John Conybeare [&c.]. Which will begin to be sold this day at T. Osborne's and J. Shipton's T. Osborne,1757    Volume 5, Tome II: Kierkegaard and the Renaissance and Modern Traditions - Theology Jon Stewart,2016-12-05 The long period from the Renaissance to the nineteenth century supplied numerous sources for Kierkegaard's thought in any number of different fields. The present rather heterogeneous volume covers the long period from the birth of Savonarola in 1452 through the beginning of the nineteenth century and into Kierkegaard's own time. The Danish thinker read authors representing vastly different traditions and time periods. Moreover he also read a diverse range of genres. His interests concerned not just philosophy, theology and literature but also drama and music. The present volume consists of three tomes that are intended to cover Kierkegaard's sources in these different fields of thought. Tome II is dedicated to the wealth of theological and religious sources from the beginning of the Reformation to Kierkegaard's own day. It examines Kierkegaard's relations to some of the key figures of the Reformation period from the Lutheran Reformed and Catholic traditions. It thus explores Kierkegaard's reception of theologians and spiritual authors of various denominations most of whom are known to history primarily for their exposition of practical spirituality rather than theological doctrine. Several of the figures investigated here are connected to the Protestant tradition of Pietism that Kierkegaard was familiar with from a very early stage. The main figures in this context include the forefather of Pietism Johann Arndt the Reformed writer Gerhard Tersteegen and the Danish author Hans Adolph Brorson. With regard to Catholicism Kierkegaard was familiar with several popular figures of Catholic humanism Post-Tridentine theology and Baroque spirituality such as François Fénelon Ludwig Blosius and Abraham a Sancta Clara. He was also able to find inspiration in highly controversial and original figures of the Renaissance and the early Modern period such as Girolamo Savonarola or Jacob Böhme the latter of whom was at the time an en vogue topic among trendsetting philosophers and theologians such as Hegel Franz von Baader Schelling and Hans Lassen Martensen.    Preaching During the English Reformation Susan Wabuda,2002-11-21 This is a study of the religious culture of sixteenth century England centred around preaching and is concerned with competing forms of evangelism between humanists of the Roman Catholic Church and emerging forms of Protestantism. More than any other authority Erasmus refashioned the ideal of the preacher. Protestant reformers adopted preaching Christ as their strategy to promote the doctrine of justification by faith. The apostolic traditions of the preaching chantries provided standards that evangelical reformers used to supplant the mendicant friars in England. The late medieval cult of the Holy Name of Jesus is explored the pervasive iconography of its symbol IHS became one of the attributes of moderate Protestant belief. The book also offers fresh perspectives on fifteenth and sixteenth century figures on every side of the doctrinal divide including John Rotheram John Colet Hugh Latimer and Anne Boleyn.    A Catalogue of Books for the Year 1813 (1815, 1818) in All the Branches of Science and Literature, Etc William Laing,1813
