Eroding The Commons:

Eroding the Commons David Anderson, 2002 Colonial Baringo was in many respects an unexceptional place a backwater in the semi arid Rift Valley of Kenya lacking in cash crops and distant from larger markets But in the middle years of colonial rule Baringo's anonymity gave way to notoriety Prolonged drought and localized famine in the district from the mid 1920s led to claims that Baringo was a land of dramatic decay brought on by overcrowding and livestock mismanagement In response to the alarm over erosion the state embarked upon a programme for rehabilitation conservation and development Baringo's experience became a point of reference for similar programmes elsewhere in British Africa especially in the 1950s when state led rural development encompassed not just economic growth but an accelerated transformation of African society The politics of African nationalism was fuelled by opposition to colonial development policies and in Baringo the politics of the nationalist era was the politics of ecology The longevity of colonial interventions in Baringo provides an excellent focus for the study of the broader evolution of colonial ideologies and practices of development These ideologies and practices are fundamental to an understanding of the history of development in all parts of Africa *The Digital Condition* Felix

Stalder, 2018-03-16 Our daily lives our culture and our politics are now shaped by the digital condition as large numbers of people involve themselves in contentious negotiations of meaning in ever more dimensions of life from the trivial to the profound They are making use of the capacities of complex communication infrastructures currently dominated by social mass media such as Twitter and Facebook on which they have come to depend Amidst a confusing plurality Felix Stalder argues that are three key constituents of this condition the use of existing cultural materials for one's own production the way in which new meaning is established as a collective endeavour and the underlying role of algorithms and automated decision making processes that reduce and give shape to massive volumes of data These three characteristics define what Stalder calls the digital condition Stalder also examines the profound political implications of this new culture We stand at a crossroads between post democracy and the commons a concentration of power among the few or a genuine widening of participation with the digital condition offering the potential for starkly different outcomes This ambitious and wide ranging theory of our contemporary digital condition will be of great interest to students and scholars in media and communications cultural studies and social political and cultural theory as well as to a wider readership interested in the ways in which culture and politics are changing today

The Blue Commons Guy Standing, 2022-07-07 A FINANCIAL TIMES BEST ECONOMICS BOOK OF 2022 A landmark book The Blue Commons is at once a brilliant synthesis a searing analysis and an inspiring call to action David Bollier With remarkable erudition passion and lyricism Guy Standing commands the reader to wake up to the threat posed by rentier capitalism's violent policies for extraction exploitation and depletion of that which is both common to us all but also vital to our survival the sea and all within it Ann Pettifor Shines a bright light on the economy of the oceans directing us brilliantly towards where a sustainable future lies Danny Dorling This is a powerful visionary book

essential reading for all who yearn for a better world Jason Hickel The sea provides more than half the oxygen we breathe food for billions of people and livelihoods for hundreds of millions But giant corporations are plundering the world's oceans aided by global finance and complicit states following the neoliberal maxim of Blue Growth The situation is dire rampant exploitation and corruption now drive all aspects of the ocean economy destroying communities intensifying inequalities and driving fish populations and other ocean life towards extinction The Blue Commons is an urgent call for change from a campaigning economist responsible for some of the most innovative solutions to inequality of recent times From large nations bullying smaller nations into giving up eco friendly fishing policies to the profiteering by the Crown Estate in commandeering much of the British seabed the scale of the global problem is synthesised here for the first time as well as a toolkit for all of us to rise up and tackle it The oceans have been left out of calls for a Green New Deal but must be at the centre of the fight against climate change How do we do it By building a Blue Commons alternative a transformative worldview and new set of proposals that prioritise the historic rights of local communities the wellbeing of all people and with it the health of our oceans

Resilience and Collapse in African Savannahs Michael Bollig, David M. Anderson, 2018-10-11 This book assesses the causes and consequences of environmental change in East Africa asking whether local African communities are sufficiently resilient to cope with the ecological and social challenges that confront them It focuses on the savannahs of the Baringo Bogoria basin and the surrounding highlands of Kenya's northern Rift Valley that form the social ecological system of the specialised cattle pastoralists and niche agricultural farmers who occupy these semi arid lands Historical studies of resilience spanning the past two centuries are linked with analysis of current environmental challenges and the ecological social economic and political responses mounted by local communities The authors question whether the most recent challenges confronting the peoples of eastern Africa's savannahs intensified conflicts mounting poverty driven by demographic pressures and dramatic ecological changes brought by invasive species might soon lead to a collapse in essential elements of the specialised cattle pastoralism that dominates the region requiring a re-orientation of the social ecological system This book was originally published as a special issue of the Journal of Eastern African Studies

The Commons and a New Global Governance Samuel Cogolati, Jan Wouters, 2018-12-28 Given the new found importance of the commons in current political discourse it has become increasingly necessary to explore the democratic institutional and legal implications of the commons for global governance today This book analyses and explores the ground breaking model of the commons and its relation to these debates

