Eric On The Red Planet:

Eric and the Red Planet Caroline Glicksman,2005 Eric is a very unusual bear He s red and he s very very clever especially with numbers He loves them so much that when he wins a tour of the Mars rocket he just can t resist pressing the flashing numbers on the control panel *NASA EP*. United States. National Aeronautics and Space Administration,1982

The Mars Millennium Project ,1999 *That's Weird!* Kendall F. Haven,2001 Readers can explore 16 of science s toughest mysteries through stories activities and examination of what scientists are doing to try to solve them **America in Space** Russell R. Tobias,1995-05-30 Thoroughly annotated entries are arranged by subject and indexed by author Most titles are generally available in public or college libraries the many NASA publications may be obtained from government depository libraries Intended as a research guide for high school and college students Annotation copyrighted by Book News Inc Portland OR *Mars* Markus Hotakainen,2010-03-11 This absorbing book tells the story of Mars since the dawn of mankind s curiosity for celestial wonders It covers everything right from our ancient beliefs through the revolution in our concepts of the cosmos around us in the 1600s to the present day knowledge and beyond It takes the reader on a journey all the way to the futuristic visions of science fiction and terraformed Mars with conditions suitable to Earth life The story is told in a readable form with an absence of technical jargon The text is supported by informative imagery and a simple but inspiring layout with some special features such as a flip movie of the rotation of Mars **Dying Planet** Robert Markley,2005-09-08 For more than a century Mars has been at the center of debates about humanity s place in the cosmos Focusing on perceptions of the red planet in scientific works and science fiction *Dying Planet* analyzes the ways Mars has served as a screen onto which humankind has projected both its hopes for the future and its fears of ecological devastation on Earth Robert Markley draws on planetary astronomy the history and cultural study of science science fiction literary and cultural criticism ecology and astrobiology to offer a cross disciplinary investigation of the cultural and scientific dynamics that have kept Mars on front pages since the 1800s Markley interweaves chapters on science and science fiction enabling him to illuminate each arena and to explore the ways their concerns overlap and influence one another He tracks all the major scientific developments from observations through primitive telescopes in the seventeenth century to data returned by the rovers that landed on Mars in 2004 Markley describes how major science fiction writers H G Wells Kim Stanley Robinson Philip K Dick Edgar Rice Burroughs Ray Bradbury Robert Heinlein and Judith Merrill responded to new theories and new controversies He also considers representations of Mars in film on the radio and in the popular press In its comprehensive study of both science and science fiction *Dying Planet* reveals how changing conceptions of Mars have had crucial consequences for understanding ecology on Earth *The Sirens of Mars* Sarah Stewart Johnson,2020 Mars was once similar to Earth but today there are no rivers no lakes no oceans Yet multiple spacecraft are circling Mars sweeping over Terra Sabaea Syrtis Major the dunes of Elysium and Mare Sirenum on the brink perhaps of a staggering find Johnson tells the story

of how she and other researchers have scoured Mars for signs of life She interlaces her journey as a female scientist with tales of other seekers to offer an unlikely natural history of a place where no human has ever set foot while providing a vivid portrait of our quest to defy our isolation in the cosmos adapted from jacket *George and the Ship of Time* Lucy Hawking,2020-07-28 George travels to the future in the epic conclusion of the George s Secret Key series from Lucy Hawking When George finds a way to escape the spacecraft Artemis where he has been trapped he is overjoyed But something is wrong There s a barren wasteland where his hometown used to be intelligent robots roam the streets and no one will talk to George about the Earth that he used to know With the help of an unexpected new friend can George find out what or who is behind this terrible new world before it s too late **The Stuff of Science Fiction** Gary Westfahl,2022-10-07 While students and general readers typically cannot relate to esoteric definitions of science fiction they readily understand the genre as a literature that characteristically deals with subjects such as new inventions space robot and aliens This book looks at science fiction in precisely this manner with twenty one chapters that each deal with a subject that is repeatedly addressed in science fiction of recent centuries Based on a packet of original essays that the author assembled for his classes the book could serve as a supplemental textbook in science fiction classes but also contains material of interest to science fiction scholars and others devoted to the genre In some cases chapters offer thorough surveys of numerous works involving certain subjects such as imagined vehicles journeys beneath the Earth and undersea adventures discovering intriguing patterns in the ways that various writers developed their ideas When comprehensive coverage of ubiquitous topics such as robots aliens and the planet Mars is impossible chapters focus on major themes referencing selected texts A conclusion discusses other science fiction subjects that were omitted for various reasons and a bibliography lists additional resources for the study of science fiction in general and the topics of each chapter Labyrinth of Night Allen Steele,2013-09-03 DIVDIV On Mars a research team encounters an ancient puzzle that only a guitarist can solve divDIV divDIV In 2029 an American research team ventures to Mars to investigate an astounding find a labyrinth older than humanity itself whose maze of rooms conceals the deepest secrets of the red planet In the final chamber strange music plays as chilling as it is beautiful It will be the last thing the scientist who discovers it ever hears As the music rises to a climax the chamber door closes leaving him to die in the pitch dark div Where one explorer has failed Ben Cassidy must not An internationally famous guitarist his music is the closest thing on Earth to Mars s deadly hymn The government sends him into space to solve a planetary mystery but what Cassidy encounters is a team of researchers whose jealous competition is every bit as dangerous as the secrets of Mars div Come Fly with Me! David C. Housel,Doreen K. M. Housel,1984 *Schoenberg's New World* Sabine Feisst,2011-03-10 This is a study dedicated to Schoenberg s life and music which dispels many myths and fills significant gaps in the existing literature on Schoenberg Drawing on much new information the book traces early Schoenberg pioneers in America who set the stage for Schoenberg s arrival in 1933 Taming Liquid Hydrogen: The Centaur Upper

