Archaeology at the Millennium Gary M. Feinman, T. Douglas Price, 2007-10-17 An internationally distinguished roster of contributors considers the state of the art of the discipline of archaeology at the turn of the 21st century and charts an ambitious agenda for the future The chapters address a wide range of topics including paradigms practice and relevance of the discipline paleoanthropology fully modern humans holocene hunter gatherers the transition to food and craft production social inequality warfare state and empire formation and the uneasy relationship between classical and anthropological archaeology

The Evolution of Ceramic Production Organization in a Maya Community Dean E. Arnold, 2015-02-15 In *The Evolution of Ceramic Production Organization in a Maya Community* Dean E. Arnold continues his unique approach to ceramic ethnoarchaeology tracing the history of potters in Ticul Yucatán and their production space over a period of more than four decades This follow up to his 2008 work *Social Change and the Evolution of Ceramic Production and Distribution* uses narrative to trace the changes in production personnel and their spatial organization through the changes in production organization in Ticul Although several kinds of production units developed households were the most persistent units of production in spite of massive social change and the reorientation of pottery production to the tourist market Entrepreneurial workshops government sponsored workshops and workshops attached to tourist hotels developed more recently but were short lived whereas pottery making households extended deep into the nineteenth century Through this continuity and change intermittent crafting multi crafting and potters increased management of economic risk also factored into the development of the production organization in Ticul Illustrated with more than 100 images of production units *The Evolution of Ceramic Production Organization in a Maya Community* is an important contribution to the understanding of ceramic production Scholars with interests in craft specialization craft production and demography as well as specialists in Mesoamerican archaeology anthropology history and economy will find this volume especially useful

Ceramic Production in Early Hispanic California Russell K. Skowronek, M. James Blackman, Ronald L. Bishop, 2014-07-08 In the eighteenth and early nineteenth centuries much of what is now the southwestern United States was known as Alta California a remote part of New Spain The presidios missions and pueblos of the region have yielded a rich trove of ceramics materials though they have been sparsely analyzed in the literature *Ceramic Production in Early Hispanic California* fills that lacuna and reinterprets the position of Alta California in the Spanish Colonial Empire Using both petrography and neutron activation analysis to examine over 1 600 ceramic samples the contributors to this volume explore the region's ceramic production imports trade and consumption From artistic innovation to technological diffusion a different aspect of the intricacies of everyday life and culture in the region is revealed in each essay This book illuminates much about Spanish imperial expansion in a far corner of the colonial

world Through this research California history has been rewritten *Tarascan Pottery Production in Michoacán, Mexico* Eduardo Williams, 2017-08-31 This book examines a contemporary pottery tradition in Mesoamerica but also looks back to the earliest examples of cultural development in this area By means of ethnographic analogy and ceramic ecology this study seeks to shed light on a modern indigenous community and on the theory method and practice of ethnoarchaeology

Pottery Economics in Mesoamerica Christopher A. Pool, George J. Bey, 2022-08-23 Pottery is one of the most important classes of artifacts available to archaeologists and anthropologists Every year volumes of data are generated detailing ceramic production distribution and consumption How these data can be interpreted in relation to the social and cultural framework of prehistoric societies in Mesoamerica is the subject of this book Nine chapters written by some of the most well known and respected scholars in the field offer readers an in depth look at key advances from the past fifteen years These scholars examine ethnoarchaeological studies and the Preclassic Formative Classic and Postclassic periods and cover geographic areas from eastern to central Mesoamerica In a series of case studies contributors address a range of new and developing theories and methods for inferring the technological organizational and social dimensions of pottery economics and draw on a range of sociopolitical examples Specific topics include the impacts and costs of innovations the role of the producer in technological choices the outcomes when errors in vessel formation are tolerated or rectified the often undocumented multiple lives and uses of ceramic pieces and the difficulties associated with locating and documenting ceramic production areas in tropical lowlands A compelling collection that clearly integrates and synthesizes a wide array of data this book is the definitive text on pottery economics in Mesoamerica and an important contribution to the fields of anthropology archaeology ancient history and the economics of pre industrial societies CONTENTS Acknowledgments 1 Conceptual Issues in Mesoamerican Pottery Economics Christopher A Pool and George J Bey III 2 An Ethnoarchaeological Perspective on Local Ceramic Production and Distribution in the Maya Highlands Michael Deal 3 Why Was the Potter s Wheel Rejected Social Choice and Technological Change in Ticul Yucat n Mexico Dean E Arnold Jill Huttar Wilson and Alvaro L Nieves 4 Ceramic Production at La Joya Veracruz Early Formative Techno Logics and Error Loads Philip J Arnold III 5 Blanco Levantado A New World Amphora George J Bey III 6 Pottery Production and Distribution in the Gulf Lowlands of Mesoamerica Barbara L Stark 7 Household Production and the Regional Economy in Ancient Oaxaca Classic Period Perspectives from Hilltop El Palmillo and Valley Floor Ejutla Gary M Feinman and Linda M Nicholas 8 Pottery Production and Exchange in the Petexbatun Polity Pet n Guatemala Antonia E Foias and Ronald L Bishop 9 Aztec Otumba AD 1200 1600 Patterns of the Production Distribution and Consumption of Ceramic Products Thomas H Charlton Cynthia L Otis Charlton Deborah L Nichols and Hector Neff References Cited About the Contributors Index **Cultural Dynamics and Production Activities in Ancient Western Mexico** Eduardo Williams, Blanca Maldonado, 2016-04-30 This book presents a collection of papers from the Symposium on Cultural Dynamics and Production Activities in Ancient Western Mexico held at the Center for

