Nevin, 1996 For most of his life Ernst Junger one of Europe's leading twentieth century writers has been controversial Renowned as a soldier who wrote of his experience in the First World War he has maintained a remarkable writing career that has spanned five periods of modern German history In this first comprehensive study of Junger in English Thomas R. Nevin focuses on the writer's first fifty years from the late Wilhelmine era of the Kaiser to the end of Hitler's Third Reich By addressing the controversies and contradictions of Junger a man who has been extolled despised denounced and admired throughout his lifetime *Ernst Junger and Germany* also opens an uncommon view on the nation that is if uncomfortably represented by him Ernst Junger is in many ways Germany's conscience and much of the controversy surrounding him is at its source measured by his relation to the Nazis and Nazi culture But as Nevin suggests Junger can more specifically and properly be regarded as the still living conscience of a Germany that existed before Hitler Although his memoir of service as a highly decorated lieutenant in World War I made him a hero to the Nazis he refused to join the party A severe critic of the Weimar Republic he has often been denounced as a fascist who prepared the way for the Reich but in 1939 he published a parable attacking despotism Close to the men who plotted Hitler's assassination in 1944 he narrowly escaped prosecution and death Drawing largely on Junger's untranslated work much of which has never been reprinted in Germany Nevin reveals Junger's profound ambiguities and examines both his participation in and resistance to authoritarianism and the cult of technology in the contexts of his Wilhelmine upbringing the chaos of Weimar and the sinister culture of Nazism Winner of Germany's highest literary awards Ernst Junger is regularly disparaged in the German press His

writings as this book indicates put him at an unimpeachable remove from the Nazis but neo Nazi rightists in Germany have rushed to embrace him Neither apology whitewash nor vilification Ernst Jünger and Germany is an assessment of the complex evolution of a man whose work and nature has been viewed as both inspiration and threat

who represented it were all unable to find the appropriate words In *The Language of Trauma* John Zilcosky uncovers the reactions of three major central European writers E T A Hoffmann Sigmund Freud and Franz Kafka to the birth of modern trauma in the nineteenth and early twentieth centuries Zilcosky makes the case that Hoffmann Freud and Kafka managed to find the language of trauma precisely by not attempting to name the trauma conclusively and instead allowing their writing to mimic the experience itself Just as the victims symptoms seemed not to correspond to a physical cause the writers words did not connect directly to the objects of the world While doctors attempted to overcome this indeterminacy these writers embraced and investigated it they sought a language that described language s tragic limits and that in so doing exemplified the wider literary and philosophical crisis of their time Zilcosky boldly argues that this linguistic scepticism emerged together with the medical inability to name the experience of trauma He thereby places trauma where it belongs at the heart of both medicine s diagnostic predicament and modern literature s most daring experiments

The Dawn of Political Nihilism Professor David Ohana, 2008-12-04 In the turbulent period between 1870 and 1930 the contours on modernity were taking shape especially the connections between technology politics and aesthetics The trilogy *The Nihilist Order* traces the genealogy of the nihilist totalitarian syndrome Until now nihilism and totalitarianism were considered opposites one an orderless state of affairs the other a strict regimented order On closer scrutiny however a surprising affinity can be found between these two concepts that dominated the history of the first half of the twentieth century Starting with Nietzsche s philosophy this book traces the development of an intellectual school characterised by the paradoxical dual purpose of a wish to destroy coupled with a strong desire to create imposing structures This explosive combination of nihilist leanings together with a craving for totalitarianism was an ideal of philosophers cultural critics political theorists engineers architects and aesthetes long before it materialised in flesh and blood not only in technology but also in fascism Nazism bolshevism and radical European political movements Friedrich Nietzsche Georges Sorel the Italian Futurists led by Filippo Tommaso Marinetti and Ernst J nger were all well known intellectual and cultural figures Here they are seen and understood in a different light as creators of a modern political mythology that became a source of inspiration for belligerent ideological camps Among the ideas propagated by this school and later adopted by totalitarian regimes were historical nihilism a revolt against the rationalistic and universalistic pretensions of the Enlightenment an affirmation of the dynamism of modern life and the replacement of the traditional Judeo Christian values of good and evil by other dualities such as authenticity and decadence Concurrently there took place affirmation of the technological era the creation of a new man and a violent order and the birth of a new political style in place of traditional world views When channelled into the political sphere these aesthetic nihilist ideas paved the way for the rise of totalitarianism

