Educating for an Ecologically Sustainable Culture C. A. Bowers, 1995-07-01 This book is a wake up call for environmentalists who need to consider how current educational ideals and practices undermine efforts to create a more sustainable future It is also a wake up call for educators who continue to base their reform efforts on the primacy of the individual while ignoring the fact that the individual is nested in culture and culture is nested in and thus dependent upon natural ecosystems Bowers argues that the modern way of understanding moral education creativity intelligence and the role of direct experience in the learning process cannot be supported by evidence from such fields as anthropology cultural linguistics and the sociology of knowledge **Expanding Curriculum Theory** William M.