Archaeology in Environment and Technology David Frankel, Susan Lawrence, Jennifer Webb, 2013-05-02 Environments landscapes and ecological systems are often seen as fundamental by archaeologists but how they relate to society is understood in very different ways The chapters in this book take environment culture and technology together All have been the focus of much attention often one or other has been seen as the starting point for analysis but this volume argues that it is the study of the inter relationships between these three factors that offers a way forward The contributions to this book pick up different strands within the tangled web of intersections between environment technology and society providing a series of case studies which explore facets of this common theme in different settings and circumstances and from different perspectives As well as addressing themes of theoretical and methodological interest these case studies draw on primary research dealing with time periods from the late Pleistocene glacial maximum to the very recent past and involve societies of very different types Running through all the contributions however is a concern with the archaeological record and the ways in which scales of observation and availability of evidence affect the development of questions and explanations The diversity of the chapters in this volume demonstrates the inherent weakness in any attempt to prioritise environment technology or society These three factors are all embedded in any human activity as change in one will result in change in the others social and technical changes alter relations with the environment and indeed the environment itself and as environmental change drives changes in society and technology As this book shows it is possible to consider the relationship between the three factors from different perspectives but any attempt to consider one or even two in isolation will mean that valuable insights will be missed

Anthropological

Perspectives on Technology Michael B. Schiffer, 2001 These fourteen original essays accept a dual premise technology pervades and is embedded in all human activities By taking that approach studies of technology address two questions central in anthropological and archaeological research today accounting for variability and change These diverse yet interrelated chapters show that to understand human lives researchers must deal with the material world that all peoples create and inhabit Therefore an anthropology of technology is not a separate discrete inquiry instead it is a way to connect how people make and use things to any activity studied ranging from religion to enculturation to communication to art Each contributor discusses theories and methods and also offers a substantial case study These detailed inquiries span human societies from the Paleolithic to the computer age By moving beyond the usual approach of examining ancient technologies particularly chipped stone and low fired ceramics this volume probes for the construction of meaning in the material world across millennia The authors of these essays find technology to be an inclusive and flexible topic that merges with studies of everything else in human activity A provocative and powerful discussion of the role of technology in human cultures At a time when archaeology has become less focused on theory and archaeology and social anthropology seem to fracture farther and farther apart the book is a breath of fresh air Professor John Douglas University of Montana [An Anthropology of Things](#) Ikuya Tokoro, Kaori Kawai, 2018 First published in Japanese by by Kyoto Japanese Press in 2011 as Mono no jinruigaku Title page verso **The Oxford Handbook of Egyptology** Ian Shaw, Elizabeth Bloxam, 2020 The Oxford Handbook of Egyptology offers a comprehensive survey of the entire study of ancient Egypt from prehistory through to the end of the Roman period Transcending conventional boundaries between archaeological and ancient textual analysis and bringing together 63 chapters that range widely across the various archaeological philological and cultural sub disciplines authored by recognized experts in their respective fields it highlights the extent to which the discipline has diversified and stresses the need for it to seek multidisciplinary methods and broader collaborations if it is to remain contemporary and relevant Authoritative yet accessible it is an invaluable resource for scholars students and general readers alike **Kura Araxes culture areas and the late 4th and early 3rd millennia BC pottery from Veli Sevin's surveys in Malatya and Elazığ, Turkey** Mitchell S. Rothman, 2017-03-07T00:00:00+01:00 The Kura Araxes a cultural tradition of the late 4th and 3rd millennia BC has recently become a focus of international archaeological research It was first discovered in the mountains of the Taurus and the South Caucasus From near the beginning of the tradition evidence suggests that populations bearing some of its hallmarks black burnished handmade pottery and a ritual of the hearth spread out over a wide region of the Taurus Zagros and Caucasus Mountains and as far south as the area of the Sea of Galilee in the southern Levant Recent research has questioned whether the simple narrative of a discreet homeland and unassimilated migrants fairly describes the ancient reality One of the key dependent variables used to trace the prehistory of the Kura Araxes cultural tradition is pottery This article discusses the cultural meaning and interpretive use of pottery but also the limits of pottery style alone to reconstruct prehistory It adds

