, and interdisciplinary research.
