Economic Development Of Western Eur Volume :

The Economic Development of Europe's Regions Joan Ramón Rosés, Nikolaus Wolf, 2018-11-06 This book is the first quantitative description of Europe's economic development at a regional level over the entire twentieth century. Based on a new and comprehensive set of data, it brings together a group of leading economic historians in order to describe and analyze the development of European regions both for nation states and for Europe as a whole. This provides a new transnational perspective on Europe's quantitative development, offering for the first time a systematic long-run analysis of national policies independent from the use of national statistical units. The new transnational dimension of data allows for the analysis of national policies in a more thorough way than ever before. The book provides a comprehensive database at the level of modern NUTS 2 regions for the period 1900-2010 in 10-year intervals and a panoramic view of economic development both below and above the national level. It will be of great interest to economic historians, economic geographers, development economists, and those with an interest in economic growth.

The Cambridge Economic History of Modern Europe: Volume 2, 1870 to the Present Stephen Broadberry, Kevin H. O'Rourke, 2010-06-24 Unlike most existing textbooks on the economic history of modern Europe which offer a country-by-country approach, *The Cambridge Economic History of Modern Europe* rethinks Europe's economic history since 1700 as unified and pan-European, with the material organized by topic rather than by country. This second volume tracks Europe's economic history through three major phases since 1870. The first phase was an age of globalization and of European economic and political dominance that lasted until the First World War. The second, from 1914 to 1945, was one of war, deglobalization, and depression, and the third was one of growing integration, not only within Europe but also between Europe and the global economy. Leading authors offer comprehensive and accessible introductions to these patterns of globalization and deglobalization, as well as to key themes in modern economic history, such as economic growth, business cycles, sectoral developments, and population and living standards.

A Financial History of Western Europe Charles P. Kindleberger, 2015-06-03 This is the first history of finance broadly defined to include money, banking, capital markets, public and private finance, international transfers, etc., that covers Western Europe with an occasional glance at the western hemisphere and half a millennium. Charles Kindleberger highlights the development of financial institutions to meet emerging needs and the similarities and contrasts in the handling of financial problems, such as transferring resources from one country to another, stimulating investment or financing war, and cleaning up the resulting monetary mess. The first half of the book covers money, banking, and finance from 1450 to 1913; the second deals in considerably finer detail with the twentieth century. This major work casts current issues in historical perspective and throws light on the fascinating and far from orderly evolution of financial institutions and the management of financial problems. Comprehensive, critical, and

cosmopolitan this book is both an outstanding work of reference and essential reading for all those involved in the study and practice of finance be they economic historians financial experts scholarly bankers or students of money and banking This groundbreaking work was first published in 1984 The Cambridge Economic History of the Modern World: Volume 2, 1870 to the Present Stephen Broadberry,Kyoji Fukao,2021-06-24 The second volume of The Cambridge Economic History of the Modern World explores the development of modern economic growth from 1870 to the present Leading experts in economic history offer a series of regional studies from around the world as well as thematic analyses of key factors governing the differential outcomes in different parts of the global economy Topics covered include human capital capital and technology geography and institutions living standards and inequality trade and immigration international finance and warfare and empire **The Cambridge Economic History of Europe: Volume 7, The Industrial Economies: Capital, Labour and Enterprise, Part 2, The United States, Japan and Russia** Peter Mathias,M. M. Postan,1982-06-17 The role of capital labour and enterprise in the growth of the industrial economies *The Industrial Revolutions in Europe II, Volume 5* Patrick O'Brien,1994-04-06 Modern European economic history is marked by an endeavor to transcend the traditional national case study approach to use comparisons and to deploy economic theory in order to draw the manifold and diverse experiences of the regions countries and multicultural empires of Europe onto a unified frame of reference These two volumes exemplify this modern approach This Volume 5 of the eleven part set entitled Industrial Revolutions contains thirteen papers with an introduction which adopt and apply a conceptual and explicitly comparative approach to European economic history as a whole Volume 5 includes sixteen national case studies again organized around or set within the context of theoretical principles and ideas derived largely from macroeconomic theory social accounting productivity measurement and regional analysis *Economic Development of Africa, 1880-1939 vol 1* David Sunderland,2024-10-28 One of the main motives for British imperialism in Africa was economic gain This collection examines the ways in which Britain developed Africa and in so doing benefited her own economy **The Western European Economy** Allan M. Williams,2015-03-27 This book originally published in 1987 presents a broad overview of the spatial organization of the European economy providing a valuable synthesis of recently published material by geographers and other social scientists A major theme is the interdependence of economic development at various scales The three main sections look at international and European economic context detailed changes in particular sectors specific types if regional economic formations Case studies are used and reference made to historical processes *Regional Disparities in the Enlarged European Union* Valentina Meliciani,2015-10-14 The last twenty years have seen an increase in European integration and the emergence of the technological revolution Although tighter integration coupled with technological innovation should facilitate cross regional convergence some European regions have managed to jump ahead while others have been left behind This book examines the regional characteristics that favour growth and analyses the relevance of innovation socio economic and structural

factors in shaping regional economic disparities In this book particular attention is devoted to the EU enlargement towards the East to its consequences on Europe's traditional North-South divide and to the increasing regional disparities in new member states after the transition It demonstrates the growing importance of innovation and human capital in explaining the increase in income and employment disparities in old EU members particularly after the 2008 financial crisis It also shows that for newcomers regional disparities are essentially linked to socio-economic factors as capital regions approach Western standards while others mainly old industrial regions and peripheral ones lag behind This book integrates theoretical discussion with empirical evidence and will appeal to regional scientists interested in regional inequalities and to policy makers concerned with devising effective strategies to tackle regional disparities in Europe *International Commerce*, 1970 *Economic Neoliberalism and International Development* Michael Tribe, 2020-11-22 This book provides a robust theoretical and empirical exploration of the interrelationship between economic neoliberalism and international development Putting the experiences of developing and transitional economies centre stage the book investigates how their economic policies compare with the nature of economic liberalism during and after the significant economic reforms which took place from the mid 1980s Beginning with two chapters which provide an introduction to the concept of economic neoliberalism the second section focuses on its application to practice and the book moves on to country/regional case studies taken from Sub-Saharan Africa South Asia Latin America China and Eastern Europe The book closes with some concluding remarks summarising some of the principal findings Bringing together a wealth of expertise this book clarifies controversial economic and political issues which have been significantly misunderstood in public discourse and as such it will be of interest to a range of researchers interested in the economic social and political dynamics of developing and transitional countries

The Cambridge Economic History of Modern Britain: Volume 1, Industrialisation, 1700-1870 Roderick Floud, Jane Humphries, Paul Johnson, 2014-10-09 A new edition of the leading textbook on the economic history of Britain since industrialization Combining the expertise of more than thirty leading historians and economists Volume 1 tracks Britain's economic history in the period ranging from 1700 to 1870 from industrialisation to global trade and empire Each chapter provides a clear guide to the major controversies in the field and students are shown how to connect historical evidence with economic theory and apply quantitative methods New approaches are proposed to classic issues such as the causes and consequences of industrialisation the role of institutions and the state and the transition from an organic to an inorganic economy as well as introducing new issues such as globalisation convergence and divergence the role of science technology and invention and the growth of consumerism Throughout the volume British experience is set within an international context and its performance benchmarked against its global competitors **Foreign Commerce Weekly**, 1967
