**Violence and the Genesis of the Anatomical Image** Rose Marie San Juan, 2022-11-28 Nothing excited early modern anatomists more than touching a beating heart In his 1543 treatise Andreas Vesalius boasts that he was able to feel life itself through the membranes of a heart belonging to a man who had just been executed a comment that appears near the woodcut of a person being dissected while still hanging from the gallows In this highly original book Rose Marie San Juan confronts the question of violence in the making of the early modern anatomical image Engaging the ways in which power operated in early modern anatomical images in Europe and to a lesser extent its colonies San Juan examines literal violence upon bodies in a range of civic religious pedagogical and exploratory contexts She then works through the question

of how bodies were thought to be constituted systemic or piecemeal singular or collective and how gender determines this question of constitution In confronting the issue of violence in the making of the anatomical image San Juan explores not only how violence transformed the body into a powerful and troubling double but also how this kind of body permeated attempts to produce knowledge about the world at large Provocative and challenging this book will be of significant interest to scholars across fields in early modern studies including art history and visual culture science and medicine The Illustrations from the Works of Andreas Vesalius of Brussels J. B. Saunders, Charles O'Malley, 2013-04-15 Definitive edition features 96 of the best plates from the great anatomist's Renaissance treasures Reproduced from a rare edition with a discussion of the illustrations biographical sketch of Vesalius annotations and translations *The Sensualist* Barbara Hodgson, 2012-06-08 A scholar's search for her husband unfolds a hallucinatory tale of vengeance in a mystery illustrated by the artist and author of *The Tattooed Map* When her journalist husband suddenly goes missing art historian Helen Martin travels to Vienna to find him But soon after her arrival she finds herself entering a strange world of twilight dream logic and danger Traveling by train with a mysterious box of wonders Helen's search for her husband takes her headlong into a tense mystery with provocative links to the past The clues Helen must piece together jewels notes ancient anatomy texts are all presented to the reader in Barbara Hodgson's illustrations Both a complex thriller and an investigation of the senses *The Sensualist* explores the limitations of looking and the boundless power of seeing Medicine and Western Civilization David J. Rothman, Steven Marcus, Stephanie A. Kiceluk, 1995 This fabulous anthology is sure to be a core text for history of medicine and social science classes in colleges across the country In order to demonstrate how medical research has influenced Western cultural perspectives the editors have collected original works from 61 different authors around nine major themes among them Anatomy and Destiny Psyche and Soma and The Construction of Pain Suffering and Death The authors range from Aristotle the Bible and Louis Pasteur to Masters and Johnson Ernest Hemingway and Simone de Beauvoir The primary sources selected to illustrate the themes are well chosen and contrast with each other nicely However the brief background material for the selections center around the authors and offer little or no discussion about the selections relevance to the topics at hand This book would be best read in a class or group where the texts meaning in relation to each other can be discussed but the book can stand alone if the reader is prepared to do some critical thinking *Neural Theories of Mind* William R. Uttal, 2020-07-24 In this fascinating book William R Uttal raises the possibility that however much we learn about the anatomy and physiology of the brain and psychology we may never be able to cross the final bridge explaining how the mind is produced by the brain Three main classes of mind brain theory are considered and rejected field theories because they are based on a superficial analogy single cell theories because they emerge from a massive uncontrolled experimental program and neural net theories because they are constrained by combinatorial complexity To support his argument Uttal explores the empirical and conceptual foundations of these theoretical approaches and identifies flaws in their fundamental

logic The author concludes that the problems preventing solution of the mind brain problem are intractable yet well within the confines of natural science

**The Scientific Intellectual** Lewis S. Feuer, 2021-12-16 The birth of modern science was linked to the rise in Western Europe of a new sensibility that of the scientific intellectual Such a person was no more technician looking at science as just a job to be done but one for whom the scientific stand point is a philosophy in the fullest sense In The Scientific Intellectual Lewis S Feuer traces the evolution of this new human type seeking to define what ethic inspired him and the underlying emotions that created him Under the influence of Max Weber the rise of the scientific spirit has been viewed by sociologists as an offspring of the Protestant revolution with its asceticism and sense of guilt acting as causative agents in the rise of capitalism and the growth of the scientific movement Feuer takes strong issue with this view pointing out how it is at odds with what we know of the psychological conditions of modern societies making for human curiosity and its expression in the observation of and experiment with nature Feuer shows that wherever a scientific movement has begun it has been based on emotions that issue in what might be called a hedonist libertarian ethic The scientific intellectual was a person for whom science was a new philosophy a third force rising above religious and political hatreds seeking in the world of nature liberated vision a intending to use and enjoy its knowledge In his new introduction to this brilliantly readable volume Professor Feuer reviews the book s critical reception and expands the scope of the original edition to include fascinating discussions of Francis Bacon Thomas Edison Charles Darwin Thomas Hardy and others The Scientific Intellectual will be of interest to scientists and intellectual historians
