Egyptian Revival Omar Khalil, The fascination with Ancient Egypt has influenced architectural and artistic movements for centuries culminating in what is known as the Egyptian Revival This movement characterized by its adaptation of ancient Egyptian motifs emerged in

response to rediscoveries of Egypt's past. The revival gained traction during the 18th and 19th centuries driven by archaeological discoveries, historical curiosity, and a growing appreciation for non-European artistic traditions. One of the key moments that ignited interest in Ancient Egypt was Napoleon Bonaparte's Egyptian campaign, 1798-1801. This military expedition was not just an act of conquest but also a scientific endeavor that brought scholars, artists, and historians to document Egypt's ancient ruins. The most significant outcome of this campaign was the publication of the *Description de l'Égypte*, a comprehensive collection of illustrations and studies that introduced Europe to the architectural grandeur of Egypt. The discovery of the Rosetta Stone in 1799 further fueled this fascination as it eventually led to the deciphering of Egyptian hieroglyphics, allowing deeper insights into the civilization's history and culture. The widespread enthusiasm for Ancient Egypt in the early 19th century gave rise to what historians call **Egyptomania**. This cultural phenomenon influenced literature, fashion, decorative arts, and architecture. Egyptian imagery, including sphinxes, obelisks, and pyramidal forms, began to appear in European cityscapes. The influence was particularly noticeable in monumental architecture where designers sought to capture the imposing and symbolic nature of ancient Egyptian structures. The fascination with Egypt was further fueled by colonial expansion as European powers took a vested interest in the region's antiquities.

The Egyptian Revival James Stevens Curl, 2013-04-03. In this beautifully illustrated and closely argued book, a completely updated and much expanded third edition of his magisterial survey, Curl describes in lively and stimulating prose the numerous revivals of the Egyptian style from Antiquity to the present day. Drawing on a wealth of sources, his pioneering and definitive work analyzes the remarkable and persistent influence of Ancient Egyptian culture on the West. The author deftly develops his argument that the civilization of Ancient Egypt is central rather than peripheral to the development of much of Western architecture, art, design, and religion. Curl examines the persistence of Egyptian motifs in design from Graeco-Roman Antiquity through the Medieval, Baroque, and Neo-Classical periods, the rise of Egyptology in the nineteenth and twentieth centuries, manifestations of Egyptianisms prompted by the discovery of Tutankhamun's tomb, various aspects of Egyptianizing tendencies in the Art Deco style, and afterwards. For students of art, architectural and ancient history, and those interested in western European culture, generally, this book will be an inspiring and invaluable addition to the available literature.

Old House Interiors, 2001-12. National architectural magazine now in its fifteenth year, covering period inspired design 1700-1950. Commissioned photographs show real homes inspired by the past but livable. Historical and interpretive rooms are included; new construction additions and new kitchens and baths take their place along with restoration work. A feature on furniture appears in every issue. Product coverage is extensive. Experts offer advice for homeowners and designers on finishing, decorating, and furnishing period homes of every era. A garden feature, essays, archival material, events, and exhibitions, and book reviews round out the editorial. Many readers claim the beautiful advertising, all of it design-related, no lifestyle ads, is as important to them as the articles.
