Jones,2016-04-15 Mexican drug networks are large and violent engaging in activities like the trafficking of narcotics money laundering extortion kidnapping and mass murder Despite the impact of these activities in Mexico and

abroad these illicit networks are remarkably resilient to state intervention Drawing on extensive fieldwork and interviews with US and Mexican law enforcement government officials organized crime victims and criminals Nathan P Jones examines the comparative resilience of two basic types of drug networks territorial and transactional that are differentiated by their business strategies and provoke wildly different responses from the state Transactional networks focus on trafficking and are more likely to collude with the state through corruption while territorial networks that seek to control territory for the purpose of taxation extortion and their own security often trigger a strong backlash from the state Timely and authoritative Mexico's Illicit Drug Networks and the State Reaction provides crucial insight into why Mexico targets some drug networks over others reassesses the impact of the war on drugs and proposes new solutions for weak states in their battles with drug networks *Resources in Education* ,2001-04 **Extension of Elementary and Secondary Education Programs** United States. margins and at the epicentre of the battles of the Great Powers Two excellent educators Sarfarozi Niyozov and Iveta Silova compiled a timely and long awaited scholarly work based on empirical research in societies which had similar history close to three decades ago All the contributors are prolific educators who know the education system from within and without who either hailed from the region or have spent a considerable amount of time to know the systems well The book contains remarkable stories of education through the ups and downs of historical evolution It is a must read primer for anyone interested in learning about high quality research in the field of education in Central Asia It is a huge contribution to educational research with an impact on research and teaching for years to come Duishon Shamatov Nazarbayev University Kazakhstan The challenge of moving Central Asia from the borders of the Soviet Empire to the world s center is the focus of the discussions in *Globalization on the Margins* The transition to the Western models of education was happening in the context of major paradigm shift which entire humanity was experiencing and which could be described as the arrival of the new post industrial civilization During this process Central Asian countries have been pushed to the margins because their contribution to the wealth of the new world know how was much less pronounced than that of their Western neighbours Therefore investment into the research that contributes to local knowledge production seems a natural solution to the problem All the contributors to this book have a vast experience in the region and many of their observations are thought provoking This is a very insightful and much needed book Elena Lenskaya Moscow School of Social and Economic Sciences Russia Library Journal Melvil Dewey, Richard Rogers Bowker, L. Harriss, Craig Jeffrey, 2013-04-03 Twenty years ago India was still generally thought of as an archetypal developing country home to the largest number of poor people of any country in the world and beset by problems of low economic growth casteism and violent religious conflict Now India is being feted as an economic power house which might well become the second largest economy in the world before the middle of this century Its democratic traditions moreover remain broadly intact How and why has this historic transformation come about And what are its implications for the people of India for Indian society and politics These are the big questions addressed in this book by three scholars who have lived and researched in different parts of India during the period of this great transformation Each of the 13 chapters seeks to answer a particular question When and why did India take off How did a weak state promote audacious reform Is government in India becoming more responsive and to whom Does India have a civil society Does caste still matter Why is India threatened by a Maoist insurgency In addressing these and other pressing questions the authors take full account of vibrant new scholarship that has emerged over the past decade or so both from Indian writers and India specialists and from social scientists who have studied India in a comparative context India Today is a comprehensive and compelling text for students of South Asia political economy development and comparative politics as well as anyone interested in the future of the world's largest democracy
