*Effective Management and the Behavioral Sciences* William Dowling, 1978      *Effective Management and the Behavioral Sciences* William Dowling ((editor)), 1978      *Effective Management Teams and Organizational Behavior* Henning Bang, Thomas Nasset Midelfart, 2021-02-25

Most contemporary organizations use management teams to manage and coordinate their businesses at all levels of the organizational hierarchy. Management teams typically set overall goals, strategies, and priorities, making vital organizational decisions. They discuss issues, solve problems, offer advice, and ensure various processes and units are aligned and interact efficiently. Although management teams are vital for overall organizational performance, research indicates that they are largely underused and less effective than their potential would suggest for value creation. This book provides a research-based and practical model of the characteristics of effective management teams. It looks in depth at each factor of the model, discusses the supporting research, provides examples of how the factors influence the work and effectiveness of management teams, and shares tips and tools for successfully working with management team development. It provides researchers, academics, and students of organizational behavior with an overview of the variables that empirical research has found to be robustly related to management team effectiveness and will enable leaders and management consultants to develop more effective management teams.

*Implementing Effective School-wide Student Discipline and Behavior Management Systems:* Dr. Howie Knoff, 2009-02-02

Today's school-wide Positive Behavioral Support approaches are more specific, integrated, effective, and comprehensive than ever before. This Electronic Book (E-Book) describes the components and specific elements of Project ACHIEVE's evidence-based Positive Behavioral Self-Management System (PBSS) that addresses the prevention, intervention, and intensive needs of challenging students and is fully consistent with NCLB and IDEA. Project ACHIEVE is a national award-winning school improvement program that has been designated as an evidence-based program through two federal agencies—for example, the Department of Health & Human Services. It teaches teachers the instructional self-management skills that they need to run positive, effective classrooms that consistently hold students accountable for their behavior and that result in student learning and behavioral growth and teaches school staff organizational self-management skills so that they develop the systemic approaches needed for identifying resources and building capacity to independently sustain successful building-wide services for the prevention, strategic intervention, and intensive support needs of all students. The six critical components that make up the PBSS then are presented in detail: a) the Stop b) the development of grade-level and building-wide accountability systems; c) how to increase staff and student consistency; d) the analysis of "special situations" (behavioral situations that occur in the common areas of a school and/or that involve peer-mediated teasing, taunting, bullying, harassment, and physical aggression); e) crisis prevention, intervention, and response; and f) the importance of home and community outreach. Finally, the E-Book focuses specifically on "Special Situations" and "Special Situation Analyses." There are two

types of Special Situations Setting specific and Student or Peer specific The Setting specific Special Situations involve the common or public areas of a school the hallways bathrooms cafeteria playground media center library buses and other school gathering places The Student or Peer specific Special Situations involve the continuum from teasing to taunting to bullying to harassment to physical aggression or fighting Clearly these setting and student situations are critical to a PBSS as they can positively contribute to a school's positive climate or they can negatively interfere with the classroom climate making it more difficult for students to be completely engaged and focused on academic achievement In order to develop strategic interventions for these negative special situations this E Book describes how to conduct a Special Situations Analysis a systematic data based problem solving process that links Problem Identification to Functional Assessment Problem Analysis to Intervention and to Formative and Summative Evaluations The Functional Assessment Problem Analysis domains discussed will include a Student Characteristics Issues and Factors b Teacher Staff Characteristics Issues and Factors c Environmental Characteristics Issues and Factors Physical Plant and Logistics d Incentives and Consequences and e Resources For Student specific Special Situations the Peer Group is added to the analysis In the end this E Book describes a functional effective and comprehensive school wide system that maximizes students' academic achievement creates safe school environments and positive school climates increases and sustains effective classroom instruction and parent involvement and collects data to demonstrate student and building outcomes This E Book describes the necessary components of a PBSS and provides an in depth and practical step by step approach to the Special Situation Analysis demonstrating its explicit link with the strategic interventions that help schools to decrease or eliminate these issues thus increasing their positive and productive school climates and classroom settings
