Cramer,2000-01-01 Despite widespread popular support for environmental action Phillip F Cramer argues that current U S environmental policy approaches fail to address the real threat of environmental insecurity Cramer traces this failure to a reluctance to recognize and address the interconnectedness of natural forces just as all elements within the environment are linked so too should our perspectives on and responses to environmental degradation be linked In this book Cramer provides an innovative holistic approach to environmental protection that incorporates the best lessons learned from the fields of biology ethics philosophy political science law ecology and international relations He especially advocates local action and providing illustrative examples demonstrates how local action around the world is most effective when carried out within a global framework that supports information dissemination and international coordination This book will energize to thought and action any scholar student or general reader concerned