previously unpublished material from Veli Sevin's surveys in Malatya and Elaz provinces to the larger database for study of the Kura Araxes

Materiality, Techniques and Society in Pottery Production Daniel Alberó Santacreu, 2014-01-01 Daniel Alberó Santacreu presents a wide overview of certain aspects of the pottery analysis and summarizes most of the methodological and theoretical information currently applied in archaeology in order to develop wide and deep analysis of ceramic pastes. The book provides an adequate framework for understanding the way pottery production is organised and clarifies the meaning and role of the pottery in archaeological and traditional societies. The goal of this book is to encourage reflection especially by those researchers who face the analysis of ceramics for the first time by providing a background for the generation of their own research and to formulate their own questions depending on their concerns and interests. The three-part structure of the book allows readers to move easily from the analysis of the reality and ceramic material culture to the world of the ideas and theories and to develop a dialogue between data and their interpretation. Daniel Alberó Santacreu is a Lecturer Assistant in the University of the Balearic Islands, member of the Research Group Arqueo UIB and the Ceramic Petrology Group. He has carried out the analysis of ceramics from several prehistoric societies placed in the Western Mediterranean as well as the study of handmade pottery from contemporary ethnic groups in Northeast Ghana.

The Oxford Handbook of the Phoenician and Punic Mediterranean Carolina López-Ruiz, Brian R. Doak, 2022 The Phoenicians created the Mediterranean world as we know it yet they remain a shadowy and poorly understood group. The academic study of the Phoenicians has come to an important crossroads: the field has grown in sheer content sophistication of analysis and diversity of interpretation and we now need a current overview of where the study of

these ancient seafarers and craftsman stands and where it is going Moreover the field of Phoenician studies is particularly fragmented and scattered While there is growing interest in all things Phoenician and Punic the latest advances are mostly published in specialized journals and conference volumes in a plethora of languages This Handbook is the first of its type to appear in over two decades and the first ever to appear in English In these chapters written by a wide range of prominent and promising scholars from across Europe North America Australia and the Mediterranean world readers will find summary studies on key historical moments such as the history of Carthage areas of culture organized around language religion and material culture regional studies and areas of contact spanning from the Levant and the Aegean to Iberia and North Africa and the reception of the Phoenicians as an idea entangled with the formation of other cultural identities both ancient and modern Soils Stones and Symbols Cultural Perceptions of the Mineral World Nicole Boivin, Owic, 2013-07-04

Ethnographic and archaeological records feature a rich body of data suggesting that understandings of the mineral world are in fact both culturally variable and highly diverse Soils Stones and Symbols highlights studies from the fields of anthropology archaeology and philosophy that demonstrate that not all individuals and societies view minerals as commodities to be exploited for economic gain or as passive objects of disembodied scientific enquiry In visiting such diverse contexts as contemporary India colonial period Australia and prehistoric Europe and the Americas the papers in this volume demonstrate that in pre industrial societies minerals are often symbolically meaningful ritually powerful and deeply interwoven into not just economic and material but also social cosmological mythical spiritual and philosophical aspects of life In addressing the theme of the mineral world this book is not only unique within the social and geo sciences but also at the forefront of recent attempts to demonstrate the importance of materiality to processes of human cognition and sociality It draws upon theoretical developments relating to meaning experience the body and material culture to demonstrate that studies of rock art landscapes architecture technology and resource use are all linked through the minerals that constantly surround us and are the focus of our never ending attempts to understand and transform them
