City Building on the Eastern Frontier Diane Shaw,2020-03-03 America s westward expansion involved more than pushing the frontier across the Mississippi toward the Pacific it also consisted of urbanizing undeveloped regions of the colonial states In 1810 New York s future governor DeWitt Clinton marveled that the rage for erecting villages is a perfect mania The development of Rochester and Syracuse illuminates the national experience of internal economic and cultural colonization during the first half of the nineteenth century Architectural historian Diane Shaw examines the ways in which these new cities were shaped by a variety of constituents founders merchants politicians and settlers as opportunities to extend the commercial and social

benefits of the market economy and a merchant culture to America's interior. At the same time she analyzes how these priorities resulted in a new approach to urban planning. According to Shaw, city founders and residents deliberately arranged urban space into three segmented districts: commercial, industrial, and civic, to promote a self-fulfilling vision of a profitable and urbane city. Shaw uncovers a distinctly new model of urbanization that challenges previous paradigms of the physical and social construction of nineteenth-century cities. Within two generations the new cities of Rochester and Syracuse were sorted at multiple scales including not only the functional definition of districts but also the refinement of building types and styles, the stratification of building interiors by floor, and even the coding of public space by class, gender, and race. Shaw's groundbreaking model of early nineteenth-century urban design and spatial culture is a major contribution to the interdisciplinary study of the American city.

Enterprising Waters Brad L. Utter, 2020-03-01. Chronicles the story of the Erie Canal from its inception to today. One of the largest public works projects in American history, the Erie Canal inspired a nationwide transportation revolution and directed the course of New York and American history. When completed in 1825, the engineering marvel unlocked the Western interior for trade and settlement; boomtowns sprang up along the canal's path, and New York City grew to be the nation's most powerful center of international trade. Millions of people poured into New York, and some through it, to take advantage of the tremendous opportunities provided by the canal, influencing settlement and the social, political, and commercial landscapes of America. Produced in honor of the bicentennial of the beginning of construction of the canal, *Enterprising Waters*, a companion catalog to the New York State Museum's exhibition of the same name, includes reproductions of objects and images from the collections of more than thirty-five different institutions and individual lenders. It also contains reproductions of fifty-nine works of art used in the companion exhibition, *Art of the Erie Canal*. Themes of politics, engineering, commerce, life on the canal, and more are paired with full-color images of artifacts, documents, and images to bring this unique American story to life from its inception to today. *Enterprising Waters* is like the Erie Canal itself: an ambitious achievement. Its spectacular visual images vividly portray the waterway's

material world as well as its artistic legacy while the accompanying text concisely covers two centuries of Erie Canal history. No matter how much or how little readers know already about New York's artificial waterways, they can learn from and enjoy this beautiful catalog. Carol Sheriff, author of *The Artificial River: The Erie Canal and the Paradox of Progress, 1817-1862*. A fine presentation in words and images of the great project that inspired New York and the nation. Gerard Koepfel, author of *Bond of Union: Building the Erie Canal and the American Empire*.