Stage Rocket 1958-2002 ,2004 **The Doomsday Lobby** James T. Bennett,2010-09-11 Federal patronage of science was never contemplated by the framers of the Constitution but they did seek to promote the Progress of Science and useful Art by granting inventors patent rights However direct subvention to scientists and scientific organizations was not considered appropriate activity of the central government In the 19th Century American science was funded almost entirely through private investors Since WWII however the federal government has become the primary patron of American science From the race to space in the 1950s to current furor over global warming Bennett traces the subtle and not so subtle ways in which government has co opted scientific research and reinforced a culture in which challengers to proscribed wisdom are frozen out Citing original documents and media reports Bennett offers a compelling entertaining and thought provoking perspective on political influence on scientific research and its implications for a democratic society During the Nineteenth Century almost entirely on private funding American science grew from practically nothing to world class Now however over fifty percent of American science is funded by the federal government Dr Bennett traces the path crisis after crisis by which American science became practically an arm of the federal government His tale is a cautionary one warning against future crisis mongers who would extend the government s already majority control of American science even further His warning is a timely one and it should be heeded Joseph P Martino author of Science Funding Politics and Porkbarrel Bennett s latest book offers a challenging interpretation of the rise of the American federal science establishment since World War II Focusing primarily on the growth of the space program Bennett argues that crisis real or imagined is the source of state power and state funding for science The Doomsday Lobby offers what no doubt will be viewed as a controversial contribution to the history of American science policy and more broadly to an understanding of the role of the state in society James D Savage Professor of Politics University of Virginia and author of Funding Science in America **Global Life Systems**

Robert P. Clark,2000 Humans did not begin as a global species we had to expand to become one And we could not have done so without other living organisms becoming global along with us Robert P Clark develops in this book a global life systems perspective that delineates how biological forces mutually reinforce one another and what their globalization has meant for both human society and the biosphere While he resists biological determinism Clark traces interconnected developments among population disease agriculture trade fuels and other life systems to more thoroughly explore and elucidate the globalization of human endeavors within an ever evolving context of nature and environment His lucid and richly documented book offers a fresh look at social evolution and a broader basis for understanding the contemporary context for global change

Museum and Archive on the Move Oliver Grau,2017-09-11 The digital revolution fundamentally changed how cultural heritage is created documented analyzed and preserved The book focuses on this transformation s impact How must museums and archives meet the challenges of digitally generated cultures and how does the digital revolution influence traditional object collection research and education How do digital technologies and digital art and culture affect our

interaction with images Leading international experts from various disciplines break new ground Pioneering interdisciplinary research results collected in this book are relevant to education curators and archivists in the arts and culture sector and in the digital humanities

Evolutionary Theories and Religious Traditions Bernard Lightman, Sarah Qidwai, 2023-11-21 Before the advent of radio conceptions of the relationship between science and religion circulated through periodicals journals and books influencing the worldviews of intellectuals and a wider public In this volume historians of science and religion examine that relationship through diverse mediums geographic contexts and religious traditions Spanning within and beyond Europe and North America chapters emphasize underexamined regions New Zealand Australia India Argentina Sri Lanka Egypt and the Ottoman Empire and major religions of the world including Christianity Hinduism Buddhism Confucianism and Islam interactions between those traditions as well as atheism monism and agnosticism As they focus on evolution and human origins contributors draw attention to European scientists other than Darwin who played a significant role in the dissemination of evolutionary ideas for some those ideas provided the key to understanding every aspect of human culture including religion They also highlight central figures in national contexts many of whom were not scientists who appropriated scientific theories for their own purposes Taking a local national transnational and global approach to the study of science and religion this volume begins to capture the complexity of cultural engagement with evolution and religion in the long nineteenth century
