Ishtiaq Jamil, Salahuddin M. Aminuzzaman, Syeda Lasna Kabir, M. Mahfuzul Haque, 2020-01-30 This book explores and analyzes gender mainstreaming in South Asia. Gender mainstreaming as a concept is about removing disparities between men and women about equal access to resources, inclusion and participation in the public sphere, representation in government and empowerment, all with the aim of achieving equal opportunities for men and women in family life, society, administration, politics and the economy. The challenges of gender mainstreaming in South Asia are huge, especially in the contexts of patriarchal, religious and caste-based social norms and values. Men's dominance in politics, administration and economic activities is distinctly visible. Women have been subservient to the policy preferences of their male counterparts. However, in recent years, more women are participating in politics at the local and national levels in administration and in formal economic activities. Have gender equality and equity been ensured in South Asia? This book focuses on how gender-related issues are incorporated into policy formulation and governance, how they have fared, what challenges they have encountered when these policies were put into practice, and their implications and fate in the context of five South Asian countries. The authors have used varied frameworks to analyze gender mainstreaming at the micro and macro levels. Written from public administration and political science perspectives, the book provides an overview of the possibilities and constraints of gender mainstreaming in a region which is not only diverse in ethnicity and religion but also in economic progress, political culture and the state of governance. *Handbook of Comparative and Development Public Administration*

**Public-Private Wage Differentials and Interactions Across Countries and Time** Mr. Chadi Abdallah, Mr. David Coady, La-Bhus Fah Jirasavetakul, 2023-03-17 We compile a novel database on average public and private sector wages and public-private wage differentials which we use to analyze how average public-private wage differentials vary according to gender and skill level as well as over time. We further examine the dynamic relationship between public and private wage levels and the implications for inflation. On average, public sector workers earn around 10 percent more relative to comparable private sector workers, with the premium being higher for women, low-skilled workers, and in developing countries. The average public sector wage premium varies counter-cyclically, increasing during economic downturns and increases prior to elections. Both private sector wages and inflation respond positively to changes in public wages, albeit with significant heterogeneity in the effects across countries, reflecting differences in labor market characteristics and prevailing macroeconomic conditions.

**America's Banquet of Cultures** Ronald Fernández, 2000-06-30 The melting pot is a myth, according to Fernandez, who shows that the United States is and always has been a banquet of cultures. As he argues, the best way to deal with the more than 20 million new immigrants since 1965 is to accept, recognize, and eagerly explore the differences among the American people. Fernandez seeks to forge a positive national consensus based on two building blocks. First, the nation's many ethnic groups can be a powerful source of unprecedented economic, artistic, and scientific creativity. Secondly, the nation's many ethnic groups offer a way to erase the black-white dichotomy which masks the shared injustices of millions of European, Asian, African, Native, and Latino Americans. This is a provocative analysis of how we arrived at our current ethnic and racial dilemmas and what can be done to move beyond them. Scholars and students of American immigration and social policy, as well as concerned citizens, will find the book equally rewarding.