Plunder of the Commons Guy Standing, 2019-08-29 One of the most important books I've read in years Brian Eno We are losing the commons Austerity and neoliberal policies have depleted our shared wealth our national utilities have been sold off to foreign conglomerates social housing is almost non-existent our parks are cordoned off for private events and our national art galleries are sponsored by banks and oil companies This plunder deprives us all of our common rights recognized as far back as the Magna Carta and the Charter of the Forest of

1217 to share fairly and equitably in our public wealth Guy Standing leads us through a new appraisal of the commons stemming from the medieval concept of common land reserved in ancient law from marauding barons to his modern reappraisal of the resources we all hold in common a brilliant new synthesis that crystallises quite how much public wealth has been redirected to the 1% in recent decades through the state approved exploitation of everything from our land to our state housing health and benefit systems to our justice system schools newspapers and even the air we breathe Plunder of the Commons proposes a charter for a new form of commoning of remembering guarding and sharing that which belongs to us all to slash inequality and soothe our current political instability **Routledge Handbook of the Study of the Commons**

Blake Hudson, Jonathan Rosenbloom, Dan Cole, 2019-01-04 This comprehensive Handbook serves as a unique synthesis and resource for understanding how analytical frameworks developed within the literature assist in understanding the nature and management of commons resources Such frameworks include those related to Institutional Analysis and Development Social Ecological Systems and Polycentricity among others The book aggregates and analyses these frameworks to lay a foundation for exploring how they apply according to scholars across a wide range of disciplines It includes an exploration of the unique problems arising in different disciplines of commons study including natural resources forests oceans water energy ecosystems etc economics law governance the humanities and intellectual property It shows how the analytical frameworks discussed early in the book facilitate interdisciplinarity within commons scholarship This interdisciplinary approach within the context of analytical frameworks helps facilitate a more complete understanding of the similarities and differences faced by commons resource users and managers the usefulness of the commons lens as an analytical tool for studying resource management problems and the best mechanisms by which to formulate policies aimed at addressing such problems Chapter 26 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Population, Tradition, and Environmental Control in Colonial Kenya Martin S. Shanguhya, 2015 Examines land management programs pushed by the colonial government in western Kenya between 1920 and 1963 analyzing how those programs were negotiated or contested by the local community **Resource Efficiency Complexity and the Commons** Bruce Lankford, 2013-09-05 The efficient use of natural resources is key to a sustainable economy and yet the complexities of the physical aspects of resource efficiency are poorly understood In this challenging book the author proposes a major advance in our understanding of this topic by analysing resource efficiency and efficiency gains from the perspective of common pool resources applying this idea particularly to water resources and its use in irrigated agriculture The author proposes a novel concept of the paracommons through which the savings of increased resource efficiency can be viewed In effect he asks who gets the gain of an efficiency gain By reusing economising and avoiding losses wastes and wastages freed up resources are available for further use by four destinations the same user parties directly connected to that user the wider economy or

returned to the common pool The paracommons is thus a commons of and competition for resources salvaged by changes to the efficiency of natural resource systems The idea can be applied to a range of resources such as water energy forests and high seas fisheries Five issues are explored the complexity of resource use efficiency the uncertainty of efficiency interventions and outcomes destinations of freed up losses wastes and wastages implications for resource conservation and the interconnectedness of users and systems brought about by efficiency changes The book shows how these ideas put efficiency on a par with other dimensions of resource governance and sustainability such as equity justice resilience and access

Governing the Commons in China Yan Zhang, 2017-01-20 The idea of the commons is a long standing concept in the English speaking world and in English law A similar concept occurs in China How different from or similar to the English idea of the commons is the idea in China and how is the concept applied This book explores this important subject It examines the subject from a philosophical and theoretical perspective considers the commons widely including tangible commons of resources intangible commons of culture identity and social capital and institutional commons of welfare security and public goods and goes on to examine the concept as it applies to the hydropower developments along the Lancang River outlining the different competing interests of local people central and provincial government and environmental considerations It argues that the concept of the commons in China is dual dimensional with a vertical dimension of public authority and a horizontal dimension of commonly sharing that power structures in China have often been flexible and polycentric and that correctly applied this approach will do much to serve the common interest of the people ensuring positive impacts for shared prosperity for multiple stakeholders whilst mitigating

the negative impacts involved in the delivery of such positive impacts **Knowledge, Power, and a Region** Getnet Bekele, 2005 From Capital to Commons Hannes Gerhardt, 2024-11-12 A Choice Outstanding Academic Title in Economics 2023 In this stimulating analysis Hannes Gerhardt outlines the potentials and challenges of a technology enabled commons focused transition out of capitalism The book shows that openness and cooperation are more beneficial in today's economies and societies than competition and profit seeking Driven by this conviction Gerhardt identifies key imperatives for overcoming capitalism from democratizing our digital material and financial economies to maintaining a robust political mobilization Using clear examples he explores tactical openings through the lens of compeerism a newly constructed framework that highlights the latent counter capitalist possibilities but also limits of our emerging technological landscape This is an accessible contribution to counter capitalist discourse that is both inspiring and pragmatic for academics and activists alike **Implementing the Endangered Species Act on the Platte Basin Water Commons** David M.
