Biogeography and Ecology of Southern Africa Marinus J.A. Werger, A.C. van Bruggen, 2012-12-06 Southern Africa is certainly not a naturally bounded area so that there are several possibilities for delineating it and concepts about its extent Wellington discussed the various possibilities for delineation and suggested that one line stands out more clearly and definitely as a physical boundary than any other namely the South Equatorial Divide the watershed between the Zaïre Cuanza and Rufiji Rivers on the one hand and the Zambezi Cunene and Rovuma Rivers on the other This South Equatorial Divide is indeed a major line of separation for some organisms and is also applicable in a certain geographical sense though it does not possess the slightest significance for many other groups of organisms ecosystems or geographical and physical features of Africa The placing of the northern boundary of southern Africa differs in fact strongly per scientific discipline and is also influenced by practical considerations regarding the possibilities of scientific work as subordinate to certain political realities and historically grown traditions This is illustrated for example in such works as the Flora of Southern Africa where the northern boundary of the area is conceived as the northern and eastern political boundaries of South West Africa South Africa and Swaziland Botswana traditionally included in the area covered by the Flora Zambesiaca thus forms a large wedge in Southern Africa *The Journal of Ecology*, 1926 Vols 16 21 include supplement British empire vegetation abstracts

The Population Ecology and Conservation of Charadrius Plovers Mark A. Colwell, Susan M. Haig, 2019-04-26 The 40 or so species of beach loving plovers genus *Charadrius* comprise a diverse group of shorebirds found around the world Most of these species are challenged by changing climates and other human related development activities yet they provide key insights into basic ecological and evolutionary processes The expert international contributors take a comparative approach presenting examples from many worldwide plover studies and synthesizing the group's most pressing and important topics The book further presents an emphasis on full life cycle biology including the importance of examining migratory connectivity issues even for non migratory plovers Color pages were planned and approved for some pages in this volume but due to a printing error some copies have incorrectly been released with these pages printed in black and white Replacement copies with the correct color in place can be obtained upon request by contacting orders.crcpress.com CRC Press extends apologies to any customers affected by this error and for the inconvenience caused Key Features Serves as a fundamental resource for conservation practitioners Detailed overview of a widely distributed group of shorebirds Authored by renowned specialists who present theoretical and applied perspectives Emphasis on comparative and synthetic approach in all chapters Related Titles McComb B et al Monitoring Animal Populations and Their Habitats A Practitioner's Guide ISBN 978 0 4291 3827 0 Garvey J E M R Whiles Trophic Ecology ISBN 978 1 4987 5846 8 Dewdney A K Stochastic Communities A Mathematical Theory of Biodiversity ISBN 978 1 1381 9702 2 **Ecology of Central European Non-Forest Vegetation: Coastal to**

Gilbertson, 2012-12-06 Our aim in writing this book is to provide students and teachers with a simple introductory text which deals with practical aspects of ecology environmental biology and biogeography emphasizing actual field and classroom investigations Basic concepts and methods of survey mapping and aerial photography data collection and data analysis are described and discussed in order to encourage students to identify and tackle worthwhile projects The level at which this text is appropriate depends very much upon particular circumstances The greater part lies within the scope of the sixth form and the first and second years of college polytechnic and university courses in the British Isles and their equivalents overseas All students inevitably meet difficulties in the identification of plant and animal species particularly when they venture into unfamiliar habitats and regions This is often the cause of unnecessary alarm Many ecological principles or problems may be illustrated by reference to familiar species and habitats such as are found in urban environments as well as those areas of semi natural vegetation favoured for field courses **The Ecology and Conservation of European Dunes** Francisco García Novo, 1997 Includes resumé of articles **Plant community ecology: Papers in honor of Robert H. Whittaker** R.K. Peet, 2012-12-06 R K Peet Dep of Botany University of North Carolina Chapel Hill N C 27514 USA Robert Whittaker's contributions to ecology were many and remarkably varied His publication record will long stand as a monument to his greatness and whatever we do to honor him will likely be rather small in comparison Less well known were his personal interactions and the impact they had on the development of ecology as well as individual scientists Over the years he touched many of us and we felt not just a professional but also a deep personal loss in his passing After his death I was contacted by numerous colleagues who wondered what they might do to honor him Whittaker had long served on the editorial board of *Vegetatio* which prompted Eddy van der Maarel to suggest that a series of papers in the journal might be a fitting memorial and so this project was conceived Whittaker was a master of synthesis and during his career he published numerous review papers which showed clearly how his work related to and built on that of others For this reason it seemed inappropriate and redundant to solicit papers reviewing areas to which Whittaker made important contributions Instead I chose to solicit research papers illustrating current applications of approaches Whittaker developed and showing a few of the recent advances which have grown directly from his pioneering work **Weed Biology and Ecology in Agroecosystems** Karla Leigh Gage, Lauren M. Lazaro, Bhagirath Singh Chauhan, 2021-11-03 **Historical Ecology of the British Flora** M. Ingrouille, 2012-12-06 The native British flora is today relatively ant species on the continent such as *Picea* impoverished Today the British Isles has a *Abies* Norway spruce did not get into Britain flora of only about 1500 species of native in time However we must not over flowering plants France and Spain each emphasize the importance of Britain being an geographically only about twice the area island A comparison of floras on either side have 3 4 times as many species each The of the English Channel shows that there are comparison is more marked when consider species present in England and not in the endemic species those

specialities of northern France as well as vice versa Many each geographical region which grow of the species present in northern France but nowhere else If only normal sexual species absent from England are weeds adapted to are considered then there are only about 13 French agriculture Others may be limited endemic species in the British Isles while 1000 not by the sea but by the climate species are endemic to Spain Nevertheless the example of Ireland However the poverty of the British flora is which was isolated much earlier than the rest not a unique phenomenon The whole of of the British Isles does show the effect of north western Europe an area including isolation because it does have a much poorer northern France and much of Germany and flora and fauna The Ecology of the Alpine Zone of Mount Kenya M.J. Coe,2012-12-06 For centuries the peak of Mount Kenya has held a magical and religious significance for the Bantu and Nilohamitic peoples around its base The Kikuyu live around the Eastern and Southern bound aries and the closely related Uembu and Umeru on the S E and N E respectively Early in this century the Masai lived to the N W and North but after continual warfare between them and their neighbours the European administrators of that time moved them to a special reserve to the South which accounts at the present day for the retention in the Masai language of many words that refer to Mount Kenya Kikuyu folk lore tells how when the earth was formed a man named Mogai made a great mountain Kere Nyaga The fine white powder snow covering the peak which they called ira was said to be the bed of Ngai God and during male and female circumcision ceremonies a white powder was placed on the wound and the initiates were told that this material had been brought from the summit of the mountain In fact all important tribal ceremonies were and in many cases still are conducted facing the mountain Such occasions include marriage and sacrifice when in time of hardship Ngai s aid is called upon CAGNOLO 1933 KENYATTA 1938 CRIRA 1959
