From Economics to Political Economy Tim B. Thornton, 2016-07-22 The discipline of economics has been increasingly criticized for its inability to illuminate the workings of the real world and to provide reliable policy guidance for the major economic and social challenges of our time A central problem in contemporary economics and a problem from which many of its other failings flow is its lack of plurality By a lack of plurality it is meant that contemporary economics lacks diversity in its methods theories epistemology and methodology It is also meant that economics has become far less interdisciplinary From Economics to Political Economy offers an explanation as to why economics has become so determinedly non-pluralistic and also gives considerable attention to exploring and evaluating promising strategies for reform These strategies include developing a pluralist economics under the label of political economy within other social science departments such as departments of politics Along the way the reader will learn about the worldwide student movement seeking greater pluralism in economics encounter some dramatic case studies in intellectual suppression gain a fuller sense of the nature of contemporary economics and explore the relationship between economics and other social sciences This book is of interest to any social scientist particularly those with interests in economics and politics

Economics of Urban Property Markets Paschalis Arvanitidis, 2014-08-13 This book examines the relationship between the property market and urban economy The stimulus for this work was provided by the seemingly ever accelerating process of urban economic change and the noticeable failure of existing studies to adequately explore the pivotal role that the property market plays in this process Drawing on institutional economics the central argument of the book is that the property market as an institution is a mediator through which urban economic potential can be realised and served In developing this argument the book provides a critical realist ontological framework that advances understanding of the institutional structure of the economy and the complex interrelation between the institutional environment and human agency as well as a holistic theoretical framework of urban economic change where appropriate emphasis is placed on the specific mechanisms processes and dynamics through which the built environment is provided Arvanitidis also explores an institutional conceptualisation of property market efficiency defined in terms of the ability of the market institution to adapt its structure and to provide outcomes that the economy requires To inform empirical research on the developed concepts the book also offers a generic analytical approach specifying appropriate research methods and techniques for investigation along with a specific research design providing an operational framework that translates developed theory into empirical practice The book's primary contribution therefore lies in its delineation of a holistic research programme to conceptualise the property market as an institution and to explore its role within the urban economy **Economics and Art Theory** Stratos

Myrogiannis, Constantinos Repapis, 2022-08-04 Drawing on an interdisciplinary panel of contributors this book presents a stimulating dialogue between economics and art theory and considers how this might aid our understanding of both areas of

research The collection explores themes which both fields share including rationality abstraction and model building the nature of social reality representation and transformation The contributions employ a broad range of methods to investigate the links between economics and art and their coverage includes architecture history of ideas art theory literature studies and beyond This innovative volume will be of interest to advanced students and scholars of economic theory cultural economics literary and art theory and it intends to be a starting point for new avenues of interdisciplinary research

Comparisons in Economic Thought Stavros A. Drakopoulos, 2016-05-26 The idea of comparing rewards with others has a long and persistent presence in the social sciences and can be found in many psychological social and managerial theories In economics this idea can be traced back through the works of a substantial number of eminent thinkers from Genovesi and Hume to Smith Ricardo Marx and Mill through to Veblen Pigou and Keynes In the last two decades the notion of social comparisons has started to appear more frequently in economic literature especially in the subfield of happiness research There are also signs that the notion has resurfaced in some strands of literature such as positional concerns social identity models and social capital theory Comparisons in Economic Thought offers a uniquely comprehensive account of how social comparisons have featured in the history of economic thought This book provides an assessment as to why social comparisons have been dismissed by mainstream economists and considers their current and future usefulness This volume is suitable for those who are interested and study history of economic thought economic methodology and History of Consumer Theory as well as Rational Choice Theory The ^AOxford Handbook of Philosophy of Economics Harold Kincaid, Don Ross, 2009-03-06 This volume is the first comprehensive cohesive and accessible reference source to the philosophy of economics presenting important new scholarship by top scholars **The Inexact and Separate Science of Economics**

Daniel M. Hausman, 2023-06-08 Is economics a science What distinguishes it from other sciences both natural and social Like many of the natural sciences its theories are mathematically complex Yet like the social sciences its laws are largely everyday generalizations Can such generalizations which are far from universal truths constitute a science Does economics have a distinctive method The first edition answered these and other questions about the scientific status of economics and its underlying methodology In this fully updated new edition Dan Hausman reflects on developments in both economics and the philosophy of economics over the last thirty years It includes a new chapter on the methodology of macroeconomics an updated discussion on the use of models and new discussions causal inference and behavioural economics and their implications for theory appraisal It is the perfect choice for a new generation of students studying the methodology of modern economics *Handbook of Teaching Philosophy to Economists* Giancarlo Ianulardo, John B. Davis, Ricardo F. Crespo, 2025-09-10 In recent years there have been increasing calls for a revision of the economics curriculum to address the most pressing and challenging issues facing society This erudite Handbook bridges the gap between a flourishing body of scholarship in the philosophy of economics literature and an economics education in need of a

deeper rethinking as felt by both students and educators It provides practical pedagogical insights on how to structure courses in the philosophy of economics and how to link them to students economics backgrounds **Field Hospital** William T. Cavanaugh, 2016 Compelling social perspectives from a prominent Catholic scholar Pope Francis in a 2013 interview famously likened the church to a field hospital In this book William Cavanaugh adopts Pope Francis s metaphor to show how the church can help heal both the spiritual and the material wounds of the world As he examines the intersection of theology with themes of religious freedom economic injustice religious violence and other pressing topics Cavanaugh emphasizes that the church cannot condemn the evils of the world from a position of superiority Rather he says its practices of solidarity with humanity must be based on a profound recognition that the church shares in the guilt of human sin Cavanaugh s Field Hospital provides guideposts for a church that is willing to go outside of itself onto today s battlefields both metaphorical and literal not to inflict wounds but to bind them up and heal them
