Epics Of Sumerian Kings The Matter Of Aratta Wri:

Epics of Sumerian Kings Herman L. J. Vanstiphout, 2003 *Epics of Sumerian Kings* presents for the first time both the authoritative Sumerian text and an elegant English translation of four key epics from the Sumerian literary canon. These epics, the earliest known in any language, revolve around the conflict between the cities of Uruk and Erech in ancient Iraq and Aratta in neighboring Iran. Of special interest is *Enmerkar and the Lord of Aratta*, which contains the story of the confounding of human language, often cited as a source of the biblical tower of Babel narrative, as well as the Sumerians' own account of the invention of cuneiform writing. In addition to providing English translations of the epics, Vanstiphout discusses their intellectual and cultural context, their poetics and meaning, and the significance of the epic cycle as a whole. The volume will interest scholars and students of Assyriology and the ancient Near East, biblical scholars, and general readers, and will be a valuable text for courses on ancient Near Eastern literature or history. *Epics of Sumerian Kings* H. Divination as Science Jeanette C. Fincke, 2016-06-21 There is no doubt that Ancient Near Eastern divination is firmly rooted in religion since all ominous signs were thought to have been sent by gods and the invocation of omens was embedded in rituals Nonetheless the omen compendia display many aspects of a generally scientific nature In their attempt to note all possible changes to the affected objects and to arrange their observations systematically for reference purposes the scholars produced texts that resulted in a rather detailed description of the world be it with respect to geography the urban or rural environment on earth or celestial and meteorological phenomena observed in the sky biology the outer appearance of the bodies of humans or animals or the entrails of sheep sociology behavior of people or others Based on different divination methods and omen compendia the question discussed during this workshop was whether the scholars had a scientific approach presented as religion or whether Ancient Near Eastern divination should be considered purely religious and that the term science is inappropriate in this context The workshop attracted a large audience and lively discussion ensued The papers presented in this volume reflect the focus of the sessions during the workshop and are likely to generate even more discussion now that they are published **Translation as Scholarship** Jay Crisostomo, 2019-01-14 In the first half of the 2d

Lowery, 2013-04-15 Daniel Lowery commences this work by suggesting that history is a subjective enterprise it is controlled by those who record it The power of the present decides what is counted as history and how the rest of us are told about the past shapes our view of it and concomitantly our outlook for the future In this sense then history fundamentally shapes the future Few questions are more basic to human existence than Who am I Where did I come from What is my place in this world The earliest chapters of Genesis have oriented hearers and readers for millennia in their attempts to address these concerns And so in several respects Genesis shapes the future In this study Lowery sets out to understand more accurately ancient Near Eastern language and claims about origins specifically claims found in Gen 1:11 He uses Gen 4:17-22 as a test

case representing the Hebrew tradition explaining how the world came to be civilized Lowery observes that this passage serves a function within the larger narrative of Gen 1 11 akin to other ancient Near Eastern traditions of civilized beginnings Moreover it occupies a place in the overarching narrative of beginnings corresponding to what we find elsewhere throughout the ancient world Lowery focuses mainly on Mesopotamia leaving other cultures for later study This study aims to demonstrate that much of the language of Gen 1 11 is similar in many ways to its Mesopotamian counterparts More explicitly here is an exploration of the nature of the language and terms of Gen 1 11 to ascertain what truths it communicates and how it communicates them At its core this is a study of the genre and generic claims of protohistory as found in Gen 1 11

Ideography and Chinese Language Theory Timothy Michael O'Neill, 2016-07-11 This book is a much needed scholarly intervention and postcolonial corrective that examines why and when and how misunderstandings of Chinese writing came about and showcases the long history of Chinese theories of language Ideography as such assumes extra linguistic trans historical universal ideas which are an outgrowth of Platonism and thus unique to European history Classical Chinese discourse assumes that language and writing is an arbitrary artifact invented by sages for specific reasons at specific times in history Language by this definition is an ever changing technology amenable to historical manipulation language is not the House of Being but rather a historically embedded social construct that encodes quotidian human intentions and nothing more These are incommensurate epistemes each with its own cultural milieu and historical context By comparing these two traditions this study historicizes and decolonializes popular notions about Chinese characters exposing the Eurocentrism inherent in all theories of ideography Ideography and Chinese Language Theory will be of significant interest to historians sinologists theorists and scholars in other branches of the humanities
