**Becoming a Mathematician** Leigh N Wood, Peter Petocz, Anna Reid, 2012-02-13 This book considers the views of participants in the process of becoming a mathematician that is the students and the graduates This book investigates the people who carry out mathematics rather than the topics of mathematics Learning is about change in a person the development of an identity and ways of interacting with the world It investigates more generally the development of mathematical scientists for a variety of workplaces and includes the experiences of those who were not successful in the transition to the workplace as mathematicians The research presented is based on interviews observations and surveys of students and graduates as they are finding their identity as a mathematician The book contains material from the research carried out in South Africa Northern Ireland Canada and Brunei as well as Australia

**Teaching and Learning in Higher Education** Elizabeth Cleaver, Maxine Lintern, Mike McLinden, 2014-03-31 In today's higher education climate academic staff are encouraged to focus not only on the up to date content of their teaching but also to identify the most effective ways to engage students in learning often alongside other key transferrable skills This has led to a growing requirement for staff to adopt a scholarly approach to learning and teaching practice and to undertake scholarship of learning and teaching as part of ongoing professional development This text explores broad best practice approaches to undertaking enquiry into learning and teaching in higher education It provides an introduction for staff who have been educated within a range of academic disciplines often with high level but very focused knowledge about and understandings of research processes to the potentially new world of educational enquiry This is complemented by chapters exploring what educational enquiry means in the context of different academic disciplines including physical sciences mathematics engineering the life sciences the arts the humanities the health professions and law It also includes An overview of research methodology including data collection literature reviews good ethical practice and research dissemination Case studies of actual research projects to support understanding of how to carry out educational enquiry in practice Lecturers why waste time waiting for the post arrive Request and receive your e inspection copy today

**Implementing Communities of Practice in Higher Education** Jacquie McDonald, Aileen Cater-Steel, 2016-11-23 In this edited collection the authors pick up the communities of practice CoP approach of sharing practice in their reflection on the experience of taking their CoP vision from a dream to reality Their stories articulate the vision the passion and the challenge of working within and or changing existing institutional culture and practice The book discusses strategies that

worked and considers the lessons learnt to inspire future dreamers and schemers The multiple perspectives provided in the case studies will assist higher education leaders as well as academic and professional staff in establishing or assessing CoPs The book offers insights into implementation strategies practical guidelines and ideas on how CoP theoretical underpinnings can be tailored to the higher education context *Mathematicians' Reflections on Teaching* Sepideh Stewart,2023-08-07 This book opens the case on collaboration among mathematicians and mathematics educators The authors of this book provide their research and experience based insights on collaboration to inspire the young generation of the mathematics community to engage in productive collaborations and exchange of knowledge early in their careers These valuable collaborations are anticipated to generate innovative research questions that set new and novel paths for mathematics education research with ample possibilities yet to be realized and discovered Mathematical Modelling in Education and Culture Q-X Ye,W Blum,S K Houston,Q-Y Jiang,2003-05-01 The mathematical modelling movement in mathematics education at school and university level has been influencing curricula for about 25 years Lecturers will find material to enhance their teaching and extracurricular activities and educators will find innovative ideas to inform their course design and focus their research while students will find interesting problems to explore Helps lecturers enhance their teaching and extracurricular activities Provides educators with innovative ideas to inform their course design and focus their research Students will find interesting problems to explore Which Way Social Justice in Mathematics Education? Leone Burton,2003-02-28 This contributed volume explores equity and social justice within the field of mathematics education In part one Helga Jungwirth's introductory chapter provides a strong theoretical overview that is based in actual classroom behaviors and a typology that classifies the various interpretations found within this volume Also in part one Laurie Hart discusses developments in equity research in the United States Part two focuses on results of studies about social justice and their impact on learning in mathematics classrooms in various parts of the world For example in a chapter on Peru social justice does not just encompass gender but also inequalities in opportunities to learn such as problems of resources living and social conditions communal demands and language needs And part three focuses on computers as a resource to mathematics teaching The contributors raise several important social justice issues which have previously remained unresearched Although there are a number of chapters specifically dealing with gender many of the authors use one of the following strategies their gender specific questions are set in a wider socio cultural context they challenge what have threatened to become false orthodoxies or they raise other important issues These other issues include the meaning of democratic citizenship for mathematics classrooms the links between parents and children learning mathematics and the preconceptions of some teachers of underprivileged students in Australia Other chapters explore different forms of classroom communication participation and assessment The pieces on computers state that there is still not enough research to conclude whether computers in the mathematics classrooms are supportive of or detrimental to the learning of all students The one thing on which every author

in this volume does agree is that social justice in mathematics education has still not been attained but that we must strive toward it to improve educational practices and society in general

**A Handbook for Teaching and Learning in Higher Education** Heather Fry, Steve Ketteridge, Stephanie Marshall, 2003-12-16 First Published in 2002 Routledge is an imprint of Taylor Francis an informa company

Second International Handbook of Mathematics Education Alan Bishop, M.A. (Ken) Clements, Christine Keitel-Kreidt, Jeremy Kilpatrick, Frederick Koon-Shing Leung, 2012-02-02 ALAN 1 BISHOP The first International Handbook on Mathematics Education was published by Kluwer Academic Publishers in 1996 However most of the writing for that handbook was done in 1995 and generally reflected the main research and development foci prior to 1994 There were four sections 36 chapters and some 150 people contributed to the final volume either as author reviewer editor or critical friend The task was a monumental one attempting to cover the major research and practice developments in the international field of mathematics education as it appeared to the contributors in 1995 Inevitably there were certain omissions some developments were only starting to emerge and some literatures were only sketchy and speculative However that Handbook has had to be reprinted three times so it clearly fulfilled a need and I personally hope that it lived up to what I wrote in its Introduction The Handbook thus attempts not merely to present a description of the international state of the field but also to offer synthetic and reflective overviews on the different directions being taken by the field on the gaps existing in our present knowledge on the current problems being faced and on the future possibilities for development Bishop et al 1996 Since that time there has been even more activity in our field and now seems a good time to take stock again to reflect on what has happened since 1995 and to create a second Handbook with the same overall goals

**Developing Your Teaching** Peter Kahn, 2006-09-27 For new as well as more experienced lecturers this motivational book is packed with accessible and practical advice grounded in learning theory The authors show how to take a step back reflect on your current practice and take measures to improve it A wide range of creative and innovative ideas are explored including using feedback from peers and students turning your understanding into practice getting involved in support networks working with mentors using teaching to progress your career

**Mathematical Literacy** Yvette Solomon, 2008-12-15 Why do so many learners even those who are successful feel that they are outsiders in the world of mathematics Taking the central importance of language in the development of mathematical understanding as its starting point Mathematical Literacy explores students experiences of doing mathematics from primary school to university what they think mathematics is how it is presented to them and what they feel about it Building on a range of theory which focuses on community knowledge and identity the author examines two particular issues the relationship between language learning and mathematical knowledge and the relationship between identity equity and processes of exclusion inclusion In this comprehensive and accessible book the author extends our understanding of the process of gaining mathematical fluency and provides tools for an exploration of mathematics learning across different groups in different social contexts Mathematical Literacy s analysis of how learners

develop particular relationships with the subject and what we might do to promote equity through the development of positive relationships is of interest across all sectors of education to researchers teacher educators and university educators
