## Editing Digital Video:

*Editing Digital Video* Robert M. Goodman, Patrick McGrath, 2002-10 Rebecca Harding Davis was a prominent author of radical social fiction during the latter half of the nineteenth century. In stories that combine realism with sentimentalism, Davis confronted a wide range of contemporary American issues, giving voice to working women, prostitutes, wives seeking divorce, celibate utopians, and female authors. Davis broke down distinctions between the private and the public worlds, distinctions that trapped women in the ideology of domesticity. By engaging current strategies in literary hermeneutics with a strong sense of historical radicalism in the Gilded Age, Jean Pfaelzer reads Davis through the public issues that she forcefully inscribed in her fiction. In this study, Davis's realistic narratives actively construct a coherent social work, not in a fictional vacuum but in direct engagement with the explosive movements of social change from the Civil War through the turn of the century.

*A Beginner's Guide to Digital Video* Peter Wells, 2004-08 Lifting the lid on the potential of digital video, the author explains from start to finish how to make a movie. Fundamentals such as storytelling are explained, and there is also an introduction to special effects. Finally, there is a guide to available camcorders and editing systems.

*Video Editing and Post-production* Gary Hale Anderson, 1993 Videotape Editing and Post Production emphasizes the basic information that professionals need to acquire: a practical working knowledge of editing equipment and the post production process. This book is a real world guide to both the technical and non technical aspects of videotape production. The text and numerous illustrations bring the reader up to date on the latest developments in video, including component video, signal field rate, SMPTE time code, Betacam SP, TM, VHS, HiFi, the videotape editing bay, control, edit list, cleaning, and multi format editing. Anderson also provides timely information on the latest film to video, offline systems, track editing, time code editing, offline editing, digital video effects systems, electronic animation, and graphics systems, and personal computers that function as edit controllers and edit list management tools. Combining basic information on editing equipment and techniques with tips on budgeting, organization, and getting into video editing, this is a valuable reference tool for experienced and novice editing professionals. Practical hands on approach. Provides novices with basic information on equipment and techniques. Offers professionals guidance on the management of the process.
