Asian Americans and the Shifting Politics of Race Rowena Robles, 2013-09-13 Asian Americans and the

Shifting Politics of Race examines the political and discursive struggles around the dismantling of race based admissions policies in an elite public high school in San Francisco. The book analyzes the arguments put forth by plaintiffs in and the media's depiction of the case *Brian Ho Patrick Wong Hilary Chen v SFUSD*. The Ho lawsuit filed by a group of Chinese Americans challenged race based admissions policies that were intended to ensure diversity by giving special consideration to African American and Latino students. Robles argues that the Ho plaintiffs exploited the dominant racial construction of Asian Americans as model minorities to portray themselves as victims of discrimination and relied on contrasting constructions of Black and Latino students as undeserving and unqualified beneficiaries of affirmative action. The decision in favor of the plaintiffs effectively ended school desegregation, racial balance and affirmative action in San Francisco. In order to examine the consequences of the Ho decision on student attitudes, Robles spent four years studying and observing the first cohort of students to enter the high school after race was eliminated from admissions considerations. *Equal Educational Opportunity Project Series: Equal educational opportunity and nondiscrimination for students with disabilities, federal enforcement of section 504* United States Commission on Civil Rights, 1997

The Hardest Deal of All Charles C. Bolton, 2009-09-18. Race has shaped public education in the Magnolia State from Reconstruction through the Carter Administration. For *The Hardest Deal of All: The Battle Over School Integration in Mississippi 1870-1980* Charles C. Bolton mines newspaper accounts, interviews, journals, archival records, legal and financial documents and other sources to uncover the complex story of one of Mississippi's most significant and vexing issues. This history closely examines specific events, the aftermath of the *Brown v Board of Education* decision, the 1966 protests and counterdemonstrations in Grenada and the efforts of particular organizations and carefully considers the broader picture. Despite a separate but equal doctrine established in the late nineteenth century, the state's racially divided school systems quickly developed vast differences in terms of financing, academic resources, teacher salaries and quality of education. As one of the nation's poorest states, Mississippi could not afford to finance one school system adequately, much less two. For much of the twentieth century, white people fought hard to preserve the dual school system in which the maintenance of one race schools became the most important measure of educational quality. Black people fought equally hard to end segregated schooling, realizing that their schools would remain underfunded and understaffed as long as they were not integrated.

Equal Educational Opportunity and Nondiscrimination for Students with Disabilities, 1997. This report focuses on issues relating to the development of individualized education programs for and placement of students who are classified as having mental retardation, learning disabilities, behavioral disabilities or serious emotional disturbances. The U.S. Commission on Civil Rights examined present day barriers and inequities that deny students with these types of disabilities an equal opportunity to participate in educational programs. The report analyzes and evaluates the Office for Civil Rights' OCR implementation, compliance and enforcement efforts for Section 504 of the Rehabilitation Act. It discusses other Federal disability laws such

as the Individuals with Disabilities Education Act IDEA and Title II of the Americans with Disabilities Act to the extent that they relate to Section 504

Class, Culture, and Race in American Schools Stanley Rothstein, 1995-03-23 Class culture and race have influenced the educational experiences of children for centuries As a new wave of Latin American and Asian peoples enters the United States public schools are faced with the challenge of educating children from a culture of poverty and who have varying racial and cultural backgrounds This reference work employs historical anthropological sociological and theoretical perspectives to overview current information on class culture and race in U S schools The volume is organized systematically with broad sections on class culture race and prospects for the future Each section begins with an introductory chapter that defines the theme of the section and places it within a larger context The chapters that follow then examine the impact of class culture or race on schooling with special regard to particular groups The volume focuses primarily on Hispanics African Americans and Asians as they struggle to survive and prosper in the United States Because of its approach the book is also a guide to the effects of poverty language and race on the educational experiences of children

Race Relations Litigation in an Age of Complexity Stephen L. Wasby, 1995 The first book length study of civil rights litigation from the late 1960s through the early 1980s Race Relations Litigation in an Age of Complexity fills a void in the scholarly literature on American courts and politics in the post Brown versus Board of Education era

Handbook of Research in the Social Foundations of Education Steven Tozer, Bernardo P. Gallegos, Annette Henry, Mary Bushnell Greiner, Paula Groves Price, 2011-07-05 This groundbreaking volume helps readers understand the history evolution and significance of this wide ranging often misunderstood and increasingly important field of study

School Choice Policies and Outcomes Walter Feinberg, Christopher Lubienski, 2008-10-16 Perhaps no school reform has generated as much interest and controversy in recent years as the proposal to have parents select their children s schools Opponents of school choice fear that rolling back the government s role will lead to profit driven financial scandals sectarianism and increased class and racial isolation School choice advocates believe that state provision oversight and regulation stifle entrepreneurial creativity The contributors to this volume not only provide a clear assessment of the logic and evidence supporting the different sides of the debate but also unmask the assumptions about the relationship between markets government and educational achievement Their

message is that neither markets nor government alone will guarantee freedom equality achievement or community If choice is to improve education and advance equality then educational policy cannot be placed on automatic and left to the free market Rather choice policy must be deliberately directed toward meeting these goals and this book shows how that could be accomplished Directory of Researchers in Educational Finance and Governance Susan J. Peters,1984 **Uncivil Rights** Jonna Perrillo,2024-05-31 Almost fifty years after Brown v Board of Education a wealth of research shows that minority students continue to receive an unequal education At the heart of this inequality is a complex and often conflicted relationship between teachers and civil rights activists examined fully for the first time in Jonna Perrillo s *Uncivil Rights* which traces the tensions between the two groups in New York City from the Great Depression to the present While movements for teachers rights and civil rights were not always in conflict Perrillo uncovers the ways they have become so brought about both by teachers who have come to see civil rights efforts as detracting from or competing with their own goals and by civil rights activists whose aims have de professionalized the role of the educator Focusing in particular on unionized teachers Perrillo finds a new vantage point from which to examine the relationship between school and community showing how in this struggle educators activists and especially our students have lost out
