International Trade Fairs and Inter-Firm Knowledge Flows

Rachael Gibson,2023-01-02 Against a backdrop of economic uncertainty caused by a shift toward protectionism and the COVID 19 pandemic among other issues this book suggests that international trade fairs ITFs represent a vital source of economic dynamism that can support national and regional economies by creating opportunities for firms to access new markets network with key actors in their industry or value chain and tap into valuable external knowledge flows regarding

new technologies and innovations Author Rachael Gibson argues that ITFs have become crucial nodes in the global political economy driving global economic dynamics and mediating differences between capitalist economies regarding their technological and institutional practices and conditions In this way ITFs represent a decisive mechanism by which distinct national patterns of technological specialization may converge or diverge Trade fairs represent important platforms for networking interactive learning and knowledge exchange because they foster intense interactions among actors despite spatial boundaries ITFs also tend to be organized according to a specific technological or industry focus which means that they can facilitate interactions between firms from different capitalist varieties Through the diffusion of state of the art knowledge ITFs may thus serve as drivers of economic globalization challenging the continuation of distinct capitalist varieties by enabling cross system convergence regarding the technological specializations of firms Yet it is clear that countries have retained competitive advantages in specific industries and that full convergence has not taken place This book explores this puzzle *Economic Analysis of Oil and Gas Engineering Operations* Hussein K. Abdel-Aal, 2021-02-26

Books in Print , 1991 **Economics and Climate Emergency** Barry Gills, Jamie Morgan, 2022-08-22 This book explores a series of connected themes focused on the role economics and other influential forms of theory and thinking have played in creating the current predicament and the scope for alternatives and how they might be framed Thirty years have passed since the inception of the United Nations Framework Convention on Climate Change UNFCCC and the beginning of policy on climate change Thirty wasted years To most politicians long term collective interest has been denominated in meaningless units of time a never and forever that has continually delayed action From complacency has come potential disaster and we are now living in a time of climate emergency and ecological breakdown The next decade is a pivotal period requiring

fundamental change But numerous impediments remain Continual material energy and economic growth on a planetary scale are manifestly impossible and yet economic theory takes these as a given and political leadership and policy seem unwilling to accept brute reality Instead they offer a series of implausible commitments and pledges rooted in technofixes without addressing the fundamental drivers of the problems the world faces The edited volume explores the issues and offers a variety of ways to think through the problems at hand from postgrowth degrowth and social ecological economics to policy assemblage and transversalism The chapters in this book were originally published in the journal *Globalizations* *Bulletin of the Public Library of the City of Boston* ,1919 **Bulletin [1908-23]** Boston Public Library,1920 Bulletin of the Public Library of the City of Boston Boston Public Library,1920 **Handbook of Research on Managerial Thinking in Global Business Economics** Dinçer, Hasan,Yüksel, Serhat,2018-12-07 In a highly competitive global market companies need to equip themselves with best practices and strategies to survive Strategic management innovative managerial thinking and a clear decision making process must be utilized to boost company performance and ultimately drive the company s success The Handbook of Research on Managerial Thinking in Global Business Economics identifies the importance of strategic decision making in competitive environments and analyzes the impacts of managerial thinking on global financial economics The content within this publication examines globalization consumer behavior and risk management It is designed for researchers academicians policymakers government officials and managers and covers topics centered on innovation and development within organizations *Handbook of Monetary Policy* Jack Rabin,2020-04-30 This handbook explains the development and implementation of monetary policy It examines theories and issues related to the preservation of economic activity and explores why the preservation of economic stability is a principal goal of public policy
