Don DeLillo's 1997 masterwork *Underworld* one of the most acclaimed and long awaited novels of the last twenty years was immediately recognized as a landmark novel not only in the long career of one of America's most distinguished novelists but also in the ongoing evolution of the postmodern novel Vast in scope intricately organized and densely allusive the text provided an immediate and engaging challenge to readers of contemporary fiction This collection of thirteen essays brings together new and established voices in American studies and contemporary American literature to assess the place of this remarkable novel not only within the postmodern tradition but within the larger patterns of American literature and culture as well By seeking to place the novel within such a context this lively collection of provocative readings offers a valuable guide for both students and scholars of the American literary imagination *The Ladies' Companion*, 1859 *Arktouros*

before Trendel reads them through the lens of the pedagogic rapport and in constant dialogue with a broad range of themes such as gender sexuality and power The book will be important for academics students and all who are interested in the bond between teacher and student The Symbolical Language of Ancient Art and Mythologie Richard Payne Knight, 1892
