Spaces Mapped and Monstrous Nick Jones, 2020-04-21 Digital 3D has become a core feature of the twenty first century visual landscape Yet 3D cinema is a contradictory media form producing spaces that are highly regimented and exhaustively detailed it simultaneously relies upon distortions of vision and space that are inherently strange *Spaces Mapped and Monstrous* explores the paradoxical nature of 3D cinema to offer a critical analysis of an inescapable part of contemporary culture Considering 3D s distinctive visual qualities and its connections to wider digital systems Nick Jones situates the production and exhibition of 3D cinema within a web of aesthetic technological and historical contexts He examines 3D s relationship with computer interfaces virtual reality and digital networks as well as tracing its lineage to predigital models of visual organization Jones emphasizes that 3D is not only a technology used in films but also a tool for producing controlling and distorting space within systems of surveillance corporatization and militarization The book features detailed analysis of a wide range of films including *Avatar* 2009 *Goodbye to Language* 2014 *Love* 2015 and *Clash of the Titans* 2010 demonstrating that 3D is not merely an augmentation of 2D cinema but that it has its own unique properties *Spaces Mapped and Monstrous* brings together media archaeology digital theory and textual analysis to provide a new account of the importance of 3D to visual culture today

3D Cinematic Aesthetics and Storytelling Yong Liu, 2018-07-05 This book argues that 3D films are becoming more sophisticated in utilising stereoscopic effects for storytelling purposes Since *Avatar* 2009 we have seen a 3D revival marked by its integration with new digital technologies

With this book the author goes beyond exploring 3D's spectacular graphics and considers how 3D can be used to enhance visual storytelling. The chapters include visual comparisons between 2D and 3D to highlight their respective narrative features, an examination of the narrative tropes and techniques used by contemporary 3D filmmakers, and a discussion of the narrative implications brought by the coexistence of flatness and depth in 3D visuality. In demonstrating 3D cinematic aesthetics and storytelling, Yong Liu analyses popular films such as *Hugo* (2011), *Life of Pi* (2012), *Gravity* (2013), *Star Trek Into Darkness* (2013), and *The Great Gatsby* (2013). The book is an investigation into contemporary forms of stereoscopic storytelling derived from a unique, long-existing mode of cinematic illusions.

Virtual Interaction: Interaction in Virtual Inhabited 3D Worlds E. Granum, Lars Qvortrup, B. Holmqvist, S. Kolstrup, K. Halskov Madsen, 2013-03-09 Lars Qvortrup The world of interactive 3D multimedia is a cross-institutional world. Here researchers from media studies, linguistics, dramaturgy, media technology, 3D modelling, robotics, computer science, sociology, etc. etc. meet. In order not to create a new tower of Babel, it is important to develop a set of common concepts and references. This is the aim of the first section of the book. In Chapter 2, Jens F. Jensen identifies the roots of interaction and interactivity in media studies, literature studies, and computer science and presents definitions of interaction as something going on among agents and agents and objects, and of interactivity as a property of media supporting interaction. Similarly, he makes a classification of human users, avatars, autonomous agents, and objects, demonstrating that no universal differences can be made. We are dealing with a continuum. While Jensen approaches these categories from a semiotic point of view, in Chapter 3, Peer Mylov discusses similar issues from a psychological point of view. Seen from the user's perspective, a basic difference is that between stage and back stage, or rather front stage, i.e. between the real I and we and the virtual representational I and we. Focusing on the computer as a stage, in Chapter 4, Kjølner and Lehmann use the theatre metaphor to conceptualize the stage phenomena and the relationship between stage and front stage.

Deep Red Alexia Kannas,2017-02-07 The release of Italian director Dario Argento's Deep Red in 1975 saw both a return to form for the director and the crystallization of tropes of the giallo genre While the film's immense popularity in Italy spawned a wave of copy cat formula thrillers this enthusiastic reception was not replicated by English speaking audiences on its theatrical release With its loosely woven narrative and hyper stylized violent set pieces Deep Red was critically panned in the United States and the UK as cliché and exploitative Euro schlock Tracing the film's history of censorship re edited releases and its subsequent celebration by cult film audiences this book considers how these competing discourses have helped to transform the film's cultural status and to fashion it as an exemplar of cult cinema
