Management Thomas Rolf,2004-01-30 Inhaltsangabe Abstract The submitted dissertation critically discusses business
models in the context of customer dimensions under uncertain market conditions The following questions summarise the
fields of investigation How do business models adapt to rapidly changing and buyer driven markets What are the next two
steps after Customer Relationship Management Can the gap in the process chain between Customer Relation Management
and Supply Chain Management be bridged and how How can a method be developed in order to measure the current
customer orientation of a company and to compare companies among each other Are customer oriented companies more
profitable As a deductive research approach is used beneath a small number of inductive elements an investigation in both
secondary and primary data is imperative Subsequently a critical review of related literature along with a supporting inquiry
is part of the dissertation The scope of the work includes background information the discussion of future business models as
well as an empiric impression of customer orientation in German small and medium sized enterprises The most significant
conclusions can be recapitulated as follows Simple customer orientation can lead to less innovation furthermore to
unprofitable business and in the worst case to the elimination of a company Customer oriented strategy is about building
processes that are able to react to any environmental or economical modification as fast as possible The evolution of
Customer Relation Management will lead to new customer driven and pulled business models including innovative
measurement methods like Return on Customer The gap between Customer Relation Management and Supply Chain
Management will in all probability be bridged new concepts e g Customer Chain Management will represent this task A
balanced Customer Centric Index developed as a benchmark instrument as part of the dissertation shows that only a third of
the examined companies can be interpreted as customer oriented on the other hand Sales Marketing is regarded as the
initial and most influencing process A statistical connection between being customer oriented and profit could not be proved
As a surprising and unintentional result the survey revealed that focusing on a small market niche is at least for SME a more
profitable business Eventually the dissertation leaves behind additional questions that could not be *Public Service*

Crandall, William Crandall, 2015-02-01 All organizations operate in an environment that is rapidly changing To be successful the organization must also change The question is what to change and how This book will describe in some detail a number of management programs many of which are known by their three letter acronyms such as Just in Time JIT or Service Oriented Architecture SOA A management program is designed to improve an organization's effectiveness and efficiency However there are so many management programs it is often difficult for managers to decide which one would be most appropriate for their operation This book will describe an array of management programs and group them to indicate their primary purpose The book will also outline a process that will enable managers to select the most appropriate management program to meet their immediate and long term needs Implementing a management program is no small task It can be expensive time consuming and disruptive of normal operations therefore the choice of the management program requires careful selection and implementation Care must be taken to increase the likelihood of successfully implementing new ventures in all types of organizations business nonprofit and governmental agencies Many ventures fail or achieve limited success not because the idea isn't good but because the organization has not adequately prepared its internal capabilities to meet the environmental conditions in which it operates An important feature of this book is that it can be updated periodically to add new programs and phase out programs no longer relevant The book will provide readers with a comprehensive description of the most popular management improvement programs and their primary applications to their organizations We will discuss the philosophy and principles of these programs and include a discussion on how to use each program to achieve optimum success A central theme of this book is to not just adopt an improvement program for the sake of adopting it but to match the improvement program with the specific needs in an organization In the chapters that follow we will illustrate how this matching process can be conducted Above all we plan the book to be a concise and useful resource to both practitioners and academics Here is what you can expect in the chapters
