The Reconstruction of Economic Theory Philip Mirowski,2007-06-30 The mandate given to the editor of the present volume was succinct and to the point gather together some of the most recent attempts to remake economic theory at its most fundamental levels and avoid the two debased brands of academic revolutions Now anyone would have realized that this would be a devilishly difficult task more likely than not to backfire but in retrospect the editor still marvels at the complacency with which he embarked on the enterprise It was quite easy to identify the critics of conventional economics who had little more than criticism to offer it was much more difficult to feel certain that he had actually stumbled upon a substantive divergence from the orthodoxy that appeared to promise further fruitful developments Forewarned and forearmed the prospective reader should then be equipped to judge for him or herself whether truth in advertising has been further abused or if something a little more interesting and entertaining is afoot Pages 1 2

Rationality and Irrationality in Economics Maurice Godelier,2014-08-26 This book is the result of a research project begun by the author in 1958 with the aim of answering two questions First what is the rationality of the economic systems that appear and disappear throughout history in other words what is their hidden logic and the underlying necessity for them to exist or to have existed Second what are the conditions for

a rational understanding of these systems in other words for a fully developed comparative economic science The field of investigation opened up by these two questions is vast touching on the foundations of social reality and on how to understand them The author being a Marxist sought the answers as he writes not in philosophy or by philosophical means but in and through examining the knowledge accumulated by the sciences The stages of his journey from philosophy to economics and then to anthropology are indicated by the divisions of his book Godelier rejects at the outset any attempt to tackle the question of rationality or irrationality of economic science and of economic realities from the angle of an a priori idea a speculative definition of what is rational Such an approach can yield only he feels an ideological result Rather he treats the appearance and disappearance of social and economic systems in history as being governed by a necessity wholly internal to the concrete structures of social life **Economic Papers 1941-88** Josef Steindl,1990-07-09 Labour Economics.
