Cornell University US At the beginning of the 2000 2010 decade Bob Baulch with John Hoddinott was setting the micro econometric agenda on poverty dynamics and chronic poverty and producing work that non economists had to read if they wanted to conduct serious research on these issues In this volume though his analytical excellence the pursuit and methodological rigour extraordinary energy and his ability to lead such a distinguished network of colleagues Bob Baulch has set the research agenda on poverty dynamics and chronic poverty for the next ten years From the foreword by David Hulme University of Manchester UK

The Great Curse R. Albert Berry, 2024 Land is the key input for economies in the earliest stages of development when seventy five percent to ninety percent of the labor force is engaged in agriculture Concentration of land ownership has been a common and usually quite damaging feature of most societies throughout history as both the cause and the result of access to power Highly unequal control of land typically implies severe inequality of income and welfare as well Landlessness has been at the root of many of the world s most serious and persistent problems including severe exploitation and the deprivation of political rights and basic human needs Historically the motivation for many revolutions has been access to land This volume reviews the land reform experiences of multiple countries during the twentieth century The experiences I covered illustrate the widespread need for reform the great difficulties facing major changes and the extreme cost of failure in delicate political moments Looking ahead the biggest challenge will be to avoid the injustices and inequality that have accompanied land concentration in the past

Spatial Inequality and Development Ravi Kanbur, Anthony J. Venables, 2005-02-03 What exactly is spatial inequality Why does it matter And what should be the policy response to it These questions have become important in recent years as the spatial dimensions of inequality have begun to attract considerable policy interest In China Russia India Mexico and South Africa as well as most other developing and transition economies spatial and regional inequality of economic activity incomes and social indicators is on the increase Spatial inequality is a dimension of overall inequality but it has added significance when spatial and regional divisions align with political and ethnic tensions to undermine social and political stability Also important in the policy debate is a perceived sense that increasing internal spatial inequality is related to greater openness of economies and to globalization in general Despite these important concerns there is remarkably little systematic documentation of what has happened to spatial and regional inequality over the last twenty years Correspondingly there is insufficient understanding of the determinants of internal spatial inequality This volume attempts to answer the questions posed above drawing on data from twenty five countries from all regions of the world They bring together perspectives and expertise in development economics and in economic geography and form a well researched introduction to an area of growing analytical and policy importance

Perspectives on Poverty in India The World Bank, 2011-04-13 The book examines India s experience with poverty reduction in a period of rapid economic growth Marshalling evidence from multiple sources of survey data and drawing on new methods the book asks how India s structural transformation from rural to urban and from agriculture to

nonfarm sectors is impacting poverty Our analysis suggests that since the early 1990s urban growth has emerged as a much more important driver of poverty reduction than in the past We focus in particular on the role of small and medium size conurbations in India both as the urban sub sector in which urban poverty is overwhelmingly concentrated and as a sub sector that could potentially stimulate rural based poverty reduction Second in rural areas we focus on the nature of intersectoral transformation out of agriculture into the nonfarm economy Stagnation in agriculture has been accompanied by dynamism in the nonfarm sector but there is much debate about whether the growth seen has been a symptom of agrarian distress or a source of poverty reduction Finally alongside the accelerating economic growth and the highly visible transformation that is occurring in India s major cities inequality is on the rise This is raising concern that economic growth in India has by passed significant segments of the population The third theme on social exclusion asks if despite the dramatic growth historically grounded inequalities along lines of caste tribe and gender have persisted This book would be of interest for policymakers researchers non governmental organizations and international agencies from India and abroad who wish to know more about India s experience of the last two decades in reducing poverty
