Global Long-term Economic Growth and the Economic Transformation of Poland and Eastern Europe Stanisław Gomulka,2023 One of the characteristic facts concerning the catching up countries is the exceptionally large variation in their per capita annual rate of growth from about zero to about 10% The papers published in this monograph show that this rate is strongly dependent on the rate of investment the quality of the labour force and the quality of institutions The rate of investment is in turn dependent on the rate of domestic savings In Poland domestic savings are shown to have been and continue to be very low by international standards The trend rate of growth of about 3.7% has been about 2 pp higher than that of the most developed economies mainly thanks to the development of modern market institutions and a new private sector and partly thanks to foreign direct investments and a significant inflow of finance from the European Union EU The data also show that by far the least successful transformation in Eastern Europe has taken place in Ukraine Author s Introduction Our discussion is limited to the Technology Frontier Area TFA of the world The central question is how the area s innovation rate changes over time in the course of centuries The analysis indicates that the pattern of change of the innovation rate over time may be eventually hat shaped This Hat Shape Relationship is an empirical law that is given a theoretical interpretation It is in part a prediction based on the author s model of innovation and growth Its acceleration and steady growth segments correspond well to the past reality Its slowdown part is the central thesis of the book

Economies in Transition Wing Thye Woo, Stephen Parker, Jeffrey

Sachs,1997 In 1994 the Asia Foundation's Center for Asian Pacific Affairs began a two year project to compare the transitions of selected East European and Asian economies from centrally planned communist systems to market economies. The goal was to shed light on the transition process through an understanding of the underlying economic and institutional dynamics. This volume is the culmination of that project. The volume is divided into three parts. In the first part an overview of the editors' review of the authors' findings and highlights major themes. The second part looks closely at the transition process in seven Asian and East European economies: China, Vietnam, Mongolia, Russia, Poland, Hungary, and the Czech Republic. The third part contains six comparative studies that explore key elements of the transition process. The papers incorporate feedback obtained from meetings with cabinet members and high government officials, conferences and seminars in Prague, Ho Chi Minh City, Hanoi, Beijing, Ulan Bator, and Washington, D.C. Contributors: Leszek Balcerowicz, Barbara Blaszczyk, Peter Boone, Yuan Zheng, Cao Bruce, Comer Marek, Dabrowski, Georges de Menil, Daniel C. Reforming Planned Economies in an Integrating World Economy Barry P. Bosworth, Gur Ofer, 2000-07-26. The still chaotic states of the former Soviet Union, a growing China, and the divergent nations of Eastern Europe are striving to radically transform their economies. In their quest to become more integrated with the global economy, they are making historic changes to move toward market-based private enterprise systems. In this book, Barry P. Bosworth and Gur Ofer provide a balanced assessment of the progress of integration among the formerly centrally planned economies. So far, the results of the reform process range from amazing success in China to economic and political disarray in the states of the former Soviet Union. The authors outline the key issues that any successful reform program must address and the sequence in which these reforms should take place. A volume of Brookings Integrating National Economies Series.

Poland's New Capitalism Jane Hardy, 2009-07-20. This book explores the way that neoliberal policies have formed the basis of political transformation in Poland, championed by both post-communist and post-Solidarity governments. Poland was central to the historic changes that took place across Eastern Europe at the end of the Cold War. It is the largest economy in the region and was at the forefront of opposition to communism. Since then, neoliberal policies have controlled the country. This book assesses the impact of these policies, the role of capital in the form of transnational corporations and foreign direct investment. The revival of trade unions and growth of new social movements are also explored as they challenge Poland's new capitalism.

The Market Meets Its Match Alice Hoffman, Amsden, Jacek Kochanowicz, Lance Taylor, 1998. Under free market shock therapy, many economies of former socialist countries of Eastern Europe have declined. Why has there been so much stagnation, inflation, and de-industrialization, and what can be done to produce a turnaround? This book addresses these questions in revealing detail.

Continuities in Poland's Permanent Transition H. Wydra, 2001-02-02 This book examines change in post 1989 Poland by linking it analytically to the continuity of Poland's past. It argues that the first reality of objective institutional change is underpinned by the continuity of second realities. Based on an interdisciplinary analysis of the Polish case, this study proposes a new conceptual framework for the study of transitional societies and revises standard assumptions in transitology and democratization studies.
