Eiffel Target:

The Eiffel Target John Vincent, 1992 The foul Dr Derange and his creepy partner Skullcap have planted a nuclear bomb in the Eiffel Tower Their goal is to start a world war and bring about global chaos Representations, Targets, and Attitudes Robert Cummins, 1996 What is it for something in the mind to represent something Distinguished philosopher of mind Robert Cummins looks at the familiar problems of representation theory what information is represented in the mind what form mental representation takes how representational schemes are implemented in the brain what it is for one thing to represent another from an unprecedented angle Instead of following the usual procedure of defending a version of indicator semantics Cummins begins with a theory of representational error and uses this theory to constrain the account of representational content Thus the problem of misrepresentation which plagues all other accounts is avoided at the start Cummins shows that representational error can be accommodated only if the content of a representation is intrinsic independent of its use and causal role in the system that employs it Cummins s theory of error is based on the teleological idea of a target an intentional concept but one that differs importantly from that of an ordinary intentional object Using this notion he offers a schematic theory of representation and an account of propositional attitudes that takes exception with some popular positions such as conceptual role semantics Fodor s representational theory of the mind and Putnam s twin earth examples A Bradford Book Representation and Mind series **Model Driven Architecture for Reverse**