Literature as Document, 2019-03-19 *Literature as Document* considers the relationship between documents and literary texts in Western Literature of the 1930s More specifically the volume deals with the notion of the document and its multifaceted and complex connections to literary texts

and attempts to provide answers to the problematic nature of that relationship In an effort to determine a possible theoretical definition many different disciplines have been taken into account as well as individual case studies In order to observe dynamics and trends the idea for this investigation was to look at literature taking its practices its factual looking and concrete applications as a point of departure that is to say then starting from the literary object itself Joy in Work, German Work Joan Campbell,2014-07-14 This book analyzes in vivid detail the German debate about the importance and meaning of work as it changed under the impact of industrialization with special emphasis on the period between the two world wars A social history of ideas it covers the writings of such thinkers as Hegel Marx and Weber but also examines contributions made by industrial psychologists engineers educators and others who actively promoted reforms designed to solve the problem of alienation whether by changing the nature of work or by altering worker attitudes A final section deals with the National Socialists who promised to reinvigorate the German work ethic restore joy in work and reintegrate the German worker into the Volk community The author draws our attention particularly to the Third Reich s policies and institutions aimed at realizing these Nationalist Socialist objectives concerning the worker In so doing Joan Campbell shows how the history of the idea of work deepens our understanding of the origins nature and appeal of Nazism In a broader context she uses her sources to explore the relationship between social and intellectual change Originally published in 1989 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *The Forgotten Front* Gerhard P. Gross,2018-09-28 Although much has been written about the Western Front in World War I little attention has been given to developments in the east especially during the crucial period of 1914 1915 Not only did these events have a significant impact on the fighting and outcome of the battles in the west but all the major combatants in the east ultimately suffered collapses of their political systems with enormous consequences for the future events Available for the first time in English this seminal study features contributions from established and rising scholars from eight countries who argue German central and eastern European perspectives Together they illuminate diverse aspects of the Great War s Eastern Theater including military strategy and combat issues of national identity formation perceptions of the enemy and links to World War II They also explore the experiences of POWs and the representation of the Eastern Front in museums memorials and the modern media The scholarship on the First World War is dominated by the trauma of the modern technologized war in the west causing the significant political events and battles on the Eastern Front to shift to the background *The Forgotten Front* illuminates overlooked but vital aspects of the conflict and will be an essential resource for students and scholars seeking to better understand the war and its legacy Nihilist Order

