Patton, Maria Alessia Rossi,2023-10-03 Where are the limits of medieval art as a field of study What happens when conventionally trained art historians disregard the chronological geographical or cultural parameters that both direct and protect their scholarship Beginning with Thelma K Thomas and Alicia Walker s acute assessment of the need for a medieval art history for now the essays in *Out of Bounds* ask what happens when the study of medieval art disregards boundaries that it once obeyed The volume focuses on questions surrounding the production of knowledge and on how scholarly investigation beyond the conventional thematic boundaries of medieval art history is changing demonstrating how the field can address the ethics of scholarship today by positing a global turn in response to growing demands for socially responsible medieval studies Collectively the contributors demonstrate how going out of bounds can transform modern understanding of the people traditions and relationships that gave rise to medieval works As such this book argues for the necessity of reshaping scholarly discourse about the nature and significance of medieval art and generates fresh scholarly interpretations and important new critical tools for teaching and researching the Middle Ages The contributors to this volume are Suzanne Conklin Akbari Michele Bacci Jill Caskey Eva Frojmovic Sarah M Gu rin Christina Maranci Alice Isabella Sullivan Thelma K Thomas Michele Tomasi and Alicia Walker *Amerasia* Elizabeth Horodowich, Alexander Nagel,2023-09-05 A connected world as imagined by early modern European artists mapmakers and writers where Asia and the Americas were on a continuum America and Asia mingled in the geographical and cultural imagination of Europe for well over a century after 1492 Through an array of texts maps objects and images produced

between 1492 and 1700 this compelling and revelatory study immerses the reader in a vision of a world where Mexico really was India North America was an extension of China and South America was marked by a variety of biblical and Asian sites It asks further What does it mean that the Amerasian worldview predominated at a time when Europe itself was coming into cultural self definition Each of the chapters focuses on a particular artifact map image or book that illuminates aspects of Amerasia from specific European cultural milieus Amerasia shows how it was possible to inhabit a world where America and Asia were connected either imaginatively when viewed from afar or in reality when traveling through the newly encountered lands Readers will learn why early modern maps regularly label Mexico as India why the Amazonas region was named after a race of Asian female warriors and why artifacts and manuscripts that we now identify as Indian and Chinese are entangled in European collections with what we now label Americana Elizabeth Horodowich and Alexander Nagel pose a dynamic model of the world and of Europe's place in it that was eclipsed by the rise of Eurocentric colonialist narratives in the nineteenth and twentieth centuries To rediscover this history is an essential part of coming to terms with the emergent polyfocal global reality of our own time

Latin Scientific Literature, 1450-1850 Martin Korenjak, 2023 During the early modern period the emergence of modern science took place mainly in Latin the international language of educated discourse However the Latin literature in which most new insights were presented at that time has never been studied as a whole and in its own right This book provides the first overview of this vast body of texts
