Enzymes Of The Arterial Wall:

Enzymes of the Arterial Wall John Esben Kirk, 2014-06-28 *Enzymes of the Arterial Wall* is a comprehensive up to date monograph and is the first publication dealing specifically with quantitative determinations of enzyme activities in human and animal vascular tissue All available information concerning this subject is included This summary of all current knowledge will be very useful to scientists who lack extensive library facilities and knowledge of foreign languages necessary for a thorough and time consuming personal search of the original literature A systematic description is made of 98 different enzymes nearly all enzymes in the carbohydrate metabolic pathways are included Brevity of discussion has made it possible to incorporate all available data The results represent 27 200 quantitative biochemical assays performed with reliable analytical techniques on both normal and arteriosclerotic tissue 70 enzymic procedures are described The framework for the arrangement of facts throughout the book was designed to make information easily accessible Each enzyme is described separately using the sequence of The Commission on Enzymes of The International Union of Biochemistry and is followed by literature references with full titles

Diseases of the Arterial Wall Jean-Pierre Camilleri, Colin L. Berry, Jean-Noel Fiessinger, Jean Bariety, 2012-12-06 This text combines extensive coverage of normal structure and function of the arterial wall with detailed accounts of the changes that occur in disease These data are presented in a comprehensive way not found elsewhere they are essential for the proper understanding of arterial disease and for its investigation using modern methodology Development and the factors controlling vessel form and structure are first discussed and the normal cellular populations functions and interactions are then considered Particular topics such as pulmonary hypertension the effects of trauma on vessels and diabetic vascular disease are reviewed in detail This book will be of interest to all involved in the management of vascular disease

Jones,2012-12-06 This is the second of a number of international symposia which will I hope continue to be held until atherosclerosis is no longer a major problem The first symposium was held three years

ago in Athens Greece under the chairmanship 1 of Dr Constantinos Miras who although he could not attend this symposium participated actively in the deliberations of this Program Committee Atherosclerosis together with its sequelae constitute the most important source of morbidity and mortality in civilized countries While a major attack is being made on the consequences the sequelae of this disease not enough attention is being paid to the basic cause atherosclerosis Yet if the basic disease were eradicated the major concern of this symposium the sequelae would constitute only a minor and rare disease group The approach of the Program Committee was to bring together experts in the multiple disciplines which have a bearing on atherosclerosis There is a great need for an exchange of ideas from various groups studying the basic process in many divergent ways The hope we have is that those present or those later studying the Proceedings may be stimulated to attack the problem in new ways Perhaps a breakthrough will be made or at least a brick or two added to build the structure a rampart needed to defend against atherosclerosis Better still their contributions may help to confine it to a small area