Professor David Ohana, 2016-04-19 The explosive combination of nihilist leanings together with a craving for totalitarianism was an ideal of philosophers cultural critics political theorists engineers architects and aesthetes long before it materialised in flesh and blood not only in technology but also in fascism Nazism bolshevism and radical European political movements The Nihilist Order originally published in three hardcover volumes and now published in a consolidated paperback edition with an encompassing new Introduction inspired excellent review endorsements both amongst the academic and public spheres and has been heralded as a great achievement in European intellectual and cultural history **The Intellectual Resistance in Europe** James D. Wilkinson, 1981 Camus Sartre and Beauvoir in France Eich Richter and Boll in Germany Pavese Levi and Silone in Italy These are among the defenders of human dignity whose lives and work are explored in this widely encompassing work James D Wilkinson examines for the first time the cultural impact of the anti Fascist literary movements in Europe and the search of intellectuals for renewal for social change through moral endeavor during World War II and its immediate aftermath It was a period of hope Wilkinson asserts and not of despair as is so frequently assumed Out of the shattering experience of war evolved the bracing experience of resistance and a reaffirmation of faith in reason Wilkinson discovers a spiritual revolution taking place during these years of engagement and views the participants the engages as heirs of the Enlightenment Drawing on a wide range of published writing as well as interviews with many intellectuals who were active during the 1940s Wilkinson explains in the fullest context ever attempted their shared opposition to tyranny during the war and their commitment to individual freedom and social justice afterward Wilkinson has written a cultural history for our time His wise and subtle understanding of the long range significance of the engages is a reminder that the reassertion of humanist values is as important as political activism by intellectuals **Against the Titans** Peter Nguyen, 2020-07-15 Modern history has been marked by the emergence of the figure of the titan who yearns for self mastery in the face of death and who denounces modernity's tendency to reduce the individual to the lockstep of need and gratification But what of those few who rejected the impulses of the titan those militant desires to exert supremacy over all The story recounted in Against the Titans The Theology of the Martyrdom of Alfred Delp examines one martyr's rejection of the titan's perversion of heroism and sacrifice The life of Delp a Jesuit priest embodied a Christian theology of martyrdom articulated over against a virile fundamentalism that rejected divine sovereignty As Peter Nguyen S J shows Delp opposed Ernst Jünger's active nihilism by revealing a more authentic and no less demanding existence one that came not from acquiring self mastery but rather from an emptying out of self an indiferencia an unselfing through a radical dependence upon God Comparative Criticism: Volume 12, Representations of the Self E. S. Shaffer, 1990-09-27 This volume explores a theme that has become central in our time as the death of God is widely seen to be succeeded by the death of Man Our contributors set forth its urgency in a variety of contexts Among these Peter Stern gives the paradigmatic history of the bereft damaged and repudiated self in German philosophy and literature from Kleist to Ernst Jilnger In Not I Michael

Edwards pursues the theological and psychological consequences of a self without substance Peter France supplies a witty account of the marriage of self and commerce more at home in the eighteenth century tradition of British empiricism and the challenge of Rousseau's refusal of the terms of commerce Raman Selden explores views of the self from the Romantics to the poststructuralists Roger Cardinal probes the secret diary as the genre a contradiction in terms Stephen Bann explores the representations of Narcissus in recent psychoanalytic theory Other contributors include Pierre Dupuy David James Julie Scott Meisami Gregory Blue Mark Ogden and A D Nuttall

Literature and Film in the Third Reich Karl-Heinz Schoeps, 2004 This book is the first survey in English of literature and film in Nazi Germany It treats not only works sympathetic to National Socialism but also works of the so called Inner Emigration of the resistance and those written in prisons and concentration camps Much of this literature is not easily accessible in German and not available at all in English translation Historical and ideological context is provided in chapters covering influential works of the time such as Alfred Rosenberg's *The Myth of the Twentieth Century* and Houston Stewart Chamberlain's *The Foundations of the Nineteenth Century* Schoeps also analyzes Nazi cultural policies fascist histories of literature and the role of German studies and Germanists in the Nazi movement A major section of the book is devoted to film then a relatively new medium of communication whose propaganda value was clearly recognized by Goebbels the minister for propaganda and president of the Reich's Chamber of Culture One of the most interesting areas of research in recent years is the relationship between Hitler's cultural commissars in particular Goebbels and the literature and film production of the Nazi years This book is based on the revised and expanded second German edition *Literatur im Dritten Reich 1933-1945* but has again been revised and expanded especially the chapter on film and Nazi policies toward the film industry The chapter on cultural policies has also been expanded to include Himmler's efforts to meddle in this area New also are sections dealing with Jewish entertainers in concentration camps for example Kurt Gerron and activities of the Jewish Cultural League Karl Heinz Schoeps is professor of German at the University of Illinois at Urbana Champaign
