Criminalising Harmful Conduct Nina Persak, 2007-06-04 Dr Nina Persak's work addresses the criteria for criminalisation that is the criteria that should be employed in determinations whether to prohibit conduct through the criminal law It is explicitly normative in approach examining what should be the proper basis for criminalisation rather than what factors legislatures actually tend to consider in adopting criminal prohibitions Its focus is on the Harm Principle that has been developed in Anglo American philosophy of criminal law and on how this principal might illuminate the Continental debate on criminalisation As such this is a work on normative criminal law theory Hitherto there has existed no extended English language treatment comparing Anglo American and Continental theories of criminalisation An important strength of Dr Persak's analysis lies in success in integrating themes from the two bodies of theory the Anglo American and the Continental She begins with the Harm Principle and scrutinises its main criterion the conduct's intrusion into the interests of other persons She undertakes a careful dissection of this criterion e.g. what constitutes harm and what is the scope of others and whether and to what extent the latter includes collective interests This discussion provides not only a thoughtful analysis of the Harm Principle itself it also provides her with the basis of her critique later in the volume of Continental criminalisation theories

Kafka's Law Robert P. Burns, 2014-09-02 *The Trial* is actually closer to reality than fantasy as far as the client's perception of the system It's supposed to be a fantastic allegory but it's reality It's very important that lawyers read it and understand this Justice Anthony Kennedy famously offered this assessment of the Kafkaesque character of the American criminal justice system in 1993 While Kafka's vision of the Law in *The Trial* appears at first glance to be the antithesis of modern American legal practice might the characteristics of this strange and arbitrary system allow us to identify features of our own system that show signs of becoming similarly nightmarish With *Kafka's Law* Robert P. Burns shows how *The Trial* provides an uncanny lens through which to consider flaws in the American criminal justice system today Burns begins with the story at once funny and grim of Josef K caught in the Law's grip and then crushed by it Laying out the features of the Law that eventually destroy K Burns argues that the American criminal justice system has taken on many of these same features In the overwhelming majority of contemporary cases police interrogation is followed by a plea bargain in which the court's only function is to set a largely predetermined sentence for an individual already presumed guilty Like Kafka's nightmarish vision much of American criminal law and procedure has become unknowable ubiquitous and bureaucratic It too has come to rely on deception in dealing with suspects and jurors to limit the role of defense and to increasingly dispense justice without the protection of formal procedures But while Kennedy may be correct in his grim assessment a remedy is available in the tradition of trial by jury and Burns concludes by convincingly arguing for its return to a more central place in American criminal justice
