Eryri, the Mountains of Longing Amory B. Lovins, 1971      Eryri Amory Bloch Lovins, 1971      Eryri, Parc Dan Bwysau Rob Collister, 2007 The story of the Snowdonia National Park and the Society dedicated to conserving and enhancing its unique landscape is one which will fascinate and inform those who live and work within it as well as being of interest to visitors be they picnickers or sightseers or committed hill walkers climbers canoeists and mountain bikers This book commemorates the fortieth anniversary of the Snowdonia Society and is a record of its sometimes turbulent history and the ever changing but still inspiring landscape of the National Park The vision of its founders was that this very special region should be protected from harmful development for all time From the beginning however there were problems Out of these difficulties grew the idea of an independent society dedicated to conserving and enhancing the landscape      Great Mountain Days in Snowdonia Terry Marsh, 2011-06-07 A guidebook to 40 great mountain walks and scrambles in Snowdonia The inspirational routes in this larger format book range right across the Snowdonia National Park and are divided into 8 geographical regions Snowdon and Moel Eilio the Glyderau the Carneddau Eifionydd Siabod and the Moelwynion Rhinogydd the Harlech Dome Migneint and the Arans and Cadair Idris and the Tarrens All routes are graded from moderate to strenuous and illustrated with Harvey map extracts topo diagrams by Mark Richards and lots of stunning photographs Some routes include mild scrambling or long days in rugged country and many can be enjoyed all year round The walks have been chosen to encourage you to try something new in this much loved region while at the same time offering clear descriptions of classic routes for those new to Snowdonia      **Harvard Mountaineering** Harvard Mountaineering Club, 1975      **On the Nature of Ecological Paradox** Michael Charles Tobias, Jane Gray Morrison, 2021-05-18 This work is a large powerfully illustrated interdisciplinary natural sciences volume the first of its kind to examine the critically important nature of ecological paradox through an abundance of lenses the biological sciences taxonomy archaeology geopolitical history comparative ethics literature philosophy the history of science human geography population ecology epistemology anthropology demographics and futurism The ecological paradox suggests that the human biological and from an insular perspective successful struggle to exist has come at the price of isolating *H sapiens* from life sustaining ecosystem services and far too much of the biodiversity with which we find ourselves at crisis level odds It is a paradox dating back thousands of years implicating millennia of human machinations that have been utterly ruinous to biological baselines Those metrics are examined from numerous multidisciplinary approaches in this thoroughly original work which aids readers particularly natural history students who aspire to grasp the far reaching dimensions of the Anthropocene as it affects every facet of human experience past present and future and the rest of planetary sentience With a Preface by Dr Gerald Wayne Clough former Secretary of the Smithsonian Institution and President Emeritus of the Georgia Institute of Technology Foreword by Robert Gillespie President of the non profit Population Communication      **Mountain**, 1973      *David Brower* Tom

**The Man Who Built the Sierra Club** Robert Wyss,2016-06-07 David Brower 1912 2000 was a central figure in the modern environmental movement His leadership vision and elegant conception of the wilderness forever changed how we approach nature In many ways he was a twentieth century Thoreau Brower transformed the Sierra Club into a national force that challenged and stopped federally sponsored projects that would have dammed the Grand Canyon and destroyed hundreds of millions of acres of our nation s wilderness To admirers he was tireless passionate visionary and unyielding To opponents and even some supporters he was contentious and polarizing As a young man growing up in Berkeley California Brower proved himself a fearless climber of the Sierra Nevada s dangerous peaks After serving in the Tenth Mountain Division during World War II he became executive director of the Sierra Club This uncompromising biography explores Brower s role as steward of the modern environmental movement His passionate advocacy destroyed lifelong friendships and at times threatened his goals Yet his achievements remain some of the most important triumphs of the conservation movement What emerges from this unique portrait is a rich and robust profile of a leader who took up the work of John Muir and along with Rachel Carson made environmentalism the cause of our time

**Promising the Earth** Robert Lamb,2012-11-12 This is a tale of our times marking the 25th anniversary of Friends of the Earth Promising the Earth locates the inside story of pioneering campaigns within a broader canvas No single organization s record can expect to paraphrase the development of environmental consciousness and the growth of grassroots environmental movement but experiences bear intimate witness to a story that is still unfolding Enlivened by arresting illustrations and glimpses of colourful personalities that the issues of the day have brought to the fore Promising the Earth takes stock of changing realities in and attitudes to environmental care over the past quarter century This eventful chronical acts as a platform from which to survey the future that lies beyond the threshold of the 21st century
